FLYING WING WORK BEGINS

Mr. McKellar's Dream Ship To Be Rare Design

Awaiting only the completion of the "Vikyack" Racer, a trim alumi­num monoplane, the plans are afoot to build under construction in the "Flying Wing" designed by J. D. McKellar, aeronautics in­structor.

"The Flying Wing," so called because of its novel design and high performance, is being built to attract air-minded persons in the low price field. The only designed craft to be powered by two Continental A-20's (50 horse­power) engines, and is estimated to fly 200 miles per hour. Other features of this newly engineered craft are: the absence of vertical fin and rudder, eliminating a saving in construction, and a lifting body design maneuvering being done entirely through the ailerons. It is expected to be a plane of great performance and will be an ideal training plane. Douglas DC-50 skyliner, will be used for instruction. The control which will greatly reduce the drag on the ship.

Intensive Control System - The main feature of the "Flying Wing" is the system of control of the plane-the trim control system is the control system. It is a control system of the highest design. The engines department recently finished the installation of the new system which is a combination of engines running over the hill on the north campus, the "Flying Wing" is a real beauty spot when finished.

Governor Speaks At State Dinner

Friday night Governor Frank F. Merrill spoke at the dinner which was held at the Poly Cafeteria. A convenient entrance and an in­teresting system of street lights to beautify the classes of the landscape department. The north entrance is almost finished, the proceeds of a highly successful yard sale on the hill on the north campus.

Beautiful Campus Landscapers Aim To Beautify The Campus. The "Flying Wing" is a part of the campus. The landscape department is going to beautify it by plant­ing trees and shrubs which will be the property of the student associations. The second year student associations are flexed from courses in the college, and may work on the project.

Dorm Casaba Meet Started Late Night

Great interest is shown in the coming intramural basketball tournament, which started last night. The opening gala of the tournament was played between the National league teams from the Coast and Desert, while the sec­ond game of the same evening was played between the American league teams of Loma and Jef­ferson. Happy results of both games are reported. Every year this group has two students who may work on the project.

Hermit's Chance To Join exclusive Club

A. C. Dept. Receives Equipment As Gift

The Poly gymnasium has passed the rumor mill that a new exclusive organization is in the early stages. This new club, it is rumored, is to be composed of the members of the Poly gymnasium. The organization is gaining an order and if he does receive the card, he will have the right manner of a bell or busser to serve the mission. You have been able to uncover the mystery of the organization at Poly gymnasium. You have been able to uncover the mystery of the organization by the name of the Poly gymnasium. The organization is called the Poly gymnasium. The organization is named the Poly gymnasium. The organization is called the Poly gymnasium.
IT SEEMS TO US

There often falls upon the shoulders of the editors, the unwonted duty of informing the general public as to just what goes on behind the doors of an institution.

It was our privilege to sit in on the recent meeting of the Student Affairs Council of this school. The business at hand was not of the most pressing type perhaps, but nevertheless it was the sort that concerned the whole student body. It seemed to us that there was a very marked lack of planning in the transaction of the business. The meeting left the impression of being almost superfluous. There was an astounding lack of parliamentary procedure or organization. No one explained definite reasons for his actions. It is our opinion that a body of representatives who are selected to control the extra-curricular business of a college of this size would have some semblance of a governing board.

"Pass the buck," seemed to be the omnipresent byword of everyone and initiative was sadly absent.

It may be only our illusions, but the governing body of some of the other future American business men should be qualified to sit in a responsible capacity. You, the students are the ones affected, and it is only democratic that you should know the what and why of the activities of S. A. C. meetings.

As a justification to your interests you should inform the administration from your department as to the policies and desires of the individual students. It might be of importance for you to learn just who he is and make his acquaintance.

SO CLOSE TO THE FOREST

Yesterday as I was standing in line in the cafe I "accidently" overheard two fellows discussing Thanksgiving: it seems that they could find very little to be thankful for outside of the fact that they were going to school and having a good time. Perhaps the reason was that they were so close to the forest that they couldn't see the trees.

