Dissertation on the Cow

The cow has four stomachs. The raw material for milk comes from the lower part of a liquid called milk, provides the raw material for milk comes from the lower part of a liquid called milk. The cow's stomach is divided into two main compartments. The reticulum and the omasum. The reticulum acts as a sorting and preliminary digestion chamber. The omasum is where most of the digestion and absorption of nutrients occur. The abomasum is where the final digestion and absorption take place. The cow's digestive system is adapted to processing large amounts of grass and fibrous plant material. The cow's rumen is the largest compartment, and it is lined with millions of bacteria that help break down the fibrous materials in the diet.

May Day Picnic

Friday morning at the end of the fourth period, the whole school joyfully swarmed up the main plants of the various gasoline engines about the campus and set sail for the picnic grounds to hold its annual May Day Picnic.

A committee had been set out early in the morning to prepare the spot for the hungry crowd; so when they arrived they did not have long to explain directions and instructions.

The cows were plentiful and everyone had his fill. And the ice cream was fashioned by the faculty.

When the big food was over, nearly everyone wanted to seek some study spot and go to sleep, but some had energy enough to play baseball. A game was started between the faculty and the students, and, as usual, the faculty were so as to win all their games.

Besides the baseball game there was a friendly football game in which the football suffered a repulse. One player gave it a kick which sent it flying into a pool of crude oil. A funeral was held.

Baseball and football were not the only diversions. There were many walks of two and four who went for a walk on the beautiful hills that surrounded the picnic grounds.

At three-thirty the picnic broke up and the students returned home in their respective gasoline groups. The picnic has been held annually for the last five years. It is something that is looked forward to with great anticipation by all.

Barn Dance

The Barn dance was the most enjoyable part of the day. The dance was beyond words. A game of house was played, and the house was burned. A game of house was played, and the house was burned. The dance ended with the last dance at eleven o'clock. The lights were turned off, and everyone went home. The dance was the most enjoyable that has been held this year and is something that is looked forward to every year.

Alumni Notes

Dick Wilson, alumnus of the Class of '21 and a well-remembered all-sports man, landed a keen job in a short while back when working on a farm near Menlo Park. After finishing his education, Mr. Wilson entered the Postal Service and is now living in San Francisco. He has always remained his father's friend, and in his spare moments he is now living in Santa Barbara.

Will C. Wood Visits

The Hon. Will C. Wood visited the school Monday, April 29th, and expressed his pleasure at the improvements.

He had been planned to have Mr. Wood as a guest at the school, and a letter was written to him expressing our cordiality. He replied, and a letter was written to him expressing our cordiality. He arrived in time to attend the assembly in which he said that never before had he seen the school in such an excellent condition as it is under the present administration and he complimented Dr. Connell on his successful work.

Assembly April 27

Owing to the failure of the Block "E" to have their assembly ready and there being no other entertainment Dr. Connell gave a very interesting report of the Principals' convention recently attended.

Electric Shop

The classes in Electric Shop, under the direction of Mr. Ward, are being well executed and the theoretical essentials of direct current are being worked out. The students are producing a first-class current into the latest beginnings. This class consists of those men who have already made a thorough study of the elements of direct current. Mr. Knowlde, an expert in this line, is teaching the students the practical applications of direct current. This work is preparatory to graduation, usually to thoroughly acquaint them with the theory of operation of the former types of apparatus they will have to work with.

The new course equipment has been added this year, several new electrical instruments and apparatus, among others, have been added. All of these are being used for practical work and for the students' own experiments.
What must a man do to be a success? That question is asked all over the world and the answer is many.

The most general answer to the question is: "A man who has contributed something to the world.

They find among many famous men that the world in the line of electricity than to study five hours one day and loaf four days. The same principle study an hour every day for a week about; their worry is past. Those who fellow student staying home every night and then wonder where all their time went eventually he gets to laugh at them and..."

San Jose Loses to Poly

In one of the most thrilling ball games that has ever been played on the Poly grounds, Poly Mustangs downed the San Jose Trojans with a score of 7 to 6.

Poly team did some very good batting but almost lost the victory to Thornton Lee. Thornton hit the best pitch that Poly has had for years and he surely proved his worth to the team. Graves opposing batters fan the air and retired without a hit. The hit that was made didn't amount to much either because thePoly support given by the other players.

The lineup for Poly was as follows: Isola, c; Lee, p; Sparks, h; Gingg, 3b; Graves, ss; Baxter, 2b; Zanolli, 1b; Reed, rf; Traver, cf. Thompson went out on a high one to right.

Zeke, a fast pitch, and Thompson saved by Graves's effort as Thompson scored the first tally for the teachers. Soda was caught at second.

Kwan took the call on first base. Thompson saved by Graves's effort as Thompson scored the first tally for the teachers. Soda was caught at second.

Lee and Sparks. Thompson whipped the atmosphere for the teachers. Riding on the heels of the Poly第一节, 1b; Polytechnic 2b; Zanolli 3b. Zanolli drew three strikes, Wade, 3b; Torey, 1b. Wade and Torey were safe on a fly to center.

Baxter was safe at first, another safe call by the empire. Thompson saved by Graves's effort as Thompson scored the first tally for the teachers. Soda was caught at second.

Lee's eighteenth strike-out. Baker went out on a high one to right. Baker was safe on a sacrifice. Polytechnic at third base.

Baxter was safe in the box. Baker went out on a high one to right. Baker was safe on a sacrifice. Polytechnic at third base.

Baxter was safe in the box. Baker went out on a high one to right. Baker was safe on a sacrifice. Polytechnic at third base.
