250 Guests to Attend 1st College of Fairs

Starting today at Cal Poly will be the first "College of Fairs" known to history. California Polytechnic college awaits 250 guests, representatives and executives of fairs in California, Washington, Oregon, Montana, Utah, Arizona, and western Canada.

Night Telephone Numbers Listed

- Assistant to the president, C. O. McCorrkle announced today the following list of telephone numbers for night connections:
  - J. C. Durell—Chase 3181
  - R. C. Henderson—Jespersen 3161
  - Harry Wimeroth—Chase 3181
  - Heron Dorm (pay station) 9705
  - Upper Units (pay station) 2946
  - Lower Units (pay station) 2970
  - Chase Dorm (pay station) 1094
  - Jespersen Dorm (pay station) 8490
  - Auto Shop 2125
  - Forestry and Fire House 2125

Persons attempting to call the dormitories or units must call the proper phone number, as numbers of pay telephones are not listed in the directory, he said. In case of fires, call the fire house number, 9308.

McCorkle Returns From Proxy Confab

Assistant to the president, C. O. McCorrkle, returned last Thursday from a meeting of the State College Presidents' Association held in Sacramento. He attended in the absence of President McPhee.

What's Doin'

- Mon. 11—College of Fairs. Basketball game, 7 p.m.
- Tues. 13—College of Fairs. Baseball game, 7 p.m., Newman Club meeting room 218, S.A.C. meeting room 211.
- Wed. 14—College of Fairs. Glass Club meeting 6:30. Basketball game 7 p.m.
- Thurs. 15—College of Fairs. 7:15 p.m., Air Scouls, room 21.
- Fri. 16—Crops Club Student Body Dance, 9 p.m.
- Sat. 17—Ladies' Faculty dinner at Cafe.
Board of Arbitration Needed

Closer cooperation between the students and the faculty of Cal Poly seems to me to be one of the most important adjustments to be made very near future. I believe that the students should have the chance to get rid of their so-called "gripes" instead of continually brooding about them and discussing them with their fellow students. The way to do this is to have someone that has the authority to rectify them, or at least inform us as to why these conditions exist. Gripping is all right, but it gets you absolutely nowhere unless it is directed in such a manner that can justly weigh the facts and do something about it.

I believe that through the SAC, a student committee should be chosen to meet once a week or once a month with a faculty committee. This meeting could act as a mediator between the faculty and students. To my estimation, these committees would act to help both the faculty and the students straighten out and avoid future misunderstandings.

A close harmony between students and faculty, to my estimation, is one of the essentials in having a good democratic college with both parties understanding the problems of the other and striving to adjust them.—D. Lavery.

250 Guests to Attend

(Continued from page one)

lemes of general interest to the field of fairs and expositions, the College of Agriculture will study administration of a master premium list for 40,000 exhibitors in California, where fairs are supported by a 4 per cent levy on pari-mutual wagering at thoroughbred horse race tracks.

During the last few years, with most fair grounds and buildings turned over to military use, more than 4,000,000 persons attended such expositions in six western states and Canada. The 40,000 exhibitors included farm and factory producers, youth organizations and civic groups. A sharp increase in the numbers of exhibitors, spectators and physical properties of fairs is expected in the six western states and Canada as a reflection of the general upswing in commerce and industry spreading westward, said the president of Western Fairs, E. C. Vollman.

Los Lecheros Plan Poly Royal Exhibits

Los Lecheros is starting to plan its section of Poly Royal. A committee of three—Hank Leffers, Chuck McLaughlin and Marval Mayer—presented a list of suggestions for events for this year's fair. Action on the list will be taken at the next meeting.

A variety of contests will probably be a feature of this year's program. Several ideas based on exhibits, both unusual and educational, are to be also voted on.

A request for a spring dairy tour of the state has been put before the administration. If it is approved, the club members will have an opportunity to study dairy production and manufacturing in many parts of California.

SAC Seeks Action

A discussion of the list of immediate and long-term improvements submitted to the administration by the S.A.C. was the result of a long session of the group last Tuesday night at a special meeting held to request the appointment of Bill Troutner, in charge of resident students.

President Santel appointed a committee consisting of Al Ranwick, Archie Ahmed, Ken Holm, Leon Garvin and Santel to meet with a similar administrative committee to discuss the operation of the student store.

Week EL MUSTANG will be financed one-half by advertising and one-half by funds appropriated to Publications by the S.A.C. in October. At that time SAC granted Publications $750 to publish a pictorial magazine, MUSTANG ROUNDUP. Two issues were published at a total cost of about $600. About $800 was raised in advertising and through sale of photos, so that only $250 of the Publications fund was used. Using $300 to fund the balance, Publications will publish the weekly paper for the remainder of the school year and will have about $300 to fund being raised to publish the yearbook. About $800 was raised on advance yearbook sales and this with approximately $400 in advertising will give us a $1800 annual.

