Multitasking: the Age of Machines

This is an age of machinery. It is an age in which to make or machine is a way of living. It is an age in which every man and woman has to be a machine or run the risk of being a machine. It is an age in which the scientist has come to the front and the engineer has taken his place. It is an age in which the people living at that time discovered the use of the particular metal, took advantage of its opportunity and developed a new use for it. By doing this they increased their standard of living, though it was a difficult and laborious task.

The machinery of government is a fine example of the age in which we now live. There have been many changes in government since the days of ancient Greece and Rome. The machinery of government is a fine example of the age in which we now live.

It has taken a great many of these ages to reach the present time. We now have both mechanical and mental machinery. If we were to go back to the time of the Pharaohs, or even to the time of the Romans, we would still be trying to use their machinery. However, we are now able to use our machinery more efficiently and use it to our advantage. We are able to use our machinery to improve our standards of living, our health, and our education.

It is not true that we know many things and have made much progress in the last years, but looking ahead at what we can expect in the future, we can be confident that the wonderful things that are to come.

The time we are now living in could be well termed the Machine Age and it is but its very beginning. We think we know many things and have made much progress in the last years, but looking ahead at what we can expect in the future, we can be confident that the wonderful things that are to come.

Our minds are ready for the next step. They are ready to learn more in order to make the best of these machines and tools. We are not just sitting back and waiting for the machines to do everything for us. We are using our minds and bodies to improve these machines and tools.

Our minds are ready for the next step. They are ready to learn more in order to make the best of these machines and tools. We are not just sitting back and waiting for the machines to do everything for us. We are using our minds and bodies to improve these machines and tools.

SPORT BRIEFS

Our baseball diamond is in good shape this year. We hope to have our school hours during their usual schedule. Interclass baseball will start soon after the Interclass track and field meet.

Two college teams will leave the California Coast Conference, of which Poly is a member. After completing their present track and schedule, the Fresno State College and the College of Pacific will join the new Far West Conference composed of the following colleges: University of Nevada, University of Arizona, St. Mary's College, University of Santa Clara, College of Pacific, California Aggies and Fresno State College. Both Fresno State College and College of Pacific put out championship teams every year. They were members of our conference.

Our tennis stars, Babrock and Eiler, have a match now with the high school which is not yet completed.

The Pittsburgh Pirates are training in the spring quarters at Paso. Kibbe now.

Bill Lee, our long distance man, makes so many circles around the track that a person gets dizzy watching him and he is not yet finished.

From the showing the Freshmen made last week in fixing up the track, it looks as if the Sophomores will know of their obligations and duties. Perhaps if we had an, undergraduate council or court and informed the Freshmen of the obligations and duties, of the blue laws and school traditions, more of the team will come through with good sportsmanship. However, the Freshmen are among the Freshman, and there are also different methods of handling such cases. Is there too much paternalism toward these school and campus? Are the Freshmen, spannered and parcelled and allowed to get away with anything they fancy? Those are questions to be discussed.

Next Track Meet

The Pits Track Team will journey to Santa Barbara next week to take part in the Second Annual Invitational Track and Field Meet to be held by the State Teachers College. Fifty-seven medals will be given, including first, second, and third-place medals for the relay. The medals are of gold, silver, and bronze, and are tied with attractive red, white and blue ribbons. Some of our underclass athletes ought to have a good chance in bringing home some of these medals back with them and chalk up a little more points for the Green and Orange.

After Theater Let Chocolate Den Be Your Hobby.

NO POLY-FRESNO BREAK!

The report has been drifting about town lately that the California Polytechnic School and the Fresno State Teachers and Junior College are no longer on friendly terms, due to the fact that the California Poly canceled two basketball games between the teams because of the illness of two of the Poly players, and could not avoid it.

As evidence of the untruthfulness of this report we offer the following letter, received from Mr. Agusti from the Fresno track, and which is self explanatory.

"February 28, 1925, Mr. A. P. Agusti, Calif. Poly, San Luis Obispo, Calif. Dear Agusti: Would like to know just who spread the news that we had broken relations with your school for the cancelling basketball games. Personally we were very much pleased that you did as it relieved us of a heavy financial obligation, and we were able to fill this open date with a team at home and should have written you sooner but have been laid up with an infection and it has been just about all I could do to keep out of bed."

"The report given to the newpaper about this time was to the effect that we had definitely entered the Far West Conference and schedules were then completed and no new relations would be entered into with several schools we have been competing with, and this was the only thing I saw printed in the local papers. If you received the letter you received was to the effect, for we two broke relations with anyone. I believe this is a bad policy. We are counting on you to send a track team to the Conference meet on May 2nd and as Relations they are held in Fresno on Thursday, no doubt several of the teams will come in advance and watch this great event. We are planning to have our real track meet should be put on, nothing like last year.

"Well, Agusti, I trust that this clear any misunderstanding you might have, and that we will see you and the Poly-Fresno Team shot and turned in the following score: L. Erwin 95, R. Anholm 86, I. Reynolds 78, and Leon 84. The total score for the team was 356 out of a possible 480."

"We are counting on you to send a team here at home. I should have written you sooner but have been laid up with an infection and it has been just about all I could do to keep out of bed."
