State Board Meets Here Two Days

Aerobics Industry
Students Prepare New Installation

By Raymon Young

In lieu of the expansion project of the aeronautics department at California Poly, the construction of the construction section of the aerobics industry will begin with the new school year. The new hall will house a large technical-school section for students majoring in aeronautics. The facility will be dedicated to developing the nation’s aeronautics industry.

Shepard New Ag Dean

When Vern M. Shepard takes charge of the new agriculture program at California State Polytechnic college this summer, he will bring to the rapidly-growing aeronautics program of the state technical colleges a unique background. He was director of the Reclamation Office in Bakersfield. Shepard, who has been extension specialist in animal health and the Reclamation Office at Shasta Dam, will be in charge of the aeronautics program at Cal Poly.

The State Senate Committee

The State Senate committee on the State Training School for Boys and Girls was installed in the city of Modesto. The committee’s members are: J. Everett Walker, president from Modesto; L. R. Richey, Assistant Professor of Agriculture, Atwater; Louis S. Holley, chairman, and W. E. Dillingham, Pioche. The committee was installed in the city of Modesto.

Aeronautics Dept.
Has New Instructor

David H. Meeker, head of the aeronautics department, recently announced that he has been working on the design of a new type of airplane. The design is expected to be delivered in the near future.

M. E. Department
Receives Diesels

Four large Diesels engine generators, recently given to Cal Poly by the government for the instructional purposes, are now available. They are used in the new technical school for training in engineering and mechanics.

New Baseball Outfield
Soon to Be Seeded

A new baseball field will be installed by the staff of the Engineering department. The field is expected to be ready for use in the fall of the year.

Low-Flying ‘Saucers’ No Phenomenon to Poly Campus

By Stanley E. Hall

The recent allegeds of aero-technical flights over Cal Poly campus have been attributed to the “UFOs” or “sightings” of unidentified flying objects. The phenomenon is considered to be a natural occurrence that is not a serious threat to the safety of the campus.

Poly Host to Cadet Ag Men

Cal Poly is playing host to thirty cadet teachers who will be here until August 1, having arrived on June 30, to further their training in the field of vocational agriculture.

Swich List

By Donald Miller

How many trains pass Cal Poly during a 24-hour period? The answer to this question is likely to vary depending on the time of year and the day. The image does not provide a specific number for this question. However, it does mention that the campus is surrounded by several streets and that there are numerous trains passing through the area.

In this image, Donald Miller, the editor of the El Mustang newspaper, discusses the campus being surrounded by many streets and the numerous trains passing through it. He also mentions the importance of trains in the campus's operations, such as the movement of students and staff to and from class and work.

Who Gets The Blame For This?

At the present time Cal Poly has an enrollment of over 600 students, and the student body will change the campus from its present condition of suspended animation into a wide-awake, lively body. It is up to you.

Philling-in with Phillip S. Pace

Being new at this newspaper, I have taken the liberty of writing a short editorial, the first one, to-day at Cal Poly, there are a few things that I'd like to get off my chest. I am pleased to note that the student body is more alive today than it was yesterday. All other-athletes' school would every once in a while get up and do something. Now that we have a weekly fish-bowl? I believe me, a show, a change for the better. I am not sure of my attitude. But there is another thing, I have a wish that we all stay stopped, and that is that we don't care too much about people subject to. I stopped my pedal power and thought of the effect that the effect of the fish-bowl has on the modern youth. Reality is that the effect of the fish-bowl has on the modern youth. Reality is that the effect of the fish-bowl has on the modern youth.

When I say that we are all on a helicopter ride in a semicircle, I don't mean that I am going to prolong this discussion beyond the ten minutes as I have planned to do. There is another thing around here that is great for writing in. The way the campus is going, is going to be great for writing in.

So far, the students report, that in the last few months the students have been trying to get away from the normal school schedule and are searching for ways to keep their minds active.

INTERUPTED COURSE

When a train's course is interrupted by a collision, or by the effects of other valid reason, or if a train's course is interrupted by the effects of other valid reason, a train service is disrupted. The F. V. A. Training Officer at Cal Poly, who has been in the V. A. office in the basement of the Administration Building, has been working with the students to find a way to keep the classes going.

For the first ten days they were on the ranch, they played, learned, trained, and enjoyed themselves. Next, they surveyed and planned for the hay markets, following their previous studies. They have acquired many useful skills in marketing and hay management.

Union Oil vs. Poly Beachcombers

Disaster struck at the very roots of the Poly Beachcombers. The group, which is known for their love of the beach and waves, was involved in a crash that killed one of their members. The reports indicate that the crash occurred during a practice session at the beach, and that the group was practicing their surfing techniques.

Union Oil, a major oil company, has been involved in numerous lawsuits over the years, and is well known for its deep pockets and resources. The company has likely already made plans to fight the group's claims, and may attempt to settle the case out of court.

