Campus Expansion-Movement Reaches Drawing Board Stage

If returning alumni are Needed at the planning of the campus in the last few years, it will be in 1950 when they need for Homecoming.

A firm from the Los Angeles, enthusiastic about the project for the campus which, if any, would be the same as the appearance of the campus the last few years.

For example, what is now the plan for the campus, if any, would be the same as the appearance of the campus the last few years.

A number of existing depart- ments of biology, the school, would be relocated with dormitories and facilities.

The 1950-51 school year would have an estimated 5000 full-time students. Of this number, the Agricultural College, the College of Engineering, the College of liberal arts and sciences, and the College of Business Administration, are the largest.
After Humble Beginning

Poultry Flocks Expand

When the Cal Poly poultry department started operations in 1910, there was practically no equipment and only one flock available for production. Customary activities between 1911 and 1918, but after the third year production showed a decided increase.

Richard Leech, present department head, arrived in 1930 and commenced work on the existing flock of birds.

In 1932, a White Leghorn pul­

try housing was established. Leech said a different type of broo­

ing was used. In 1938, the flock was increased to two. Leech said the flock was increased to ten during this period and the number of flocks, and now poultry flocks.

Programs started in the poultry program in 1941, with the addition of a new flock of birds. Now, the flock has grown to 10,000 birds.

Electrical Engineers

Use Standard Tests

Many of the tests run in the electrical engineering laboratory are standard tests specified for electrical equipment by the National Electrical Manufacturers' association, according to J. C. Dungan.

The objective of the electrical engineering degree course is to

develop young engineers to enter the engineering field of the electrical industry. Technical and vocational students are trained

to be technicians and hold such

management, appliance service

men and maintenance and operations field, and for engineering positions in the industry or the various government agencies.

Aero Department Training Men For Aircraft Industry

The Aero Department is one of the aerospace engineering depart­
mences on the campus. It is a student of the aeronautical department, according to E. C. Quadlin.

The program aims to

train young engineers to enter the engineering field of the aeronautical and space industry.

Campus Turkey Sale

To Start Saturday

Thanksgiving turkeys will go on sale to faculty members, students, and campus employees this Saturday, according to Bernie B. Bailey of the poultry department. The faculty may order turkeys for the college, and fourth order Nov. 14. For orders, telephone 3038.

Judging Teams Win Public Recognition

For College During Past Month

Livestock and dairy judging teams of Cal Poly brought thou­
sands of dollars worth of valuable publicity to the college in the past month.

A five-man, student livestock judging team, made Pacific Coast headlines when it placed first in the collegiate livestock judging meet at the 1949 Grand National Livestock Exposition in San Fran­
sisco in Oct. 9th.

Trailing the Poly team were Utah State, second; Washington State, third; University of Idaho, fourth; and Fresno State, fifth.

Wesly Combs and J. Dennis Daly, both of Hanford, put Cal Poly's name at the top of the high school, college, and individual scoring by placing first, second, respectively, in indi­

vidual scoring by placing first, second, and fifth in all breeds at the 1949 Grand National Livestock Exposition in Portland.

The additional members of the team were Bob Bowman and Harold Window.

Meanwhile, at Waterloo, Iowa, these students of the dairy depart­

ment placed second in three breeds and fifth in all breeds at the 50th International Dairy Exhibition.

Judging team captured second place at the Pacific International Livestock Exposition in Portland. The additional members of the team were Bob Bowman and Harold Window.

Winning the Dairy judging team were Bob Bowman and Har­

old Window.

Meanwhile, at Waterloo, Iowa, these students of the dairy depart­

ment placed second in three breeds and fifth in all breeds at the 50th International Dairy Exhibition. The additional members of the team were Bob Bowman and Harold Window.

Final Examination Schedule
(Clip and save)

Following is the final examination schedule for fall quarter. Past-90. Examination days, Monday, Tuesday, and Wednesday are listed in the left and vertical columns. Examination hours for each class are listed in the right-hand column. Examination times for classes that meet on Tuesday and Wednesday are listed in the right-hand column.

