El Mustang

Friday, January 18, 1942

The Webers Hill, providing for support of Cal-
fornia Polytechnic during the present was the amount of $10,000,000 was reported to have been pro-
ceeded by the Assembly.

The bill now goes to the Senate for action.

Cal Poly Won't Close;
Assembly Unanimously
Votes Emergency Funds

"Sufficient funds are being made available to carry on the normal pro-
gress of California Polytechnic schools," President Julius A. McNeill said
as he reported from the Senate chamber, where he delivered his address.

El Mustang was decided upon in the referendum last week. Lack of sufficient staff mem-
ers makes it difficult to complete enough copy each week to fill the
requirements of the student body, and if interested and willing
students at the school, this is the
paper's final appeal to students to
join the staff of their school publi-
cation.

During this emergency a news-
magazine is needed to keep the students in the regular course, rather then
the spring. Fourth plan is that which
was made available by the Underwriters' rules and practice
for the "Country Fair on a College
Campus". The scholarship committee
will be able to help in advising the
scholarship committee.

The scholarship committee, a study of the student body, and if interested and willing

Crops Club Plans

The Crops club has been discussing plans for an oat participation in the forthcoming Poly Royal. The main feature of its program will probably include a plant identification contest, a sack meeting contest, and a series of competitive bids showing the club at work. Plans were also discussed for other activities:

1. Salesmen are rather young men with at least average mechanical ability. I know they are lots of them just like myself. I have studied more along the lines of selling than say, machine shop work, even though I have gone to technical schools ever since high school. The ships yards need men, welders are needed, and there are many more occupations where these men are needed.

2. Farm labor is needed and California Poly is putting out that type of man. In addition to this, many of these "former" salesmen could qualify for the air force and other branches of the service.

Senator Downey of California recently stated that the army and navy are confident of their ability to protect the west coast against invasion and that there is no plan under consideration now to move industries in that area to the interior. Pacific defenses, he added, are being strengthened as rapidly as possible.

He continued to say that vital points are no more vulnerable by Japanese forces than they were on the Atlantic seaboard by German machines of sea and air.

Similar statements were recalled concerning the invulnerability of the Philippine coastal defense. In one particular incident it might be remarked that the "March of Time" made an exclusive news broadcast on the greatness and strength of these islands, Shells, anti-aircraft weapons, flying fortress, and planes, and trucks, etc., were all shown. Yet the Philippines have been successfully invaded by the enemy. The number of points along the coast.

All this leads up to the question of adequate pacific coast protection. Is it up to par? It has yet to be proved. The defense of the Pacific coast covers a lot of territory and if the troops and equipment are not distributed right it can be pierced. We must continue to build a stronger barricade and not be self-assured by words—but by actual anti-invasion weapons.—Fred Ellis

Tell Of Nazis

country to Germany, the refugee learned from friendly Nazi guards that the Germans used machine guns to found the front lines to keep the Nazi soldiers fighting. The soldiers knew that if they turn back they are faced with certain death, while if they keep on fighting they have a chance of sur-

vival, Bjeret said.

Despite the fall of Oslo and other important cities, Norway continued to fight for 62 days. Bjeret stated. Then, when supplies ran out, the valiant Norwegians were forced to surrender to the Nazi armies. The refugees praised the spirit and sacrifice of his countrymen, but regretted the lack of train-

ing with which they entered the conflict. He spoke highly of the work done by the farmers and workmen, and told of men and women from the age of 14 to 86 who served their country in whatever manner possible.

In one instance, he said, a 14 year old boy sneaked from the Norwegian lines through the German lines to the commandant's headquarters, stole into the commanding officer's office and discovered secret plans for the follow-

ing day's battle. He returned to the Norwegian lines with the plans, which were copied by Norse officers. Then the lad returned the papers to the Ger-

man commandant's office before the Nazi's ever got a chance to find them mining. As a result, the Norwegians were prepared to meet the Germans and the Polfors' force back completely.

At the conclusion of the war, the refugee aided several hundred British soldiers in making an escape over 350 miles of rough mountain roads, thru

The Poly Jefferson took their first defeat in their last five games in Wednesday's preliminary game. The team went out of the game and high up in the crowd, but finally made it a closer game than in the past. At half time the score stood 17-5 in favor of the Poly Jefferson.

The second half started quite fast for both teams, although in the first half it looked as if the Jefferson would soon win the contest with the score of 17-5. In the second half both teams entered the game very well, making headway. The winning team was put in by B. Quinones.
