CREAMERY OPERATING

The agricultural students have been glad to see the creamery, which has operation again. It is being operated for the manufacture of butter by the farm students on the same, along with a supply of butter and two electric motors installed. The students have been brought to the farm to make a tour of the re-frigerating plant, which has been completely overhauled and repaired and a steam boiler and two electric motors installed. The students have found much to do and all are interested in the creamery and plans for creamery work next term.

Several of the Agricultural students are making cheese for the Christmas party. They will have a large supply in the creamery on the morning of December 24.

The regular assembly Wednesday, December 12, was held in assembly hall. Faculty members present were Prof. Webster, John Comstock of Santa Barbara. Later in the afternoon the faculty had an open assembly at which they were complimented on the reputation and tradition of Poly's Thanksgiving celebration. The assembly adjourned.

Member of Faculty III

Dr. Webster has been seeing the students. He has been very active in the Santa Luis Obispo High School in recent weeks. It is hoped that he will be able to return to school as soon as possible.

Regular Faculty Meetings

The members of the faculty have begun having regular meetings for the purpose of discussing the various problems of the school.

POLY'S THANKSGIVING

Judging from remarks still heard about the campus, Thanksgiving Day at Poly was long to be remembered. The twenty or more boys who could not go home this year found a real "home day" for themselves at the Dinning Hall. The long table set for forty twenty-five with good things prepared by the students was served with fine appetites. Included four fat turkeys and all the trimmings, and cranberry sauce to plum pudding and ice cream.

Faculty members present were Prof. Webster, Mr. Teaman, Mr. Teaman, Mrs. Teaman, Mr. Teaman, Mrs. Teaman, and Mr. Teaman. These all shared in decorating tables with fruit, flowers and berries. Place cards with cutout conundrums on back were found at the places. The students gave an interesting talk on modern civilization, which the California Polytechnic School has throughout the state. Our own farm center, the Junior Farm Center in the state, will have to be a great success. It is hoped that he will be able to return to school as soon as possible.

The regular assembly meeting was held in the Student Assembly Hall, Dr. Crandall presiding.

The announcements were heard, after which Mr. Crandall gave a few words of advice. He urged more of the student body to attend the regular assembly meetings and have a permanent revenue coming in the club. Our own farm center, the Junior Farm Center in the state, will have to be a great success. It is hoped that he will be able to return to school as soon as possible.

No. 6

CHRISTMAS VACATION

"One more day before Christmas vacation, and then we can go home for Christmas! Boys! We won't have to study or do anything that we don't want to do. This can be heard once more, before the boys are off for a whole month and won't have to think of the school for a month before—well, just like we always do.

This get home will us and our little sisters and brothers so glad to see us back at the homestead. We have a warm welcome to meet us. We will be the first to get home and we will go horseback riding and we'll go to see our favorite dances. We will go to the town hall and see all the lights. We will find out all the news and all the interesting things that have gone on while we were away. We will have a good old country dance we love so well. When we get home we will enjoy all the good things that go with it. It surely will be a real "home day" for themselves at the Dinning Hall.

Some of the boys—some of them—are worrying a great deal about what girls like. That's a strange thing to be wondering about. Many of us are very interested in the why and wherefore. Of course, we can't see. Nobody could.

BASKETBALL

POLY CHATTER

POLY's basketball season began last week. With the proper support by the student body this should be one of our most successful years. As basketball season is just beginning it might be well to say a few words about the origin and development of the game.

Basketball, unlike many of our other sports, which have been handed down to us from the ancients, is a modern game. It was invented in 1891 by James Naismith, who at the time was an instructor in a gymnasium of the Young Men's Christian Association at Springfield, Mass.

The rules of this game are so rigorous that few games may be played outdoors. In the West even without basketball we could play at some sport without the weather's interfering greatly. The problem confronting Naismith was to fill in the time between football season and the snow was off the ground for baseball. The gymnasium would not be entirely a success unless this time could be occupied with some sport as the men lost interest in the work and also get out of condition during this slack period.

He decided that some game must be found which would keep up the fellows' interest and that could be played indoors. As this was before the day of indoor football fields, the court or playing field of this game had to be devised as to be considerably smaller than that produced by a field or a baseball diamond. The game, also, must be simple enough for the men who would not care enough about it to pay the entrance fee of installing whatever equipment was necessary for the playing. Neither could it be too rough or violent as it must be played indoors.

Basketball was the result. After many hours labor Naismith evolved the ideas and many of the rules. A great many more rules were added, however, after the games had been played a little at difficulties arose that were unforeseen by the inventor.

The rise to popularity of basketball was rapid. It soon became one of the most popular games and was soon a national game. It was played by not having to board Claude at the last minute when its members know the order and show some Poly spirit. So a Poly student has been limping about a great deal of late. Is this just the excuse to keep up Poly's athletics and it is the best made for the price paid.

The radicals in the Dormitory are doing very well. Soon it will be so an every day in every way the best made for the price paid.

What is wrong with Babcock? Elder took Belle home from the dance the next day...

Mr. Agostini: "My daughter is quite a musician.

Captain: '"What instrument does she play?"

Mr. Agostini: "She plays on the violinum."