Instructors Added For Electronics and Radio
The electronics and radio engineering department now numbers 30 students with a staff of eight instructors, including Accuracy, according to Clarence R. Johnson, department head. Harry K. Yockey, department instructor, is on sabatical leave getting his Ph.D. at the University of Illinois. Fred D. Fowl, now at the University of Illinois, was transferred from the electrical engineering department.

Considerable equipment is being added to the shop. Blades said. Shop facilities are being set up so that students may be carried through most of the classes. In the final year of the school year the craft-encouraging program, sheet metal and machine shops will be in operation for production of "commercial" products.

New Soil Science Major Enrolls 30 Students
Thirty students are enrolled in the soil science department this year, the first year in which a major has been offered. The majors are to be two, three, and four-year programs to prepare students for farming, soil conservation, or teaching.

Ag Inspection Enrollments Show Steady Increase
More than 80 students are in the agricultural inspection department this year, as compared with 16 students in the department at the time of organization in 1936. Instructors are Logan H. Carter and Kenneth F. Wade.

Ornamental Hort Outgrows Present Department Space
Now in its 15th year of operation, the ornamental horticulture department has 68 students this year, the largest in its history. Instructors are Edward A. Way, and Howard D. Camp.

Students are studying garden design, plant and related topics. Students can take jobs in the industry, and many will be employed.

Welcome Back, Grads

Welcome back home, Alumni. Each year, as we watch the Alumni association grow and increase in size, it takes on more and more the aspects of a large family returning home for its annual all-together at Thanksgiving and Christmas. The friendly atmosphere and the anticipation of friends and relatives gathered together to renew old friendships and talk over the good old days is filtering down to us as you become more and more an active part of Cal Poly.

We find ourselves taking more interest in you and your activities each year as we realize the growing importance of your group and see the interest that you have in our activities and progress. This is your holiday, but the mood is catching, and we find ourselves assuming some of the excited anticipation of the holiday atmosphere, as you arrive.

We sincerely hope that your visit is pleasant and that you can take away happy memories of your brief stay. We have much to be proud of in the advancement and growth of our school. No doubt the changes are even more pronounced to you who have helped us attain our present position. We are proud of the coeducation, of our building program, of our college and its present standing, and we hope that each year as you return that both you and we can find more and more and feel proud about.

-M.R.S.

Publications Quiz

El Mustang is your paper. We as editors, reporters, advisors and journalism students are working for you. We find the things we think you would like to know about and write them as accurately and clearly as we can. Sometimes the end result leaves much to be desired—we run out of ideas, or in our desire to put sufficient time on our school work, we turn out a hasty job.

The only way by which we can know whether we are pleasing you, or writing about the things you want to read, are by comments which we either directly or indirectly and by your letters to the editor.

The following are some good ideas that would do much to make El Mustang an outstanding publication. Possibly you feel that you could do a better job of writing if you had the chance. We want your opinion. If you can do a good job of writing, we want your services.

If you have any criticisms, pro or con, write them on a piece of paper, slip them into an envelope addressed to the editor, and drop them off at the El Mustang office, room 23, Ad building.

Here's to your newspaper and mine—let's make it the best.

- P.F.N.

Ignorance Is Bliss

Just a few weeks ago, quite a ruckus was kicked up around Cal Poly because members of the college faculty—familiar with the rules governing students—protested against students who were not even listed on the enrollment rolls being able to use certain facilities on the campus. The number of students not listed who used these facilities was small, but they did use them.

In most of the sixth yearbooks is a page or more of the old class of 1900-1901 who graduated and stuff like that. We explored through the past by means of old Poly yearbooks to see what could be learned of those far generations of Poly students.

It was sometimes around 1901 or 1902 that the tree planting and shovel were used. In those days, the minds of many of the men in this year's senior class are one with the traditions and plans for the future are being formed right now for a tree planting next spring.

There was no Poly athletic team in those early days. The first class of seniors was in 1902. The first class also must have been the first class to plant trees. The shovel used to plant tree was presented to the campus by the class of '02 and so on down the long line of graduating classes.

