**The Big Show Will Start at 10 a.m. Today**

Months of planning and working culminate today in the Tenth Annual Poly Royal at California Polytechnic college, when students of the state vocational school present their "country fair on a college campus." A virtual three-ring circus has been prepared for the entire open house program, starting at 10 a.m. with the grand opening ceremony.

Immediately following this ceremony judging of livestock at the sheep unit will commence. Classes of sheep and hogs will be judged at the beef unit beginning at 10 a.m.

Open houses will be celebrated in all departments, with the aeronautics, air conditioning, electrical industries, and national defense training shops scheduling displays which will show how they are fitting boys to step into positions in essential war industries.

The afternoon schedule includes the continuation of the livestock judging and poultry show, open houses in the El Mustang print shop, and time for a general tour of the campus.

Arrangements for the Tenth Annual Poly Royal were made by an executive committee composed entirely of students. The picture shows the officers of this committee, Left to right: Advisor Carl E. Beck, General Superintendent James McMillon, Treasurer Charles Robinson, Publicity Director Walter Dougherty, and Advisory C. Paul Winner.

---

**Bomb Display Saturday at 11 p.m.**

An opportunity for an eye-witness experience with incendiary bombs and their handling will be afforded by the special defense demonstration to be held at the rodeo grounds at 11 a.m. Saturday. This educational demonstration was arranged by the executive committee of the Poly Royal as a service to visitors to California Polytechnic campus for the "country fair on a college campus." It was made possible by the cooperation of the San Luis Obispo County Defense Council.

**Queen and Her Court**

**Gown and Tea**

Poly Royal queen, the court of honor, and special guests will attend a tea this afternoon at the residence of President and Mrs. Julian A. McPhee. The tea is presented by the Women’s Faculty club under the direction of Mrs. A. H. McCauley, president.

**Poly Relays Are Called Off**

With the Polytechnic track unfit for use, the annual Poly Relays was called off yesterday.

Five college teams, including the San Jose State team, had entered the meet, elated to be the biggest ever presented at the State vocational college. Efforts are being made to schedule the meet at a later date.
F F A Holds Sessions Here Yesterday and Today

Livestock Judging Schedule Told

Two hundred forty delegates from 174 of the 194 Future Farmers of America state conventions at California Polytechnic college yesterday for the annual state convention. Livestock judging will be held from 11 a.m. to 1 p.m. on Friday morning in the following order, starting at 10 a.m. in the Poly Royal show.

Hampshire aged ewes.
Hampshire yearling rams.
Hampshire yearling ewes.

Adam, Santa Maria, chairman; E. M. Miller, Fortuna; R. B. Sage, Templeton; L. W. Whipple; J. B. Brown, San Luis Obispo, adviser. All delegates have been invited to attend the Poly Royal show.

Program of work—Ted Nella, Salinas; Darrel Lindsey, Fremont; Frank Ruff, Merced; Jack Hammond, Paso Robles; Bill Ramsey, Kerman; George C. Markwell, Hayward; James Adam, Santa Maria; President Julian A. McPhee, adviser.

Besides classes will be judged at the Poly Royal starting at 11:30 a.m. They will be shown in the following order:

Rosedale Steers
Heavy weight.
Medium weight.
Light weight.

Shorthorn steers
Heavy weight.
Medium weight.
Light weight.

Angora steers
Medium weight.

Tenths
Yarding Hereford before Hereford calf shows.
Tenching Shorthorn before Shorthorn calf shows.

Complete program for the boy judging is announced as follows, in the order of showing:

Aged Poland China Steers
Poly's Baby Ewes.

Sheep Shows
Poly's Baby Ewes.
Poly's Cultured Bone.
Poly's Queen.
Poly's Royal.

Cuts of Meat
Poly Fashion Hulen.

"Mr. Bug Goes to Town"
Prexy Dougherty

Prexy Walt Dougherty has been responsible for the smooth running of the Associated Students during the past year. He also head of the Student Affairs Council and responsible for the smooth running of the Agricultural Building, which has been his office for the past year. Prexy Dougherty has been an active member of the California Polytechnic faculty since 1932, and previously taught agriculture at schools in Del Norte, Middletown, and Colusa. He is a graduate of Colorado State College.

FATHER OF POLY ROYAL HONORED

The tenth annual Poly Royal notes the appearance of Capt. J. C. Dougherty, former director of physical education and dormitory superintendent, at the tenth annual Poly Royal. Dougherty, who had seen action in World War II, was called back to duty in February.

