ASSEMBLY FEB. 27

The program for the Assembly of February 27 was a military program. Mr. Ricciardi was the chief speaker. He was a very able speaker, and his talk was very interesting to the students. The program was made up of the usual picture album so that the entire assembly could see how the faculty looked in its youth and mature years.

The program was a very successful one, and the students were very much impressed with it. The next assembly will be held on March 14th.

THE PROGRAM

Mr. Ricciardi energetically introduced the program. He gave an outline of the different events of the day and then went on to describe the different events of the day. He gave a very good account of the different events and the students were very impressed with his talk.

The program was very well received, and the students were very much impressed with it. The next assembly will be held on March 14th.

MRS. RICCIARDI WRITES

Mr. Ricciardi never will forget the character, body of Polytechnic, and it is beyond words for him to express his feelings toward us for the good that was given him when he left. He did all that he could for Poly and the resolutions given him were what he considered the reward for his hard and persistent work.

A letter, recently received from Mr. Ricciardi, shows how he appreciated the unexpected gift. In part, it reads as follows:

"The students trusted me with their secret, so I think they are interested in further news of their splendid gift to Mr. Ricciardi."

In the first place, I believe he never did anything happen which gave him more genuine pleasure than this concrete proof of the high regard they have for him. Truly as he values the friendship of each of you, it is indeed a source of greatest satisfaction to him to have this constant reminder of the pleasant time he formed at Poly.

Mr. Ricciardi was extremely proud of giving his gift to the students around the bay, but most of them declare they will not go out with any one equipped in such splendor, as the contest would make their old style lack too shabby.

The "mischief maker," as Helen was known around the campus, is now privileged to wear the nurse's cap and is using it constantly to go out Friday night.

THE DANCE

The Dance of the Blue Jill, Poly's乔丹, was held on February 27th. It was a very successful dance, and the students were very much impressed with it. The next dance will be held on March 14th.

Mr. Ricciardi Visits Poly

It didn't take long for Mr. Ricciardi to come back and see how things were progressing. He was very much pleased to be here on a day that he could not have all, he could not make it, and the result was that he made the real Saturday, Poly day. It was some of a business trip too, but he was glad to meet the students whom he had a chance to see.

Another Mr. Ricciardi who has charge of all the agricultural work in the high schools in this state, Mr. W. L. W., works under Mr. Ricciardi, and is at the dorm, and the same time, they were making visits to the different schools and farms in the state. He was able to follow agriculture work. Polytechnic has a very fine agricultural program, and Mr. Ricciardi stated that he was glad to be able to see the progress that was being made.

Mr. Ricciardi stated that he was glad to see the progress that was being made, and that he was very much pleased with the work that was being done. He said that the work was being done in a very efficient manner, and that he was very much pleased with the results that were being obtained.

THE PAST MONTH

Have you ever stopped to realize the things that have happened in the past month: of the great men whose birthdays occurred, and of whose death we mourn? It seems that time is traveling so fast that we overlook many dates that should be kept in mind. Thus, from now on, a column will be run in the Polygram under the heading, "The Past Month."

February contained some dates that are known to every American citizen and, it is safe to say, some who were not even thought of. The second month of the year has birthdays of four great men who are known all over the world. Who has not read "The Village Blacksmith" or "The Courtsmith," if he has not read from the pen of this loving man, who has passed his seventy-seventh birthday? If you have not read "The Transmitter" in the name given their paper and it is to be published this month: All present, their editors are small, but they are looking forward to the day when the mast can put out a larger paper and devote more space to justice and the innocent side of school life, in all that's good. The President of the Polytechnic School Press Shop.

THE TRANSMITTER

The student body of the San Luis High have taken another step toward the spirit of the school by publishing a school paper. This is their first adventure in this line for many years and much interest is being taken by the school as a whole. A good staff has been chosen and has already proved that they are capable of the work. The student body -founded that all the high schools should publish a paper and that was the way to show their everyday efforts. As shown by an editorial from their recent issue, all that is going on in the school will at work to do its best, we are bound to be up to credit and stand the test you can see in the paper. We congratulate you High School for the pep they have put on the news in your new endeavor. The student body has taken more interest in the school than they had the chance to think, in your school; and we trust you will enjoy the dish, as much as you can in your future issues.

For instance, what is Ground Hog Day? Is it true that on February 2 the ground hog emerges from its burrow and if he can see his shadow, he goes back to bed; but if he can see his shadow, he is thinking that spring is six weeks off? There's something to look into. Also, what is Arbor Day and why is it celebrated? We congratulate you High School on which to build. An account number over 2,500, so you can realize that the only thing that you kept in mind was the dance to be held that evening.