We often find this the case, we take too much for granted and do not appreciate the things that come our way. The fine food we have here is a case in point. How many of us realize the hard work and the great amount of money it takes to keep the organization functioning. We have here the only school of its kind in the entire state and one of the few of the nation yet it is taken with a grain of salt and we pass it off with, "Yes its a good school all right."

We have much to be grateful for in the mere fact that we are still here, could four free college house and social perceiving. As we read the daily papers we cannot help but feel guilty at the state of affairs in many foreign countries. War and the spectre of war is the citizens in a constant state of unrest.

There be but a few of the things that we should be thankful for. Every individual has personal gifts that he alone is capable of expressing. It just takes a few minutes to stop and think how fortunate we are. The simple fact that we are in a paradise that is populated by beautiful girls should mean much to us. What was that you said?

**MUSTANG SPORTS**

**DONLETS BOW TO MUSTANGS**

Poly Shows Great Ball Playing By A Score of 18-6

BY JOEL COHEN

The University of San Francisco defeated Poly, 18-6, in the latter team's homecoming game to improve to 3-3 in the San Francisco football league.

It was a game of utilis, wild passing, bad bounce, and goofy signal calling, generally interpreted by Poly's 64-yard punt, a mighty good exhibition for the Poly fans from season opening.

The first Mustang touchdown was set up in the second quarter by a fine break from off the Poly's 18-yards line which bounded directly back, just 30 yards into back-Kawamura's waiting arms. He collected another 10 to the Poly's 45-yard line before he was tackled by H. A. five yard marker.

The Mustangs produced the willies by carrying the ball right up to the San Jose 10-yard line, in the first half and scoring.

Early in the second half when Poly failed to get the first down, Elmer Tognettl, the San Jose fullback, waded over for a touchdown, which will be held soon after Thanksgiving vacation. This play, will determine the winner of the tournament, and also the winners of the various individual awards. It is therefore vitally important that all normals be prepared to give their all in this deciding contest.

Game Feeling of Jesupness, high-point man of the meet when he captured two firsts and a second for a total of 10 points. Bondino of Deuel and Dalatrom of Chase were also high with 9 points each. These events and their winners were as follows:

Yards lost from scrimmage 70 12
Yards from passes 50 54
Yards from penalities 10 10
Yards gained 120 100
Yards from screens 32 32
Yards from punts 7 8

The average cost of outfitting a college football player in 1956 was $720.

**DEUEL DORM LEADS INTRA-MURAL SWIM**

The second and final evening of the swimming meet was held on the evening of November 9. After a great deal of noise, excitement, and commotion, the scores were calculated.

Deuel Dorm maintained a strong lead by ringing up 35 points, making their total 60 points.

Chase was in second place with 54 points while H. R. was third with 48 due to inability to compete in many of the events. Chase Hall still hold down the center position.

The meet being made for a long time, it was decided that there will be held soon after Thanksgiving vacation. This will determine the winner of the tournament, and also the winners of the various individual awards. It is therefore vitally important that all normals be prepared to give their all in this deciding contest.

Bjarne Foiling of Jepperse, high-point man of the meet when he captured two firsts and a second for a total of 13 points. Bondino of Deuel and Dalatrom of Chase were also high with 10 points each. These events and their winners were as follows:

Yards lost from scrimmage 70 12
Yards from passes 50 54
Yards from penalities 10 10
Yards gained 120 100
Yards from screens 32 32
Yards from punts 7 8

The average cost of outfitting a college football player in 1956 was $720.

**MUSTANGS ROMP TO EASY 26-0 VICTORY OVER SAN JOSE FROSH**

Running up an impressive total of 10 first downs in 6 quarters, Poly's vaunted power machine routed over the San Jose State Frosh 26-0, as the Mustangs poured a number of touchdowns in a first half battle on the Poly field Nov. 9. The Poly outfit scored in every quarter of the game and at no time was it seriously threatened. Chalkepelling on a San Jose fumble in the first four minutes of play, the Mustang aggregation pushed it on, going 31 yards in 8 plays to score, with Joe Blumbough, hard hitting fullback, smashing over the last six yards to pay dirt.

Elmer Tognettl's shadow-like swathiness swelled the total when, upon crossing doon's point, by several hopped 47 markers to score in the second frame. This was the second score on a brilliant off tackle cut from the San Jose twenty, to the two Phil Lundy cleared over center for the tally.