NEW DORMS DOUBLES HOUSING SPACE

Housing facilities at California Polytechnic were doubled this year with the construction of six new dormitories in the area south of the old agricultural building. The new units contain 81 rooms each with facilities for housing 43 boys.

1400-ACRE CAMPUS FOR WORK AND PLAY AT POLY

Nestled in the beautiful foothills, one mile from the city of San Luis Obispo, the 1400-acre California Polytechnic college campus presents plenty of room in which Polytechnics can work and play. Nearly one hundred acres is taken up by the beef and sheep unit, the dairy milk barn, feed barn, bottling plant and pasture; a 12-acre deciduous fruit orchard; 4 acres of citrus and walnut; a 4-acre truck garden; and a 4-acre vineyard.

Three Publications

- Students of California Polytechnic college conduct three publications, written and edited solely by the students themselves. The publications, containing news and pictures of the activities of the students and teachers, each week during the school year, are distributed to all Polytechnic students.
- Advertising for the publications is collected by Dick Barnett, student business manager.
- The weekly paper is written by a student staff, edited and made-up by students, and printed by students in the school print shop in the basement of the agricultural education building.
- Advertising for the publications is collected by Dick Barnett, student business manager.

CPT. J. C. DEUEL

Capt. J. C. Deuel, former director of physical education and dormitory superintendent, at the tenth annual Poly Royal, Dougherty spent 20 years at Cal Poly. A retired army officer who had seen action in World War II, was called back to duty in February.

STUENTS IN NEWSPAPERS

California Polytechnic students will be shown in newspapers taken by a three-man crew Wednesday in connection with the sale of defense stamps and bonds. Bill Crall, law, American Future Farmer, and Henry House, former state president of the Future Farmers and secretary of the Cal Poly student body, appeared in the pictures. A third newspaper shot showed Miss Marilyn Sullivan, civil service trainee and former actress.

1941 QUEEN

Miss Barbara Higgins, queen of the 1941 Poly Royal, holds the crown presented to her at San Francisco Museum last year when she was selected to receive the Nacional Annual Poly Royal. Miss Higgins will become the crowning phenomenon to Miss Julia Seiber, of Fresno State College, at the coronation ceremony tomorrow night.

Meat Animals Boys
Sell $20,000 Stock

Over $20,000 worth of livestock are marketed each year by students in the Meat Animal department at Cal Poly. From $4000 to $5000 worth of livestock is purchased each year for student projects. The students have at their disposal: a beef breeding shed; barn, houses, and lots for swine; barn and a feeding shed for sheep. Approximately 650 acres of pasture land is available for beef cattle and sheep.

Pictorial Edition

This pictorial Poly Royal edition was written and printed entirely by students to provide visitors to the "country fair on a college campus" with an informative bulletin that would serve as a guide to the activities of the show, and a pictorial souvenir of Poly.

American Farmer

California Polytechnic was honored this year in having one of its students chosen as one of the six American Farmers by the National Future Farmer organization. Bill Crinklaw, Star State Farmer in 1941, was the boy who won this award. He is a well-known Poland China hog breeder from King City, and is a freshman student at the college.

Horsemans Paradise

Outstanding mares, bred to great stallions, have built up the thoroughbred unit at California Polytechnic into one of the finest horse congregations in the state. To view one of the mares looks out the barn door. Just below, President Julian A. McPhie inspects one of the horses. Four of the outstanding members of the thoroughbred group look pretty while their picture is taken for a third photograph. The unit was built up as the result of the interest of these horse breeders, H. P. Russell, Double H Ranch, Carmichael; B. E. Rausch, Los Angeles; John J. Kasenick, Hollywood Park Public Relations Director, and Julian A. McPhie, college president; Charles E. Perkins, Allied Ranch, Solvang; Carlsten, F. Burke, Greenfield Farms, Hidden Valley. As seen at the dedication of the new horse barn is shown in the fifth picture. At the dedication of the barn the mares and their off-spring are paraded around one of the attractions of the Tenth Annual Poly Royal.

College Leases Beef Cattle Range

Range operations of California Polytechnic meat animals students were expanded this year by the leasing of a 500-acre stock ranch four miles up Binner canyon from the campus. The ranch, typical of stock ranches throughout the state, excepting that it is on a small scale.

Used, primarily for the grazing of the "breeding" herd, the newly acquired acreage has given the school an opportunity for more extensive use of the pasture on the campus proper for feeder stock and for the sheep flocks. Plentiful supplies of grass and water make the range an ideal grazing area. Deep swales provide shelter for the cattle in winter, and high flats will present cool feeding places during the summer months. Besides the grazing land there is farming land available on the ranch, which this year was planted to barley by the crops department of the college. The ranch was used by Galli and Lang, two former Cal Poly students, as the starting place for the development of their Hereford herd.