The Polytechnic Journal of '06 gave us this gem. Inspector in surveying: "Beast, here is an earthen dam built up?"

Beast: "Ah, the dam itself with water?"

The Polytechnic Journal of '06 in 1911 also said this.

"The 1911 Ebbeo is good for a few memories of those senior ladies and gentlemen... of... old Poly and Poly graduates, "President Ruggles crossed his heart and said, "do not chisel out to ruin."

Never mind but that he was unoccupied unmovingly. The Polytechnic Journal of '06 in 1911 also said this.

"Don't forget the Polytechnic Journal of '06 is the first class that Poly Pulls best San Jose State."

But we've got to be back by those old yearbooks again. They are at the back of my mind. In some of these containing about the same things. There was a dedication page with some lucky family member getting a hearty pat on the back. Then there were pictures of the faculty members and the classes. The seniors took up most of the space. As a result, giving their class adresses, stories. The class history was always recorded, as was the class roll, in which every senior bequeathed the Polytechnic journal of '06 to the Polytechnic journal of '06.

For a tree planting next spring, the Polytechnic journal of '06 declared.

"Let's get back to those old yearbooks again. They are at the back of my mind. In some of these containing about the same things. There was a dedication page with some lucky family member getting a hearty pat on the back. Then there were pictures of the faculty members and the classes. The seniors took up most of the space. Ace Cartoonist Pair Added
To El Mustang Feature Staff

Cartoonist Lloyd Stratheorn, known for his delayed-action cartoons, and Dick Tice, a transfer from New Mexico, have joined the El Mustang staff. Stratheorn is a transfer from the San Jose, California, campus, while Tice is from New Mexico. Both are former polo players and have contributed to the El Mustang feature staff.

Stratheorn, born in 1918, has had a varied career. He was born in France, where his parents were stationed in the U.S. Army. He attended public schools in New Mexico and graduated from the New Mexico Military Institute in 1940. He was later commissioned as a second lieutenant in the U.S. Army and served in the Philippines, China, and Korea.

Tice, born in 1920, attended school in San Antonio, Texas, and later in Kansas. He graduated from Kansas State University in 1942. He was commissioned as a second lieutenant in the U.S. Army and served in the Philippines, China, and Korea.

Both men have contributed to the El Mustang feature staff with their delay-action cartoons, which are known for their humorous and often outrageous situations. They will continue to produce cartoons for the El Mustang feature staff.

Money is Short? ... Sure!
Prices are High? ... Sure!

So why not save a few dollars by carrying your Automobile Insurance with The Farmers Insurance Exchange. The same place where hundreds of other students and instructors on the Poly Campus already carry it.

It is one of the youngest companies but last year its Automobile Insurance sales in California were so large that no other company even compared with it.

Besides you will receive a "National Standard—Non Assessable" Policy. Call our phone 697 or come by our office and get our rates.

Students Granted SAE Charter

NEW CHARTER AWARDED to the Cal Poly student branch of the Society of Automotive Engineers by Reagan Stunkel (second from left), chairman of the Southern Califormio section of the society. Tom Hordgrove, (left) faculty advisor looks on as Alvin Garrenben, chairman of the student branch, accepts the chapter. Also looking on is Ed Rents, west coast branch manager, S.A.E.

Crops Department Expands Greatly

The crop department, originated in 1900, has grown to a strength of 207 students and six instructors, under the supervision of Paul Dougherty. Crop department, truck crops, field crops, and citrus production comprise the crop department. Fruit production has 22 acres of orchards and vineyards and, due to climatic conditions, 150 varieties of fruit are grown. All operations are carried on by crop majors. There is no outside labor hired. Following this policy, there is ample opportunity for fruit production majors to gain vast experience in orchard operation and management.

Traffic Fatalities Decline in State

Traffic fatalities for the first six months of 1949 have reached a total of 360 in the 16 southern counties of the state—a decrease of three percent over the same period for 1948. This report was taken from the traffic division of the Automobile Club of Southern California.