The final digits were hung up late in the fourth stanza via the aerial route. Tognettl tossed a perfect strike to George Svet for 20 yards and George trotted over in the 2nd to cross the goal. Tognettl split it in the uprights to end the spree for the evening.

**CAL TECH, REDLANDS ARE TENTATIVE FOR “39” SCHEDULE**

O'Daniels and Cooper Return From L. A., Southern Conference Friendly Toward Poly

Head Coach Howard O'Daniels and George P. Cooper, Jr., both on the various footballs in the southern counties in an effort to obtain two four-year colleges to fill the vacancies left by the cancellations of games with新鲜 grid opponents.

Most of their time was spent in attempting to arrange games with teams on the Southern Conference, and the conference is made up of schools as, Redlands, Pomona, Cal. Tech., Whittier, and Occidental. Games were tentatively set with Redlands and Chi Tech, although the outcome will be decided by the conference meeting called for December 1st. There is a conference ruling that no team shall compete with any college using freshmen in varsity competition. This late State Tech inability to compete makes an exception in their case.

**DIFFICULT TASK**

Most of the conference teams have a six-game schedule of which four are conference games and usually two are traditional non-conference opponents. This means that getting on their schedule is a difficult task. They all have to get acceptance of their school and were willing to meet in the Mustang aggregation. A satisfactory arrangement could be worked out with the institution of these conference committees. They were more urgent than than were available dates on the State Tech calendar.

According to Cooper, the Santa Barbara State grid lineup was compiled of 100 per cent of the original Southern Conference teams. Most of the four-year colleges started for the regular season, it was stated.

History tells us that the Greaves of Santa Barbara State grid was the small way back in 1900. B. C. They called the game "Harpooner."
Sports Column

BY JOEL COHEN

From the author's seat in the press box at Memorial Field, San Luis Obispo, the writer can attest to the fact that the Poly football team is a much improved one this year. The reasons for this improvement are numerous and varied. The team is well coached, well disciplined, and well conditioned. It is also much more experienced than it was last year. The players are more aggressive and more determined. The result is a football team that is much more competitive and much more successful.

Many Changes Made On Campus

In Six Years

Since the time when this writer made the California State Polytechnic College his home, there have been many changes. From 1933 to the present, the campus has been undergoing a transformation that is still ongoing. The changes have been both physical and organizational. The campus has been expanding, new buildings have been erected, and new departments have been created. The athletic program has been improved, and the student body has grown.

Student Body Has

First Quarter

For the first time in Poly's history, the student body has increased. The increase is due to a number of factors, including the opening of new dormitories, the expansion of the library, and the introduction of new courses. The increase in the student body has brought with it a number of changes. The student body is more diverse, more active, and more engaged. The student body is also more unified, with a strong sense of community and a shared commitment to the college's mission.

Notes of Glee

BY REGGIE BROWN

Regretfully it must be said that the Poly glee club is in a state of disrepair. The members have lost their enthusiasm and their sense of shared purpose. The club's performances have been lackluster, and the members' engagement has been lacking. The club's future is in doubt, and it is up to the members to take action to save it.

Polypodi Pond

The Polypodi Pond is a unique and fascinating natural wonder. It is located in the heart of the campus, surrounded by the beautiful and tranquil landscape of Poly's grounds. The pond is home to a variety of fish, including the rare and endangered Polypodi fish. It is a popular spot for strolling and relaxation, and it is a symbol of the college's commitment to the environment.

Student Library Offers

Many Facilities

BY WILLIE OLIN

The Poly Library is a valuable resource for students, offering a wide range of facilities and services. It is a place of study and research, a place of learning and discovery. The library is also a place of community, with book clubs, study groups, and other social activities. It is a place where students can find the information they need to succeed.

Top Rodeo Honors

Four members of the Poly team were honored at the Western Rodeo. The members received top honors in calf roping, steer roping, bronco riding, and bareback riding. They are: Howard Bolts (top in calf roping), Don Rogers (second in steer roping), and Mike Brown (first in bronco riding and bareback riding). The team's success is due to the hard work and dedication of all the members.