Aside from that, many historical things have happened in the month of February. The Philippine War began February 4, 1909, and the battleship Maine was blown up on February 15. Also, Jefferson Davis was inaugurated president of the Southern Confederacy in 1861.

In fact, February is a great month for our own state. California was discovered at Sutter's Mill in 1848, and six years later on the twenty-fifth, the capital was moved to Sacramento, where it stands. In 1918, the twelfth of February was the opening day of Panama-Pacific International Exposition, held at San Francisco, the largest fair that the world has ever seen, and is doing. Thus, why should Edison's birthday be overlooked? We congratulate you High School; and we trust you will enjoy the dish, as much as you can in your future issues.

POLY CHATTER

BASEBALL
A baseball schedule is being played between the different classes, and this has uncoiled as much or more enthusiasm as the softball schedule. The schedule started with the Sophs and Freshmen. This game was somewhat in a matter of the Sophs—take it by a score of 18-6.

The next game was a pretty close one between the Juniors and Sophomores. The final score was 9-5 in favor of the Juniors.

The next two games dropped the Freshmen out of the race altogether. The Juniors took them down the line to the tune of 30-8, and the Juniors beat them by a score of 11-4. There will be one more game to be played. This game will be between the Sophs and Juniors to see who will be the hardest game of all.

The next game of the interclass series was played last night between the Juniors and Seniora. It was an exceptionally good game and has decided the series. Each team fought hard for every run they got. There is a feeling on the campus that all the Sophs are going to the Seniors until the last inning and that the Juniors are going to win 5-3. The Juniors stationed a regular nine, minus one man, and played two runs, thus ending the game by a score of 5-4.

HANDBALL

Poly's 1934 Basketball season is over. Since our trip up north we have played three games. We lost two and won one.

On February 16, we took on the Santa Maria Junior College in a return game and won by a score of 42-24. The southern team has improved considerably since Poly lost them last season. They would not have been able to play them but even so Poly's score should have been much higher, pretty well up toward the century mark. Lack of practice and other factors caused a slowdown which accelerated the evening's play.

On February 16, the Santa Maria Legion hopscotched us in an interesting and hard battle to win the Winter Garden, journeyed back to their home institution. The score stood 27-25 when the final whistle blew. The sophomores! He conceived an eloquent demonstration of the phallic good should be in the part of the Legionaries and the phenomenal physical contours of their persons. It's too bad. Time after time Bundy and Rondow tried to break it but didn't seem to be able to break the defense.

But this defeat helped Poly in the return game with the Legionaries which took place at Santa Maria, the last night of February 20.

The Poly gang went down the line to the tune of 21-8 and that was to win, and the biggest game of the season. The final score was 22-22 in favor of the Green and Grapes.

The game was an exceedingly fast and exciting one. Poly's style had the Santa Maria's bewildered from the first tip-off. The poly-quad is the best that they displayed.

Bundy on Poly's high point netting nearly half the baskets scored for Poly.

Bundy stepped on the high point, netting nearly half the baskets scored for Poly.

Lumley also dropped the jinx that has hung for the last few years of Poly and the Sophomores. The combination was used at center to get the ball worked very well and polished to the Santa Maria gang exceedingly.

C. Pasquale and Frako worked an outright game at guard allowing the Legionaries to score but two points during the first half. The score at that stage stood 12-10 in favor of Poly.

During the second half Poly annexed 12 points in the last five minutes and succeeded in making the score 22-22 in favor of Poly's in the half.

The sophomores, each played part of the game and each made a quota for the Poly club in the short time that he was in the game.

BLOCK "P" INITIATES

The "Block P" initiation took place in the assembly on February 13. Everybody, at least the old Polyites, knew that some were ready to rest and laugh at the ones who were initiated.

Alfred Young had to break the ice by appearing with a rubber chicken showing, presumably with the idea of breaking the ice. Alfred Young opened the evening with a story on love was just a confusion of what everyone has seen on the campus.

POLY THANKED

Naming Coach Agostin and members of Poly's football team as an impor-tant factor towards the success in the team. Coach Neander's talk in the nature of a statement of appreciation was presented to the school.

The school football men were awarded their letters at that time and the championship pennant was presented to the school.

Coach Neander's talk was in the nature of a statement of appreciation and consisted of a great deal of praise to Louie Hixson on the gridiron last season in the many different practices had with Poly's team.