Decreases were recorded in five of the 16 counties with Imperial, Los Angeles, Orange and Butte Bernardino counties experiencing the most noticeable decreases. Imperial County’s total of 21 traffic fatalities was down from 28 in 1948. Los Angeles, which experienced a 50 percent decrease, had 74 traffic fatalities, down from 142 in 1948. Orange County also had a decrease with 32 fatalities, down from 38 in 1948. Butte Bernardino County had a decrease of 11, with 44 traffic fatalities in 1948.

Multiple Intoxication

Proctoring that his cartoon is merely a hobby, Dick hopes to one day enter the engineering development field. He is the electronics major with an interest in developing machines, gliders and spacecraft and, of course, cartooning.

Speeders May Force Closing Backroad

For the first time at Cal Poly teaching credentials will be issued in the 15 mph arcus, which is set up for the protection of small children.

These speeds are creating a situation which may force administrative officials to close M. Bishop road all day, a recent statement by Karl’s Shoe Store Ltd.

Many drivers are ignoring double line which are a major measure in identifying dangerous areas. It is a two-way practice to pass over a double white line, Deke emphasized. Each month the security department will check certain infractions of laws, the security officer added.

The department will check the absence of license plates, license taken off, poor brakes and noisy exhaust pipes.

Veterans Receive Insurance Hints For Reinstatement

Four helpful hints for veterans who wish to reinstate lapsed National Service Life Insurance term policies were offered today by the veterans' insurance service administrator.

1. If possible, the policy should be reinstated as soon as possible, but not later than three months. It might be desirable to require administratively more time to reinstate the insurance.

2. All questions on the reinstatement application should be answered. Failure to do so means a delay in regaining insurance protection.

3. The application must be dated. If not, it is not valid.

4. The application must be received by the Veterans Administration within five days. If the postmark is later than five days of the date on the application, a new form will be required.

5. Premiums are required for reinstateTTM. The policy must accompany the application. Unless premium payments are mailed to VA within five days, VA cannot reinstate the insurance.

ON-FARM TEACHERS

The Bureau of Agricultural Education has recently announced the on-the-farm training program. Applications are due before January, 1950.

Service Dividends Begin After Jan. 1

The Veterans Administration has announced that there is no possibility that any check is payable from the special National Service Life Insurance dividends to be mailed before January, 1950.

The VA is working overtime to get dividend checks to the veterans entitled to them. The first checks to be dispatched sometime around the middle of January.

An estimated 16,000,000 veterans and service men are entitled to a share of the $2,000,000,000 dividend fund. One payment period is expected to go into the mails at the rate of $100,000 per working day.

NEW PRICE!

Penney's Pushes the Price of These Rayon Twill Down Again

President Lists Smoking Rules

Veterans Administration lists the following regulations issued by the recreational council, effective immediately, in regard to smoking on campus.

1. No smoking in classrooms or laboratory laboratories between 8 a.m. and 5 p.m. or during evening classes. This does not apply where a room is used for a scheduled club or similar activity.

2. No smoking in outdoor laboratories where, in the opinion of the instructor, a fire hazard exists.

3. No smoking in library or gymnasium, except in offices and library conference room.

4. No smoking in cafeterias except special occasions such as banquets.

AT PENNEY'S
Colts Follow Suit, Drop 24-14 Contest To San Jose Frosh

By Ray Rasmussen

Following in the footsteps of the Cal Poly football team, the San Jose State Frosh football squad went down to defeat by the foursome of the San Jose State Frosh on Saturday night. The final score was 21-80 to the Frosh squad.

The Mustangs, who scored first, were able to break through the Frosh line for a 16-8 lead at the half-time mark. The Frosh, however, were able to hold the Mustangs to a 21-16 lead at the end of the third quarter.

The Frosh, who are composed of freshmen only, scored four touchdowns, with two-yard efforts by Frank Rasmussen and Jack Buttich. The third touchdown was a 24-yard pass from quarterback Decker to end Jack Buttich. The Frosh scored another aerial, making the final score 21-80 in favor of the Frosh.

The game was hard-fought, and both teams had several opportunities for touchdowns. The Frosh, however, were able to capitalize on their opportunities, while the Mustangs were unable to score.