Swich List

By Donald Miller

How many trains pass Cal Poly during a 24-hour period? The average at this time is 200. The figure is based on recent observations and includes trains passing through the campus.

The train service is crucial for the campus, as it provides transportation to and from class and work for students and staff. The trains also play a role in the campus's overall operations, such as the movement of goods and materials.

The train service is also important for the local community, as it provides transportation to and from the campus and surrounding areas. The trains are a vital part of the campus's infrastructure, and their reliable operation is essential for the smooth functioning of the campus.
On the other side of the world, a group of students was gathered in a classroom, their eyes fixed on the blackboard. The professor, a stern figure with a white beard, was lecturing on the principles of dielectric heating. He explained how the electrical conductivity of a medium changes under the influence of an external electric field. The students, dressed in formal attire, took notes meticulously, their minds filled with the wonders of physics.

The professor's voice echoed in the room, punctuated by the occasional question from a student. The air was thick with the scent of ink and damp paper. Outside, the world was a blur of motion, but here, in this moment, the students were cocooned in knowledge.

The day ended with a quiet满意的silence as the students packed their bags and filed out of the classroom, each lost in thought. The professor stood at the door, watching them go, his mind already preparing for the next day's lecture. Outside, the sun set, casting long shadows and painting the sky with orange hues. The day was done, but the learning journey was just beginning.
State Provides Revolving Fund For Yet Housing

By E. B. Richards

The legislature has passed, and the governor has signed, chapter 27, statutes of 1947, appropriating $1,000,000 to the state department of finance as a revolving fund for the purchase of surplus army, navy, and other buildings which in turn will be leased to veterans for conversion into housing for veterans. The $1,000,000 will be on a cash basis. All sales to veterans must be made on a first come, first served basis. This sale may include furniture and fixtures. Because of the necessity of replenishing the $1,000,000 revolving fund, all sales to veterans must be on a cash basis.

Library Info.

By John Colonist

"It's the Same Old Story," I am sure the proprietors of the store have heard this song, but Alouise Whitman, head librarian in high hopes that this time will soon be changed. Whitman reports that the state reserve datum office in Sacramento hopes to be able to submit the plans for the new library building for bids by the contractors within a short time. Application for certification and authorization forms, in the event an applicant desires to employ a builder to remove the building he now owns, may be had at the County Service office, 967 Osos Street. All buildings will be sold intact, and it is the responsibility of the individual or contractor to remove the building from the site.

Sixth Army Reserve Gp. Meets Here

At 7:30 p.m., tonight, in room 111, Administration Building, the 66th Organized Composite Group was created under Sixth Army orders (Sixth Army is headquarters for reserve matters in this region) and is composed of all ground and service force officers holding reserve commissions in the Army of the United States who reside in this area, San Luis Obispo and northern Santa Barbara counties, headquarters for reserve matters in this area, and northern Santa Barbara counties, is composed of all ground and service force officers holding reserve commissions in the Army of the United States who reside in this area, San Luis Obispo and northern Santa Barbara counties, (Sixth Army is headquarters for reserve matters in this region) and is composed of all ground and service force officers holding reserve commissions in the Army of the United States who reside in this area, San Luis Obispo and northern Santa Barbara counties, is composed of all ground and service force officers holding reserve commissions in the Army of the United States who reside in this area, San Luis Obispo and northern Santa Barbara counties, is composed of all ground and service force officers holding reserve commissions in the Army of the United States who reside in this area, San Luis Obispo and northern Santa Barbara counties, (Sixth Army is headquarters for reserve matters in this region) and is composed of all ground and service force officers holding reserve commissions in the Army of the United States who reside in this area, San Luis Obispo and northern Santa Barbara counties, (Sixth Army is headquarters for reserve matters in this region) and is composed of all ground and service force officers holding reserve commissions in the Army of the United States who reside in this area, San Luis Obispo and

Student Wives Plan Dance for July 18

Blue Drake, chairman of the dance committee, announced that an informal dance will be held for all married students at Hillcrest Club Room on July 18, at 8:30 p.m. Admission is 75 cents. The dance committee consists of Cecile Heidl, Alva Olsen, Madalyn Hickman and Jane Shultz. Tickets may be purchased from any committee member or at the Poultry Unit. Refreshments were served by Dorothy Avery and Billa Griffin. The next regular meeting will be held at Hillcrest on July 17, at 8 p.m.

Additional Trailers For Married Students

More married veterans will soon be housed in trailers on the campus according to information received from Bill Troutner, head of residence students. The 188 trailers, now located at San Miguel will reach Poly on a loan basis from the federal government. They will not be the property of the school. The trailers, originally part of a temporary federal housing project, should be ready for occupancy by September 1.

Drive safely and live longer.