She (just introduced): " Somehow you seem familiar."

Her: "Good heavens! I haven't started yet."

He: "How long is it since you were here last."

She: "Three husbands ago."

Marty: "Leta sit out this dance. I have a game knee."

She: "Well—er—how game is it?"

Capt. Robert (who had just fallen overboard): "Yell, you dumbbell! Can't you see that I am drowning?"

Marty: "Certainly! Captain! Rah! Rah! Rah! Captain!

Optician: "Now, tell me the letters on the first line."

Griffin: "Where is the line?"

Hills: "You nearly hit my girl in the face."

Babcock: "Alright, you can return the compliment."

She: "You look dreadfully cold over there."

Capt. Robert (who had just fallen overboard): "Icy. I am cold."

She: "About what time was it?"

He: "Who is that fellow that stares at you so hard when you dance with me?

She: "That's the chap that brought me to the dance."

Meet Me at the Stage Billiard Parlor
Ask Any Polyste
Conference Championship

Last Saturday saw the Chico State Teachers emerge with the "Sixth Football Championship" of the junior colleges. Chico put out a heavy team this year and won over the powerful San Luis Obispo College 7 to 0. Later on in the season, the "Bulldogs" position was strengthened more so by defeating the San Diego State Teachers 17 to 0, and then the Southern part of the state. The border college put up a strong team this year, and they ran up big scores for each of their opponents and defeated teams such as the Southern Branch and Redlands University. In our own central conference, San Francisco State Teachers put out a team with the Modesto Junior College a close second.

Sports

Dorm Doings

There have been so many new additions made to the Dormitory in the last few weeks. San Luis Obispo is a person lazy to keep track of all of them. The first addition is one of the most used, the pool table. Captains Duesel and Mr. Peroski made the old billiard table over into a pool table and they claim that the boys get the good job they did. The members of the Dorm Club are delighted with this table, not only for the fun they get out of it, but because of the fact that it doesn't cost anything to lose.

Another new addition is a nice brand new phone. One of the kind where it costs you a nickel to get the number, and then you have to drop in a twenty-five-cent coin to talk. The boys listen long enough so that you can take it out without being heard. At least that's what it seemed to be. The only way you can get a nickel in this dorm is if you get a job that "Poly" can learn to be an accomplished pool player.

Agricultural Projects

The Ag are not dead, as one would be led to believe from the lack of activity this season. Since the onion feed in the grove, several other facts and other means of instruction and financial gain have been developed.

The C.P. S. Junior Farm Center has acted as a unit and bought some of the very best hogs that could be purchased. Tulare Boy, the champion of Kern County, is now the property of the C.P. S. Farm Center. Several very excellent brood sows were also bought for the Farm Center; these in turn were race to individuals for profit work. Some of the boys have bought other sows from various sources and are now anticipating the returns from the steadily increasing price of pork. With the creamery soon to be operating and the abundance of butterfat, the feeder hogs can be exchanged by many of the boys and will not set some very substantial return.

A country dairy testing association has been organized and every week several of the boys will go out and test different herds. This will be of both instructional and financial benefit to the student. He studies various ways of dairying and learns about the industry from the practical side. He meets many kinds of people and in this way it is beneficial from the association the student has. This is not by any means a one-sided activity. At minimum cost the dairyman gets a thorough test of his herd and in this way paves his "star boards" and cues his herd.

The school is also benefited by the students going out. Any student who goes out on a project of this kind is a walking advertisement of the school. He talks to the men, boys and girls who are interested in school and Poly. If the student leaves a good impression, Poly is benefited and probably new students will come here to school.

Some of the boys have projects of another sort. They are planting crops of many kinds. Grains, vegetables and nursery crops are among the ones that are being grown. And the fellows that want a land project get the land, money and horses. Various trees are planted for the feed and the labor is given by the student. Huttering is another means of.instruction as several of the students spend most of their extra time butchering cattle, sheep and hogs. They butcher furishes instruction to the students and cheap meat to the cafeteria.

In this project the practical side is not overlooked. The boys draw a picture of his land etc. This gives him a knowledge of the animals and anything else that he may have for sale. The methods of marketing and selling are then studied over by the project method that often brings phrases like "Tell me what you know.

Boys Take Auto Trip

Ivan Reynolds and James Warford motored to Marconi last weekend to visit some friends. They returned Sunday night.

Basketball Practice Started

The Poly cage squad swung into the season's first practice last week. Arrangements were made to use the Winter Garden dance floor for practice this season. Although this is not at all as convenient as having a gymnasium floor of our own to practice on, it is very much better than practicing on the ground of the outdoor court. Sixteen men reported for practice the first night. We have only one letter man back this year. He is the captain of the team, Walter Grady. Around him Coach Aigall must build a new team. The material for a team this year looks pretty good. For one good thing the team will have more competition in town this year than before. So far three teams in the city have been heard of - the San Luis High School, the San Luis Athletic Club, and the Hi-T.

As far as can be ascertained at the present, the Poly peasants will meet the following teams this season: Santa Maria Junior College, Santa Barbara State Teachers College, Fresno State Teachers College, Modesto Junior College, Santa Maria Lagron, Paso Robles, Alumni, and Arroyo Grande High School.