FARM Repair Work Taught in Ag Mechanics

All agricultural students at California Polytechnic are required to take a course in agricultural mechanics which fits them to make some repairs, construct small buildings and maintain farm machinery. In addition, students may specialize in farm mechanics work with the goal of positions as foremen of the mechanical departments of large farms, or as persons able to do repair work on all farm machinery.

This department, under James Merson, assisted by J. H. Wehrli and C. Paul Winner, teaches students through a lecture and laboratory program. Much of the work on the construction at the rodeo grounds was done by the ag mechanics classes. The students also build feed troughs, self feeders, and other livestock equipment.

**Students Learn By Project Work**

Most animal husbandry students get actual experience in the field. They are most interested in through the project system of learning. Commercial enterprises of feeder steers, hogs and sheep are conducted each year, usually by freshman students.

To enable all students to participate in this project program, a fund has been set up which finances the student in his endeavors. Through the course of the many years this fund has been operated, a large reserve has been built up. From this reserve stock is bought for feeder purposes, then sold to the student or students interested in conducting a project, on a contract basis. Feed is bought by the fund, and charged against the student's account.

At time of marketing the fund deducts the amount of initial cost plus feed and labor costs from the check, then pays the profit to the student. In return, an agreement whereby, above a stated amount, usually $2 per person, all profits are split one-third to the fund and two-thirds to the owner. Cattle lots and small pens, of Shorthorn, Hereford, and Angus steers are sold out by students each year. Both long-fed and short-fed steers are included in the project. Long-fed steers are first put on pasture, either on the campus pasture or on the leased Bell Ranch four miles up Banner canyon, then brought indoors to the feedlot at the beef barn. Short-fed steers are generally placed directly into the feedlot. All feeding operations are conducted each year, usually by freshman students.

**Learn and Earn At Poly Poultry Plant**

Students in Poultry get actual experience and training in the skills needed to successfully operate a poultry ranch. The department is to train students in poultry husbandry, so that he may advance into a reasonable position in his chosen industry. Students use a 48 by 150 foot laboratory, adjacent class-rooms and drafting rooms, and operate the Diesel and steink electric generating units in the Poly power houses which in turn supplies most of the campus with electric power and steam heat.

**Poly's Musicians**

Poly's music department is widely known throughout the state as the result of tours to high schools during the past five years. The Polytechnic band, men's glee club, and Collegians orchestra all under the direction of Harold P. Davidson, have a splendid record of excellence matching that of many professional organizations. During Poly Royal the band will play for the opening assembly, baseball game, Poly Relays, barbecue and rodeo. The glee club will present a concert at the barbecue, and the Collegians will thrill dancers with their "jivin" at the Coronation Ball Saturday night.

Developed entirely by Director Davidson, the musical groups are tops in their individual categories. The stappy appearing band plays military and concert music with equal ease, and has provided much (Continued to Page Six)
Aero Trains Airplane Mechanics

Poly Music Department

(Continued from Page Five) color at football and basketball games during the fall and winter. All students are familiar with the band, as they play for most assembly programs. It is to be remembered that members of the music organizations are not students majoring in this subject, but only agricultural and industrial students who are willing to devote considerable of their spare time to this activity.

Thirty voices harmonized to sound like one is the story of the men's glee club, which was so popular during the current year's musical tour that fans followed them from one program to another to hear repeat performances.

The reputation of the Collegians dance band has spread far and wide, and in addition to providing the music for all Poly dances, they are in high demand for high school functions.

California Polytechnic student-owned while Leghorn hens were the high Leghorn pen and the high California breeder for the past six months in the Modesto egg laying test. It was conducted by Richard J. Leach, Poly poultry instructor. Competing with the hens, the Polytechnic flock placed third of all entries regardless of breed in the championship class for the month of March. Three pullets had 31 eggs laid. Three other pullets just missed a perfect record with 30 eggs each during the month. The general average of production for all pens entered was 73.1 per cent and the Polytechnic flock had an average of 88 per cent.

Air Conditioning Instruction Given

The objective of courses in Air Conditioning is to train the students to enter employment, in the installation, maintenance, and operation of air conditioning and refrigerating equipment. The department is located in a newly constructed laboratory which is well equipped with a variety of refrigerating, ventilating, steam heating, and humidity control equipment. This year the students have been working on a quick freezing unit.

