SCHOOLS HAS BEGUN

On September 20 Poly opened its doors to welcome back the old as well as to admit the new ones. Though very few were out before Wednesday, time was made up during the next day. Tuesday morning was devoted to registration, etc., while in the afternoon a full day’s schedule was run through on fifteen minutes’ schedule in order to get an exact count of the girls who would be needed for the different classes.

Many new students are here this year, representing forty-six towns and cities from all parts of California, and also from Idaho and Mexico. The places represented are Lemoore, Fresno, Visalia, Santa Barbara, Arroyo, San Luis Obispo, Santa Maria, Concord, Santa Clara, San Francisco, Stockton, Sacramento, Chico, Redwood City, Alhambra, Los Angeles, San Mateo, Berkeley, Walnut Creek, Oakland, San Francisco, San Jose, Porterville, Susanville, (Hen Lake, Prescott, Kanab, Arizona), and other places. There is now a total enrollment of 108, and four new students are expected before the end of the week. The enrollment for freshmen is 52, and that for non-football students is 56.

DR. WILDER TALKS TO ASSEMBLY OF SEPT. 19

Mr. Peteler opened the assembly of September 19 by announcing that we had an orchestra with us. For a fact, we did. Fred Ellis played the drums and accompanied the guitar, which the music teacher brought much applause. He also made good music on his cornet, and he was listened to with delight.

Fred Fingler did himself justice at the piano. A man at the piano is what we need.

Dr. Wilder gave a very interesting talk on the eclipse. He has been twice and is very much interested in the phenomenon. The first time was in 1908, he went to considerable trouble and expense taking pictures. For this last time he went to Lompoc where he managed to get a very good view, which many would not get because of the heavy fog which covered the sky.

He showed some exceptionally good photos of the eclipse of 1908. Mr. Wilder also showed some slide pictures of eclipses and the phenomena.

POLY STUDENTS WORK AT THE BANK OF ITALY

Young, Martinson, Lewis and Greenfield worked at the Bank of Italy building for three days, installing burglar alarms. This work took much skill and care because of the many delicate parts and difficulties to overcome. These men all belong to the class of 1923, and they made it one of the best school papers.

Dr. Wilder also gave a very interesting talk on the Polyrum, which is for the benefit of the Sophomore class. He told them the absolute truth about where to go when in need of help. He also gave his promise of the one to come.

Mr. Peteler also gave a very interesting talk on the Polyrum, which is for the benefit of the Sophomore class. He told them the absolute truth about where to go when in need of help. He also gave his promise of the one to come.

MR. PETELER’S TRIP TO NEW YORK

Mr. Peteler took the Southern Pacific from San Luis for Los Angeles, transferring there to the Santa Fe for the Grand Canyon, where he stayed two days, hiking to the bottom and out again (good for Mr. Peteler). At Kansas City he stopped for a while, then went on to Chicago, where he stayed a week visiting the parks and museums. In Buffalo he visited relatives, from Buffalo he went to Niagara Falls and took a trip into Canada.

Mr. Peteler’s main reason for going east was to continue his education, but he also wanted to see some of the East. Boys, just take warning, the girls will keep you busy trying to keep up with them.

ADMISION 35c

2:30 P. M.
School has begun and it's time for us to get down to work again, trying to learn something. Though that is the purpose of school, it would seem very tiresome if we didn't have some sport to balance our time. That is the intention of school athletics—to change your chain of thought for a while and to arouse enthusiasm. So, some of you fellows who rave about taking life easy, make use of your time and you will find that it is to your advantage.

Of course all of us aren't athletes, but we have as good a chance as any one to take part in the sports and in due time may surprise yourself by your ability to play a certain position in some game. On the other hand, some of us really haven't the time to devote to athletics. Row is this group going to show school spirit and the keen interest that is shown by the fellows who play football, etc., for the honor of the school?

This is the class who should boost them and support them in every way. "School spirit" at Poly, this year should be stronger than it ever was, for our sake and that of the school. As President Riccardi says, "the people of California are watching Poly and it is up to us to show them the twenty-first for the purpose of electing new officers."

This can be done by every student, whether you are the slowest fellow in school or the most faithful athlete. "Pep" is the best medicine in the world for the former and is great encouragement to the latter. Keep things a-humming and you will enjoy the world for the former and is great encouragement to the latter. Keep things a-humming and you will enjoy the world for the former and is great encouragement to the latter. Keep things a-humming and you will enjoy the world for the former and is great encouragement to the latter. Keep things a-humming and you will enjoy the world for the former and is great encouragement to the latter. Keep things a-humming and you will enjoy the world for the former and is great encouragement to the latter. Keep things a-humming and you will enjoy

SOPHOMORES MEET

The Sophomore Class met Friday, the twenty-first, for the purpose of electing new officers.

Mr. Langenbeck was unanimously elected president.

