Trustees approve budget request, student fee increase

The CSU Board of Trustees on Thursday, Oct. 24, approved the 2006-07 CSU budget request. If funded by the state, the new budget will bring an increase in funding of \$235.5 million for 23 campuses. The CSU is asking for a 3 percent increase in funding from the state General Fund and a 2.5 percent increase for student enrollment. The increases would provide access to an additional 10,000 students. The budget request also includes an increase in the State University Fee for undergraduate and teaching credential students by 8 percent. Graduate student fees would increase by 10 percent under the proposal. The fee increases also are consistent with the governor's Compact, an agreement which stabilizes funding for the CSU. Even with the fee increase, CSU student fees are among the lowest state university fees in the entire country.

New biomedical engineering degree offered

Students who dream of designing a new prosthesis for Luke Skywalker have gotten a whole new major in the College of Engineering. Biomedical engineering combines engineering expertise with medical needs for the enhancement of health care. The program is housed in the Biomedical & General Engineering Department. Some of the specialty areas in biomedical engineering include biomechanics, biomaterials, systems physiology, clinical engineering, and rehabilitation engineering. These areas encompass a strong and growing segment of the industrial sector. No other CSU campus offers a biomedical engineering degree.