Aeronautics boys at Cal Poly actually construct airplanes and install motors. To the left and top is shown a scene in the aeronautics laboratory. The Poly Manufacturing students get perfect records for the month with a series, as testified by the picture at left. The Poly Manufacturing scenes shows the air conditioning department bearing facts about various air conditioning and refrigerating machinery.

Students Learn Through Projects

(Continued from Page Five) undertaken by the student owners. Most of the work is carried on out of school time, with a little being done in laboratory periods.

Each year students interested in sheep husbandry feed out a certain number of sheep under sheep conditions. Lambs are divided up into small groups of 8, with from three to five boys in charge of each group.

Hog projects are continuously being operated with students raising hogs to over 200 lbs. The student tends the market group. This year the staff of El Mustang for awarding keys, the business manager is not included. It was decided to make an exception to this rule in order to maintain a well rounded picture of the activities on the Polytechnic campus.

Dairy Work Easy in New Barns

Learn Basic Dairying

The function of the Dairy Industries department is to prepare students in the occupational fields of dairy production and dairy manufacturing. The Dairy Production Unit includes modern, convenient milk, calf, feed, shelter, and milk barns. The latter being the year was enlarged to include a new milk bottling machine which supplied the college canteen with fresh milk. All these animals are purebred, outstanding producers, and in several cases they are grand champions in the show rings.

Three Student Publications at Poly

(Continued from page three) is in these classes that the students get the fundamental knowledge enabling them to pour out several thousand words of copy each week.

Together, the three publications present a well rounded picture of activities on the Polytechnic campus.

This year the staff of El Mustang is holding open houses and a special demonstration in the print shop from 1 p.m. until 3:30 on Friday.

Thrills In Store At Poly Rodeo

A ravaile of the old west showings 17 the younger generation are as equal to the old time sport as the younger generation will be in the fifth annual polytechnic rodeo in conjunction with the Tenth Annual Poly Royal.

The roping and bronc riding from the string of Bob Ferrini, of Santa Maria, will provide rough seats for the Mounted Service. With no saddles, no bridles, just a bucking bronc and the Poly boys will come out of the other riding high.

Here is to be ripples aplenty, but the ground has been worked up nice and soft, so it will be easy landing for the boy who takes a tumble.

As just as exciting will be the steer riding contests, with tricky bronc breakers furnished by Jinks Magneson, of Keno, doing their stunts.

Sevilla, 1041 Queen, will be received at the railroad station this afternoon. After a brief ceremony in the Poly on Tuesday to learn details of the Tenth Annual Poly Royal. The lariats rodeo in conjunction with the Poly Royal will provide rough seats for the Poly boys. Each Poly boy takes a turn at riding the Poly boys.

A cavalcade of the old west show, and soft, so it will be easy landing for the Poly boys.

Three roping contests which test the riding skill, slim, muscular coordination of Poly students are on the afternoon program.

California Polytechnic College faculty members are given the toughest time to get any milk out of a wild cow. They will be allowed the assistance of a student in milking the whole class, but must do their own milking.

Do you know that the little bittie pig?

There is an opportunity for any Poly boy to show what a big boy, who doesn't care about getting dirty, to pick up a little bittie pig and grow in all of the spectacular participation contests. Winners of the contest are the boy who can carry the pig out of the arena, and all in on of the spectacular participation contests.

Judges for rodeo events will be Dick Ferrini, of Santa Maria, and Harold Egan, formerly of Red Lodge, Montana, now residing in San Luis Obispo. The latter is the developer of Benton Caldwell, of the college.

No Girls—So Men of California Polytechnic "Borrow" Coeds for Their Campus Queens

POLY ROYAL QUEENS

SALT LUIS CRISPOCAL, CAL.—Students of the California Polytechnic College are presenting their Tenth Annual Poly Royal celebration on April 24 and 25. This event, long recognized as "the only country fair on a college campus in the U. S." will be more than just a "fair" this year. Every student of this State Technological college is receiving training in some essential phase of agriculture or industrial production and the two day show will attempt to demonstrate the way in which these men are likely to be of service to the armed forces. In addition to a review of educational work, the show is providing a complete rodeo, track meet, baseball game, livestock judging contests, Coronation Ball, etc.

MUSTANG ATHLETES HAVE SUCCESSFUL 1941-42 YEAR

Coach Howls O'Daniel announced that the Poly diamond squad will play two games with La Verne during the Poly Royal open house program. The games will either be played on the Poly field, north of the agricultural education building, or at the Junior College field.

First game will be at 3:18 p.m. today, and the second at 10 a.m. tomorrow.
