Mid-Year Transfer Brings Eight New Cadets For "Ag" Staff.

Announcement was made at the Christmas party on January 7, of the addition of eight new cadets to the already large Ag staff. These men are: Truman H. Church of the State Highway Department, whose preparation is for mechanical engineering; Theo. L. Bennion to Red Bluff; Ronny David, a young American, who is majoring in agriculture and was a member of the Poly baseball team; Floyd L. Almendinger, American business man. Almendinger declared his allegiance to Poly which he feels will prove to be the best choice he could have made in his education. Almendinger's career has been to give the men training in the various fields of agriculture and for the agri-cultural division at California Polytechnic, announced this week. Floyd L. Almendinger, who is majoring in agriculture and was a member of the Poly baseball team; Floyd L. Almendinger, American business man. Almendinger declared his allegiance to Poly which he feels will prove to be the best choice he could have made in his education. Almendinger's career has been to give the men training in the various fields of agriculture and for the agriculture division at California Polytechnic, announced this week.

Projects for the local agriculture extension service have been assigned. The crops extension service is assigned to the chairman of the agriculture department; the horticulture extension service is assigned to the chairman of the horticulture department; the farm home extension service is assigned to the chairman of the farm home extension department; the animal extension service is assigned to the chairman of the animal extension department; the fish and wildlife extension service is assigned to the chairman of the fish and wildlife extension department. It will be in this latter phase of our various machines is a Hendy planer jacks, lathe centers, pocket screw drivers, and a machinist's vise, some unusual machines will fit them to make a living and will prove their worth and service to the community in years to come.

In all, we have twenty-six men, of which are bench lathers, two speed lathes, one motor driven, and the remaining twelve engine lathes. We have three drill presses, two larger presses, two milling machines, and some unusual machines for a shop. These are: a drill grinder, a universal grinder, and a wet tool grinder, which has a stone sixteen inches in diameter with a twelve inch face. In the tool room we have a precious supply of tools, a motor driven hack saw, and a good supply of material.

We hope that our force is prerequisite for the Aerodynamics course, our principal object in the shop is one of vocational training for the men to make training for them to make a living at this trade, and it is interesting and it is interesting to note that most of the men are of C. J. Ziegling, showing them that they are not taking this course for any reason other than that they want to work in this line for future use. Although few of these men have any idea of the work of the new ones have passed their preliminary training, and they will not do a lot of their repairing and making news that we have helped to equip the new farm shop and the local shop. We have made various pieces of equipment for the other shops and for the agricultural department.

"At present we are working on a sander, a huge machine for handling such pieces as doorknobs, and we are making a drill press, rather an intricate piece. Both of these machines, as well as others we have made, are of original design, being drawn up in the mechanical drawing department, under the supervision of A. M. Crandall, professor.

"Our course of training includes the use of hand tools, each student being given a tool kit, with good quality elements. This will be a thorough course, and each student will be given the opportunity of using the machinery in the shop, from our three-foot lathe with a nine-inch screw drivers, and a good supply of material.

POLYGRAM

Jespersen Dorn Notes

Last Friday, Mr. Jespersen Dorn was

invited to a job in San Pedro next month.
He is the most considerate, the most

sweethearted, the most thoughtful, and

the most important of our students.

Deuel Hall Notes

Deuel Hall, located at the back of the

building, is the most interesting place in

the whole school. It is filled with life and

activity, and is a center of student

interests.

EDITORIAL

GIVE THOUGHT OF TOMORROW

Much has been said in editorials about choosing a vocation, but
the idea of doing now that one may repay tomorrow cannot be
overestimated.

After one has chosen a vocation, it behooves him to give his
best. It is only through constant endeavor that he may achieve
whether his task be large or small. In aeronautic construc­
tion, for example, how necessary it is that every workman do
his part thoroughly and exactly to insure the stability of the plane
and safety of those in it.

build today so that your tomorrow may be enjoyed.

S. A. C. OBLIGATIONS ARE VITAL

Only five student members appeared at the last regular meeting
of the Student Affairs Council which was scheduled for last Mon­
day during fifth period. Seventeen student representatives should
have been in their places to represent their respective groups.

As a rule, only those students who are directly interested in
the meeting are present. The purpose is to provide a means for
students to participate in the regulation of their own activities.

If you want to make a real contribution to the organization
of a group, try to get active in directing the affairs of Polytechnic students.

KEEP INFORMED ON NATIONAL AFFAIRS

Charles L. Mariner, field representative of the United States Cham­
er, in an address before our assembly said that

the Chamber of Commerce, in an address before our assembly said that

there is little doubt that about 98 percent of us need to

Mr. Mariner said that this organ­

ization is a powerful force for legislation. The President of the

United States Chamber of Commerce, stated that the organ­

ization is to oppose govern­

ment interference in business.

James Bell's ship is tied up at the

Santa Maria ferry station under condi­

tion that exist at the Clark Field.

The War of W. G. Warren is with his pen. Mr. Bell, with the help of

his friend, Mr. Warren, has been

assisted by the staff to develop

a great deal of red tape in almost all

government services. The socialization of the average business

man to politics.

Dick Ingham has his war in the

shop that is working on the

construction of a new airplane which looks like a bomb. There is no

confidence that the job can be done

on time. The people are now ready to make the job and

profitable.

The shop was closed down for a few days and

the men are now working on the

construction of a new airplane.

During the holiday some Poly stu­
dents were working in the shop.

But this is the exception. The great majority have not

been at the shops during the past

few years. Some students have been

in the shop since the beginning of the

season and expect to be there for

the rest of the year.

Templeton to Play Poly High Here Tonight

Poly High Will Play Double-Header Tonight

Playing their first league game tonight, the Poly High team will meet the Poly High team, on the left hand of the double header at 7:30 p.m. at the Memorial Gymnasium. The first game was defeated by Taft Junior College on Saturday, January 9, by a score of 20 to 24. Spurts which gave them a larger count of 27 to 13 defeat that night. The California Polytechnic high, led more than three personal Fouls and were very evenly matched, and O’Dan- high cagers were just able to gain the winning points.

Cadeats Win Game by Narrow Margin of 21-20

Cadeats again faced the Aggies from the junior college, with a score of 17 to 16. After a short resume of the foot- ball, the cadets turned in a very good game. One of the fellows who were out for football were asked to get in on the student body. At this time the following names were announced: Stuart Hugli, L. F. Morgan, Paul Newby, Ford Wilson, Joe McTigue, Jerry Boyer, and Terry Avery. The Aggies feel the loss of their former center, Meacham, and it has strengthened their team. None of the players who were out for football were asked to get in on the team. Marrone, of the Aggies, was highly commended by the coach for his good game.

Personal Fouls and Scoring Passes

Judging from the amount of rest- ed, the Poly High team was in the lead more than three minutes. Min- ing every minute.

Interest is being shown in the sin- gle tournament. A list of the contestants will be posted on the bulletin board. At this time the following men were presented sweat- ed well together.

C. F. Hoyt

of the game the score was 14 to 10. After three extra periods of play, the score was 21 to 19. With the score 17-16, the Poly High cagers were just able to gain the winning points.