The Sophomores of this year are a small organization, but what they lack in numbers is made up in pep. Under what promises to be the brilliant leadership of Mr. Langenbeck the Sophomores have a very optimistic outlook for the coming year and hope to accomplish wonders.

Walker: "You don't believe all you hear."

Dufee: "Sorry, Bud, but I can't let you have it this morning."
BELLE: "Do you think men like a girl who can't be kissed better than one who can?"

George: "I don't know; I never got any of the former."

A pig-headed man is always a bore.

OVERTHROWN IN MORE'S ROOM
Every day in every way I am getting better—whiskers.

DEDICATED TO WHISKERS
A can of spaghetti in the mouth is worth more than a showgirl on the plate.

Little Darrel Whinner
let his arms around a skirt;
He gave her a smash;
And he gave him a whack.
And he landed out in the dirt,
And he gave him a whack.
He that in a Ford
you're born with it.

"Where's she capitol of the United States?"

Mr. O'Donnel (in U. S. History): "In Europe."

Mr. T. A.: "I'm not going to tell—"
Mr. R. Dr.: "It's from Europe."

Mr. Wimmer had a Freahmobil-
One of the speedy kind,
And every where the front wheels went
The rear wheels came well.

Get a wonder sandwich at the cafeteria today.

"What's that?"

Wonderful where the meat was.

Q: What's the difference between the death of a hairdresser and that of a sculptor?
A: One cuts up and dies, and the other makes faces and boats.

English Teacher: "Walter, do you think you can handle the English language?"
Walter: "Sir, my knowledge of the English language has always been by greatest enemy."
Teacher: "Good! Take the dictionary downstairs."

Bill Tanfield: "We have a new artist in school."
John Pfleifer: "He draws fine."

"I think Wharfosf was born during a foot."
"Why?"
"Because everything he touches is mine."

Father (upstairs): "It is time for that young man to go homing."
Ruth: "Your father is a crack."
Father (overhearing): "Well, when you don't have a self-starter, a crack comes in very handy."

For a definition of an unpleasant door key or how to keep creases in your pants, ask Don Palwisred.

Young: "How some of these old songs do the heart good."
Mum: "Well, we've often murdered them."

Mr. Jordan: "Now, I put the number seven on the board. What number immediately comes into your mind?"
Hass: "Eleven."

Mr. Agent: "What effect does the moon have upon the tide?"
Mr. T.: "None; it effects only the untold."

Dorm Doings

The opening of school found many old familiar faces in the Dorm, and our ballhays are graced by the shining features of a number of new residents. The crop of freshmen appears particularly promising, and we hope that it will afford us much service and amusement during the coming year.

The dormitory club had its first meeting of the year September 17 for the purpose of electing officers. Rudolph Reich is our new president; Hodges, vice president; and Evelin, secretary-treasurer.

Perhaps you have noticed that the block "I" on the bill incklblk of tying has a bright new surface. Who did it? The dorm, club, of course.

Mr. Runsdall paid us a short visit last Tuesday evening and had a short talk with the boys. He suggested a number of improvements in the dining system, and also spoke a few words about football, urging the boys to devote more enthusiasm in that line.

Last Tuesday night after supper a number of sporting boats were staged by way of amusement, setting down an basis for the dormitory club and initiating the freshman. The principal event of the evening was the three-round bout between Lamont and Schmidt, which ended in a draw. Other contests of the night were: Harris vs. Landesback; Reed vs. Fredrickson; Sally vs. Oldham, and Knudsen vs. Alexander. All being judged drawn. There was plenty of pan and skill displayed, and a number of bloody noses and black eyes were acquired, and one of the boys suffered a broken nose.

It is interesting to note that the presidents of all four classes, the Ag and Mechanics associations, and block 7C Club are all dormitory residents.
FOOTBALL Dope

The opening of the football season has brought out some good material and as five of the old letter men are back it looks as if Poly's team is going to be a winner this year.

The material which is back will be a lot better than those of last year and this will give us more chance with the heavier teams in the conference and with the old Poly fight we ought to go right in. The team started right out with lots of pep the first night and kept it up and kicked it around.

The team is practicing from four o'clock each afternoon, with some exceptions, and they are putting in some hard work. Practice is from four to five o'clock, with the exception of Thursday, when they practice from four to six o'clock.

The latter part of the vacation was spent in Sacramento for a while, to finish up what he did this vacation he at once went to Los Angeles and the rest of his vacation was spent passing a great deal of his vacation with the local high school Tuesday, September 17. It was just a practice scrimmage and was not good enough to go right out with lots of pep the first night, falling on the ball, passing and kicking it around.

When Mr. Cunningham was asked the opening of the football season his answer was: "I toured California from one end to the other and did everybody I could see, but I was a little worn out after the six-weeks vacation."

Patronicize the advertisers in the Polygram. They are our friends.