The Frosh are scheduled to play their next game on Thursday, November 10, 1949, in Poly Junior college in Poly Field. About 400 members of the team participated in the festivities.

The Mustangs, who are composed of sophomores, will participate in the festivities as well.

Top Teams, Performers Highlight Mustang Sports History

Throughout its nearly half century history, Cal Poly has produced many outstanding athletic teams and performers. Most records of contests prior to 1928 have been lost and can be found only in the year books of the graduating classes. Therefore, most of the information contains only athletic teams and performers from 1928 to the present.

In 1928, Al Agosti was appointed head coach and handled the Mustang gridiron teams until 1933. He has been more fine teams represented at Cal Poly since its earliest days. Coach Agosti's stalwarts guarded as the greatest of these programs and have successfully opposed the men and lost several leading players in the post-season bowl games.

The squad of 1948 has generally resulted from the success of the Mustangs in the last years. In 1948, Don McLean was appointed head coach and handled the Mustang gridiron teams until 1958.40. The squad of 1948 was generally regarded as the greatest of those clubs. Coach McLean's experience and coaching ability were the reasons for the success of the program. The result was a dominant half-century history, Cal Poly has produced many outstanding athletic teams and performers.

The most successful season ever was in 1948, when the Mustangs defeated Whittier eleven last week and partially restored prosperity. The squad of 1948, 1943, 1941, and 1939 had the best seasons. Doubtless, many fine athletes and teams performed for the Green and Gold during those earlier contests.

Football was first introduced at Cal Poly in 1910. Prior to this date, rugby was the only sport featuring quality contests. From 1910 to 1920, Mustang eleven's performed mainly against high school teams and athletic clubs. In 1916, A. F. Agosti was appointed head coach and handled the Mustang gridiron teams until 1920. Much of the opposition was provided by high schools and junior colleges.

The most successful season ever was in 1928, when the Mustangs defeated Whittier eleven last week and partially restored prosperity. The squad of 1928, 1925, 1924, and 1920 had the best seasons. Doubtless, many fine athletes and teams performed for the Green and Gold during those earlier contests.

The astounding upset of un unbeaten Mustang eleven of 1948, defeated Whittier eleven last week and partially restored prosperity. The squad of 1948, 1943, 1941, and 1939 had the best seasons. Doubtless, many fine athletes and teams performed for the Green and Gold during those earlier contests.

Old Grad's Return
For Conclave

(Continued from Page One)

Brownlee said a nominating committee composed of M. G. Martinsen, chairman; Albo Taggart, Wayne Jones, Irwin Howard and Fred Brown would have a slate of new officers to announce.

Before the general election meeting, all alumni members will congregate downtown near the courthouse to witness the Homecoming parade. The parade is scheduled to pass the reviewing stand at the courthouse at 3:30 p.m. All such members will gather at Poly Grove for the traditional hayride, square dancing, ice cream social and the elation experience of dancing and eating.

Approximately 150 students are currently enrolled in the Poly architectural major. Sixty-three of these are freshmen and 33 are seniors, according to George Brown, chairman of the building department.

By February, with the arrival of a new instructor, there will be five men teaching the student architects. Priestly Brown, William Ricker and Hans Meyer comprise the present instructional staff.

Campus architects have their own departmental offices. The present student dorm was recently converted to an architecture unit. Architects are now engaged in designing and constructing furniture.

Priestly Returns From West Coast Convention

Ralph B. Priestly, architectural engineering department head, returned yesterday from the annual West Coast architectural conventions and meetings in San Francisco. He attended the convention with the American Institute of Architects, inspected the many new private homes and business buildings at the downtown events.

Approximately 190 students are currently enrolled in the Poly architectural major. Sixty-three of these are freshmen and 33 are seniors, according to George Brown, chairman of the building department.

Carroll Molyneaux, chairman of the architectural department, said Priestly has been engaged in traveling throughout the United States and Canada, meeting with architects and architectural students in Canada and the United States.

Molyneaux said that Priestly has been working on a number of projects in the architectural field, including the design of a new high school in the San Francisco area. He has also been working on a number of projects in the area of urban planning and community design.
