THE SWEETHEART OF THE CAMPUS!

California Polytechnic's prize Jersey heifer pictured above not only won honors in her home state, but "knocked 'em cold" at the National Dairy Show, recently held at Saint Louis, Missouri, where she was one of ten members of the California State Herd which: out of the herds entered by ten-state-states, won four honors.

The Jersey's no porker, but she surely brought home the bacon!

Captain Deuel Sponsors J. C. Dorm Dit-Dah Club

Fifteen students in J. C. Dorm are taking lessons in sending and receiving codes. They met on Monday night, November 17, in the day room. They have formed a club known as the Dit-Dah Club. This club is sponsored by Captain Deuel for students of J. C. Dorm only, and membership is limited to fifteen students.

The club is divided into three groups. Group one consists of students who can send or receive more than ten words per minute; group two consists of those who know the codes, but are not able to send or receive more than ten or more words per minute; group three consists of beginners. They will meet every night for forty-five minutes with the exception of Friday and Sunday nights.

Captain Deuel said, "Code is very useful, and a person who knows the code and is able to send or receive at a good rate of speed stands a good chance of being drafted long before others. I hope that there will be more enrollees."

"All That Blisters May Be Poly-Y to Send Delegates -"

Pays Visit to Our Campus

Dr. Nicholas Bicfontv, Chief of the Division of Secondary Schools of California, was here last week. During his stay he interviewed a number of students to obtain data of various kinds.

Bicfontv was president of the California Polytechnic during the school year 1930-1931, and half of 1931-1932, serving as mid-year at Los Angeles to accept a state position in vocational educational work.

Compare These Figures!

The Massachusetts Institute of Technology charges a fee of $600 tuition, and that, for fee, be raised to $500 next year. There is no dormitory required. The estimated minimum cost of a year at school there is $1200. The estimated minimum cost of a year at California Polytechnic is $525-including uniforms.

The Massachusetts Institute of Technology figures for finishing costs in its estimate. General figures for finishing costs in its estimate. Students are asked to notice that both estimates are minimums, or approximate costs of the least possible amount on which a student can attend for a year.

(If it is, of course, possible to spend more money in other places.)

No More Waiting Turns For Lathes in Shops

A brand new lathes was installed in the shop of the aeronautics shop. It is not quite as large as the one in the old shop. It was large and was hung with many tools, but will do the job well for many years to come.

The Polytechnic Heads Attend Conference to the North

Dr. Crandall and Miss Chase were sent most of last week in the Berkley, California, area, to attend the Junior College Conference of the State. Mrs. Crandall went to Berlin to visit friends.

Unusual Polytechnic Stock Exhibit Ready

Carload of Pure White Shorthorn Steers To Be One Feature.

This year California Polytechnic will have an unusual stock exhibit at the San Luis Obispo Fat Stock Show, to be held November 26-28. This special exhibit will be the result of years of careful breeding and will be shown by Albert Keller and John Culbertson. The Herefords came from William Randolph Hearst's ranch at San Simeon.

Jim Bogert will exhibit six Devon steer which he purchased from W. K. and H. H. of San Luis Obispo. Shorthorn steers will be shown by Albert Keller and John Culbertson. The Herefords came from William Randolph Hearst's ranch at San Simeon.

"Babes" Show Amazing Gain in Average Weight

The poultry department seems to be getting some good results with baby chicks now under the hens in the student brooder project. There are two brooder projects with a total of over 2,000 chicks contained, totaling 150 eggs, or about 3.3 eggs per chick. The young men take one week to five weeks, and show considerable progress. The eggs are raised from 200 eggs at three weeks of age, averaging 250 eggs per group, or over two eggs per group for the standard for that age. This is a gain that is seldom obtained by chicks at this age. All of the projects are showing low mortality and are being raised to come to the sale at the age of twenty weeks.

WHO'S WHO IN THE CLASSES

JUNIOR COLLEGE

C. H.
President—Phillip A. Hine.
Vice-president—Harry Haines.
Secretary—Harry Haines. Instructor—L. C. J. C.
President—John Hine.
Vice-president—Harry Haines.
Treasurer—George Brokmil.
Other members—W. E. Paynter.

UNDERGRADUATES

C. H.
President—Bill White.
Vice-president—John Carter.
Secretary—Charles Flinn.
Treasurer—Charles Flinn.

S. H.
President—Clarence Elliott.
Vice-president—L. C. H.
Treasurer—Merle Waterman.

S. H.
President—Starr McLean.
Vice-president—Frederick Hopkins.
Treasurer—Frank De Forrest.
Treasurer—Richard Hill.

OPINIONS OF OTHER EDITORS

"Put your studies first; and that for three reasons: first, you will have a better time in college. Hard work is a necessary background for the entire campus. Second, after the first three months you will stand better with your fellows. At first there will appear cheaper roads to distinction, but their cheapness depends upon it. Second, after the first three months you will stand better with your fellows; but, you will not get their respect without showing that you can do well something that is intellectually less distasteful to their taste. What you want is a certain degree of success."

"In any line of endeavor, there is always a certain degree of doubt as to its actual worth—as to whether it will prove a benefit and an advantage.

That is one of the prime obstacles that a new industry, new thought, new development in the social or scientific world must face. It is, in one sense, a test that is in no way announced to the industry, but nevertheless put before them in the form of public sentiment.

This hard, cold-hearted obstacle is, in one sense, a good human characteristic; and, if surmounted, this new industry or new development will be recognized with greater enthusiasm than if it had not been long foreseen as a "poor fad" to run into.

It has been with this comparatively new development of Poly, the building up of the working out of first-class work, the Department of Commerce recognizes as a place where first-class work on rebuilding and overhauling ships is done. They know that they can depend on us."

WHAT IS YOUR LIFE'S WORK?

"For some students the future life's work is easy. Many are specializing in certain fields of work, while others are wondering. It is good to wonder about your future; that's the only way to speculate, wishing, and hoping. But others are wondering.

The Lounge Lizards Smother Polocats

Line Bucks and Running Plays Too Much For Deuel Polocats.

The Lounge Lizards completely outplayed the Deuel Hall fellows for the entire game and went on to beat the Polocats in the first half by the score of 21 to 0. In the second half, both teams seemed to be quite evenly matched with neither having a distinct advantage in points. At the end of the first half the score stood 1 to 0 in favor of the Town.

The Lounge Lizards, in the second half, completely outplayed the Deuel Polecats and won the game with a score of 21 to 0. The Town Lightweights played the Deuel Dorm Polecats for three quarters and then went on to beat the Polocats in the fourth quarter by a score of 16 to 0. The Warden, Town guard, caught it and convert and it was six to nothing in favor of the Town.