Due to paper shortage we cannot go to tabloid size yet, but as soon as paper is available we will get national advertising and will increase the size of the paper.

Yours for a better paper,
Paul H. Bowman

Dear Mr. Bowman:

We welcome the opportunity to explain the financial problems of El Mustang as there are probably other students who also wonder about such questions.

I estimate approximately $32 per week for El Mustang, of which $35 goes to the Telegram-Tribune for composition and makeup, and $7.00 goes to Press Press for press work and paper. A profit of $387.57 made by Mr. Kennedy on football program advertising and sales was used to finance the weekly paper.

The first six issues were published without advertising and the last six issues (through Feb. 4) included advertising that brought in a total net revenue of about $74.

(The advertising manager gets a 15 per cent commission on advertising sold and collected.) Total expenditures for the 12 issues has been $589.30. Subtracting this from the football program profit and advertising leaves a balance of $22.57. This small balance plus advertising in this issue pays for this, our 18th issue.

Mustangs Maintain League Standing: Beat All-Comers

Poly's basketball quintet maintained their league standing last week by swamping the J.C. five 52 to 41 and the Octanes 57 to 29.

Monday's game with the Vikings was their second tilt together and resulted in a victory for Poly. J.C., being at the bottom of the league, didn't prove to be much of a match for the Mustangs. In spite of a new addition to their squad, a rangy center, Gulichson, the Jaycees couldn't withstand the efficient ball handling of Poly's fast breaking forwards, Moore and Arthur. Along with Sweatt, the center, these boys accounted for the bulk of baskets made during the evening.

Wednesday night the Mustangs tangled with the Octanes who hold second honors in the City league. This was a more evenly matched game, although it ended up a defeat for the filling station squad. Again through the efficient blocking and screening of Moore and Arthur, the home team went on a scoring spree totaling 26 in the first half and 57 before the gun. Maxwell had a little trouble with the Octane player in the second half when a dispute arose over the referee's decision on a foul. Both boys were put out of the game.

These two "kids" have been playing basketball a long time and probably have forgotten more than you or I know. Yet today, they still continue to play good, consistent ball. They may not be leading the scoring parade, but that alone doesn't win ball games. Their ball handling and defensive playing has been great. Don't let me wrong, you have to have everything in a good basketball team. It's nice to have a scoring threat. But the trouble is when the average fan goes to a basketball or even a football game, he doesn't watch the finer points. He will awe at a spectacular shot or a long run on the football field but he didn't see the feed pass or a screen on the basketball court or a nice block on the turf. As I said before, every factor is essential in molding together a smooth working team. It just boils down to one thing, TEAM WORK.

Harry and Ed may not be as fast as they used to be, but they still have plenty of what it takes on the old casaba court. Wineroth and Maxwell, along with Arthur and Moore, have combined experience and ability to help a lot to put Poly where it is today, on the crest of the city league.

Baseball's in Air

By GEORGE DEWEY

A turnout of all baseball men can be expected soon. Sign up with Howie in the gym office. Battery men should be working out every afternoon in the gym. Get your gloves and warm up those old scuff bones.

 Shops Interesting.

"Just Between Us"

By MERRILL

Congratulations to "The Mustang Club." Cal Poly is proud and very pleased to have such boosters.

If you want to hear the best in music, come out to the Valentine's dance, the first student body dance of the year, next Friday night. Gillian Brown, an ex-Polyite and musician par excellent, and his orchestra will give with the music mentioned.

Did you know that Gerald Root, Chase hall man, is an amateur radio operator, or at least we believe he is. He knows just what a Hallcrafters 8X28 is. I don't!

We have recently heard dire reports from friends of Mr. Tom "Buldabla" Leonard. What caused his recent hasty departure from one of the local cafes? Incidentally he's been in bed ever since.

Due to who knows what, Kenny Holmes and one of his co-workers, were lucky enough to get the best in a recent chemistry exam. Maybe it wasn't just luck, though. I've seen both of them studying.

Glee Club Starts On New Selections

The "Charioteers" have started work on some of the tougher quartet material. This week the music department received several sets of professional quartet selections. The first song that they've started to "whip" up is "I'm Always Chasing Rainbows."

Next quarter Gil Brown, former accompanist of the glee club, will be enrolled again. He has agreed to accompany the "Charioteers," as well as do some of the glee club work.

The glee club is coming along in fine fashion. This past week the members completed a tough arrangement of "Alloha's Holiday," with Ed Crary as accompanist. The glee club men will soon start on such songs as: "Oklahoma," "Burry with the Fringe On Top," and "Summertime."

The band is attempting to be the most versatile one in Cal Poly's history. At the present the members are working on school songs, marches, novelty numbers and some secret numbers which will be aired at a future assembly.
