Poly Stock Entered "Fun Nite In S.F." Competition

The Poly Student Activity Council will enter a humorous routine in this year's S. F. "Fun Nite." This year's program will be held November 20th and the competition will help raise money for the University of Southern California. The Poly S. A. C. is well prepared for the competition and is confident that Poly will do well in the competition.

Student Court Met Out Justice in Traffic Cases

Student Court Chairman Zeb Kellam announced that two traffic cases on the docket were settled this week.

1. The defendant, a Poly student, was fined $5 for failure to carry his student cards. He claimed to have forgotten them but was found guilty by the court and fined.

2. The defendant, a Poly student, was fined $10 for driving over the speed limit. He claimed to have been going slower but was found guilty by the court and fined.

Homecoming Saturday Attracts Thousands of Poly Alumni

The Poly Alumni Association will hold a Homecoming celebration on Saturday, November 15th. The event will feature a football game, a parade, a dance, and other activities.

Baton Twirling Champs Perform Here Saturday

The California's championship baton twirling team will perform at the Homecoming celebration on Saturday. They will be featured as part of the Homecoming parade and will also perform at the Homecoming dance.

Poly Homecoming Program

The Poly Homecoming program will feature a football game, a parade, and a dance. The football game will be held on Saturday, November 15th, and the parade and dance will be held on the same day.

Diet to Speed Lamb's Growth

Experiments in cooperation with several commercial food companies indicate that Poly lamb mixtures can be fed to Poly lambs on a diet that is high in protein and fat, and that this diet will speed the growth of Poly lambs.

Student Court Chairman Zeb Kellam

Zeb Kellam is the chairman of the Student Court at Poly. He is a Poly student and is responsible for hearing and deciding cases involving Poly students.

Expert Advice

Negotiations are under way to bring to our campus a
professional agricultural economist for a four day ad
visory type of tour. The purpose of the tour will be to
advisory type of tour. The purpose of the tour will be to
give the students an opportunity to share their
problems, present professional suggestions, or even
originate some new projects which will benefit the
department.

Stanford Ready To Pull Stakes

The Stanford Indians continued to improve and indicated that they were ready to pull out of the Pacific Coast Conference. They were playing in San Francisco on Saturday afternoon with a few good players available for their team.

One of the most interesting features of the game was the way in which the Indians were playing. Joe Berliner, a guard from the Pennsyltucky crew in the big game, proved that he was one of the best guards in the state in the last game.

Howard McNeil, a substitute, broke for the Stanfords winning touchdown with the pass from the quarterback in the last game.

**Mustangs Outscore Gators In Exciting Gridiron Battle**

Last Friday night before a vocal audience, the Cal Poly Mustangs took on the Stanford University Gators in a game that many spectators considered a miracle. The Mustangs had a surprising victory over the Gators with a score of 42-14.

The Gators lined up to play a game of football, but the Mustangs had a different plan. They decided to use their speed and agility to outmaneuver the Gators. They had a strategy that they had been working on for weeks and it paid off.

The Mustangs defeated the Gators 42-14, which was a huge surprise to many of the spectators. The Mustangs had been preparing for this game for months and they were ready to show their skills.

**STATISTICS OF GAME**

Cal Poly: 42 points

Stanford: 14 points

**Cameris Preparing For Hard Season**

Basketball is just around the corner. Football is rapidly coming to an end. To Pull Stakes is also in the works.

The Mustangs have been working hard to prepare for their next season. They have been practicing and studying their opponents, and they are ready for anything.

**On the Side**

By Ulman Allen

The Mustangs have been working hard to prepare for their next season. They have been practicing and studying their opponents, and they are ready for anything.

The team is looking forward to the upcoming season and is excited to see what they can accomplish. They are determined to give their best effort and to come out on top.

**Previews for Weekend**

Another week of collegiate football has gone by and we didn't do so bad as in the previous week. Although the Mustangs lost their last game, they are still confident and ready for the upcoming weekend.

The Mustangs have been working hard to prepare for their next season. They have been practicing and studying their opponents, and they are ready for anything.
CROPS MECHANICS CLASS SOLVES SOIL EROSION PROBLEM WITH SWIPELL

A problem in soil erosion has been solved at California Polytechnic State College by Donald B. SwiPELL, a senior in the Agricultural Engineering Department, who has discovered a method of reducing soil erosion that he believes will be of national importance.

Professor SwiPELL, who is an expert in the field of soil erosion, has been working on the problem for several years. He has developed a method of preventing soil erosion by using a special kind of SwipeT. This SwipeT is made from a combination of natural materials that are ideal for use in soil erosion control.

The SwipeT, which is made from a combination of natural materials, is inexpensive and easy to maintain. It is also environmentally friendly, as it does not harm the soil or the plants growing on it.

The SwipeT is made from a combination of natural materials that are ideal for use in soil erosion control. It is inexpensive and easy to maintain. It is also environmentally friendly, as it does not harm the soil or the plants growing on it.

The SwipeT can be used in a variety of different ways. It can be used to protect slopes, roadsides, and fields from soil erosion. It can also be used to control erosion in urban areas, such as parking lots and construction sites.

In addition to the SwipeT, Professor SwiPELL has also developed a method of using SwipeTs to create swales. This method involves creating a network of SwipeTs around a field or a slope, which helps to prevent soil erosion by slowing down the flow of water and allowing it to soak into the soil.

Professor SwiPELL is currently working on further developing his SwipeT and swale system. He hopes to eventually create a complete system for controlling soil erosion that can be used in a variety of different situations.

To learn more about Professor SwiPELL's SwipeT and swale system, visit his website at www.calpoly.edu/swiPELL or contact him directly at (555) 123-4567.
