Science Café Turns Kennedy Library Stairwell into Live Computer Game

On Feb. 10, the latest Science Cafe turned the main stairwell of the Kennedy Library into a large-scale, interactive game intended to extend the world of computing into the physical space. The event, called DIY Physical Computing at Play, featured Los Angeles designers Scott Hutchinson and Michael J. Newman leading a hands-on experiment. Participants learned how to design and build a game using an Arduinos (an open-source electronics platform) and breadboards (reusable electronic test boards analogous to circuit boards) and determining the strategy and layout of the physical game board. The event culminated with a tennis ball target competition in the stairwell. Scoring monitors broadcast the players' success electronically, with an online scoreboard updating automatically to track the competition.

Science Cafe is an informat speaker series that features experts exploring scientific topics. The events involve stories, demos, hands-on activities and question-answer sessions. Find out more about the DIY Physical Computing at Play event [online here](#), or [visit the library's Science Cafe site](#) for more about the program.

Survey Gauges Interest in SLO-Denver Direct Flights at Local Airport

The San Luis Obispo County Visitors and Conference Bureau in partnership with the SLO County Regional Airport, Economic Vitality Corporation and SLO County Air Transportation Alliance (SLOCATA) have set out to prove to airlines that a direct flight from San Luis Obispo to Denver is good for the airline business and good for the local business community. A new survey asks the business community their willingness to use and pay for direct service from San Luis Obispo to Denver. The survey is accessible through Feb. 17 at <https://www.surveymonkey.com/s/XHFDWVH>. This survey follows one conducted in 2009 that looked at travel patterns. Denver was the top destination market identified by the more than 2,000 survey respondents. Additional analysis by the airport's consulting firm demonstrated that while the local airport is doing well, it needs more flights to more destinations, and the No. 1 priority should be nonstop service to Denver. Airport officials have been in touch with airline carriers who agree the demand between San Luis Obispo and Denver is strong. Because of competitive pricing structures in the region, though, the airlines request the community demonstrate its willingness to pay for regional jet service. The new survey is meant to gauge that willingness.

Collaborative Agent Design Research Center Undergoes Leadership Change

After 40 years at Cal Poly and 25 leading the Collaborative Agent Design Research Center (CADRC), Jens Pohl retired as an active CAED faculty member and executive director of the CADRC. The center is now under the administrative auspices of the Office of Research and Graduate Programs, which is reflective of CADRC's renewed goals to encourage and participate in multi-disciplinary research. With Pohl's departure, Joanna Snyder assumed the role of director of operations and Hisham Assal is the director of research.

CADRC has two immediate goals: to reach out to the university in fields that may benefit from CADRC's long history of modeling, simulation, visualization and software development, support and management, and to work to enhance the collaboration between the CADRC's field research unit, the Knowledge Management Laboratory (KML) and various colleges on the Cal Poly campus. For more details about the center, visit www.cadrc.calpoly.edu. If students, staff or faculty would like to discuss opportunities for collaboration with the CADRC, they are encouraged to call Snyder at ext. 6-6360 or Assal at ext. 6-0237.

Increase in Federal Work-Study Program Usage Lead to New Limits

Because of a significant increase in utilization of the Federal Work-Study (FWS) Program, there are a limited number of students with FWS funds. We regret that no new FWS awards will be made this academic year, and, at this point, increases in existing Federal Work-Study awards will not be considered. Should our utilization level out, the decision will be reconsidered at a later date. FWS was awarded to applicants with a high need who filed a FAFSA application before the March 2 deadline. Be sure to encourage students to complete the 2012/13 FAFSA at www.fafsa.gov starting Jan. 1. Since we were unable to grant additional requests for Federal Work-Study in 2011/12, students currently on the FWS waiting list will be given priority for FWS in 2012-13, providing they meet the need requirements and file their FAFSA before the March 2 deadline.
