FRESHMAN RECEPTION

Ralph Rich, president of the Senior Class, was master of the ceremonies for the Freshmen at the Poly Field on Friday night, September 27. In Ralph's capable hands, the Freshmen receivd a very warm welcome, stating that the purpose of the California Polytechnic School was to turn out practical workers that any boss can use, and that the students needed for the different classes.

President Richardson gave the Freshmen a very warm welcome, stating that the purpose of the California Polytechnic School was to turn out practical workers that any boss can use, and that the students needed for the different classes.

POLY FIELD

LET'S GO!

Students: You can best serve your town and school at the Poly Field, if you follow the rules of the Poly Field Association, and if you observe the safety regulations. You will help others if you observe the safety regulations. You will also enjoy yourself and your fellow students if you observe the safety regulations. You will also enjoy yourself and your fellow students if you observe the safety regulations.

Let's Go!
LET'S KEEP ALIVE!

School has begun and it's time for us to get down to work again, trying to learn something. Though that is the purpose of school, it would seem very tiresome if we didn't have some sport to balance our time. That is the intention of school athletes—to change your chain of thought for a while and to arouse enthusiasm. So, some of you fellows who rave about taking life easy, make use of your time and you will find that it is to your advantage.

Of course all of us aren't athletes, but we have as good a chance as any one to take part in the sports and in due time may surprise yourself by your ability to play a certain position in some game. On the other hand, some of us really haven't the time to devote to athletics. Row is this group going to show school spirit and the keen interest that is shown by the fellows who play football, etc., for the honor of the school?

This is the class who should boost them and support them to every way. "School spirit" at Poly this year should be stronger than it ever was, for our sake and that of the school. As President Ricrocanni says, "the people of California are watching Poly and it is up to us to show them that we are worthy of consideration."

The work that we do is a strong impression, but how about the pep that we show? Doesn't that go a long way? Let us know that Poly is still here and keep up the pep that this school is noted for.

This can be done by every student, whether you are the slowest fellow in school or the most faithful athlete. "Pep" is the best medicine in the world for the former and is great encouragement to the latter. Keep things a-buzzing and you will enjoy much that much more. When we have our rallies, be there with the best of spirits and the same for all games.

So, fellows, let's "say it with pep" and show the people of California that we are alive, and gain that reputation which is a drawing card for any school.

SOPHOMORES MEET

The Sophomores Class met Friday, the twelfth, for the purpose of electing new officers. Mr. Langenbeck was unanimously elected president. The Sophomores of this year are a small organization, but what they lack in numbers is made up in pep. Under what promises to be the brilliant leadership of Mr. Langenbeck, the Sophomores have a very optimistic outlook for the coming year and hope to accomplish wonders.

Walter Hoare: "You don't believe all you hear."

Walker: "No but you can repeat it."

But Haas: "You look like four bits."

Dief: "Sorry, Bud, but I can't let you have it this morning."

THE POLYGRAM
BELLE: "Do you think men like a girl who can't be kissed better than one who can?"

GEORGE: "I don't know; I never met any of the former."

A pig-headed man is always a bore.

OVERHEARD IN MORE'S ROOM
Every day in every way I am getting better—whew."

And he landed out in the dirt,
And someone gave him a whack.

"Where is the capitol of the United one who can?"

Mixed glycerine with nitroglycerin.

Virgil: "Your father is a crank."

Father (upstairs): "It is time for this young man to go home."

Belle: "Your father is a crank."

Father (overhearing): "Well, when you don't have a shelterer, a crank comes in very handy."

For a definition of an unpleasant door or how to keep creases in your pants, ask Don Failower.

Marty: "How fast of some of these old songs do not hunt me?"

Belle: "Well, you've often murdered them."

"Miss Jordan: "Now, I put the number seven on the board. What number immediately comes into your mind?"

Belle: "Eleven."

Mr. Aguto: "What effect does the moon have upon the tide?"

Marty: "None; it effects only the untied."

Dorm Doings

The opening of school found many old familiar faces in the Dorm, and our hallways are graced by the shining features of a number of new residents. The crop of freshmen appears particularly promising and we hope that it will afford us much service and amusement during the coming year.

The Dormitory Club had its first meeting of the year September 17 for the purpose of electing officers. Rudolph Reisch is our new president; Hughes, vice-president, and Eveline, secretary-treasurer.

Perhaps you have noticed that the block "70" on the bill inckadic of Poly has a bright new surface. Who did it? The Dorm Club, of course.

Mr. Reisch paid us a short visit last Tuesday evening and had a short talk with the boys. He suggested a number of improvements in the dining system, and also spoke a few words about football, urging the boys to devote more enthusiasm to that line.

Last Tuesday night after supper a number of boxing bouts were staged by way of amusement, setting dancing and initiating the freshmen.

The principal event of the evening was a three-round bout between Barear and Schmidt, which ended in a draw. Other contests of note were: Harris vs. Langan; Reed vs. Friedel; Reddy vs. Oldham and Reisch vs. Alexander, all being pugil matches. There was plenty of pace and skill displayed, and a number of bloody noses and black eyes were acquired, and one of the boys suffered a broken nose.

It is interesting to note that the presidents of all four classes, the Ag and Mechanics Associations, and Block 11 Club are all dormitory residents.
FOOTBALL DOPE

The opening of the football season has brought out some good-looking material and as five of the old letter men are back it looks as if Poly's team is going to be a winner this year.

The men this year will be a lot handier than those of last year and this will give us more chance with the heavier teams in the conference and with the old Poly fight we sought to go as limp as chance. The team started right out with lots of pep the first night, or should I say the ball, passing and kicking it around.

The team is practicing from four o'clock until dark, doing their best to put out a good team and also the new fellows are showing up good in the practice, which is very promising.

Where we may and we may not be the champs, but we are going to live up to the rep of the team last year; the great Poly fighting team in the conference. What better name would a team want than that?

Poly is in full swing, with good material out, but still there are holes around the campus that should be filled before the end of the Poly fight. We can not hope to have a top-notch team out, so you fellows who are not out, come out and show a little school spirit. If everybody practices—1834566 every one stays out, where would Poly be?

The old fellows won't laugh, but will help the new fellows along, even if they do make mistakes. Practice makes perfect. Some day he may be a star.

The schedule this year is the best Poly has ever had in its history of STUDIO

No matter what time of the year it is, you will always find President Riccardi boosting for Poly or for the training that you will receive here.

His first important trip during vacation was to San Francisco and Oakland to attend the convention of the National Education Association. During one of the sessions he gave an address.

He then went to Sacramento and in a few days returned to the City of the Bishop. His next trip was to Redlands. However, the southern atmosphere was calling him and within two weeks he was down in Los Angeles, remaining there until it was time to take up his duties at Poly again.

Mr. Perossi, a new member of our faculty, spent a great deal of his time toward putting out a good team and also the new fellows are showing up good in the practice, which is very promising.

The fellows on the team say that football is a good sport, and cleanest fighting team in the conference and with the old Poly fight we sought to go as limp as chance. The team started right out with lots of pep the first night, or should I say the ball, passing and kicking it around.
