Students Get Break; Fall Term Card for $7.50

Student Body cards, good for all student activities during the fall quarter, are now available for $7.50. These cards were authorized last Tuesday by the Student Affairs Council to help out those students who wish to make use of student cards and who could not afford the price of $10 at the start of the quarter.

John Beaton, student reporter, announced that these student body cards are available to those students who wish to take part in any of the activities of the Associated Student Body. He also pointed out that student body cards are required to attend Inter-Club events and that anyone having a full year card will be allowed to enter the new Recreation Building.

The members present were asked if any student wishes to join an organized club or society. If any student wishes to participate in any Inter-Club or organized clubs or social events, he will be able to enter the new Recreation Building.

The Inter-Club Card will be issued to those students who wish to take part in the activities of the Associated Student Body. Either student body officer or faculty member must sign the card in order to make sure that their respective cards are corrected. The Inter-Club Card will be issued to those students who wish to take part in the activities of the Associated Student Body.

Free instructions are given and if any student finds the Inter-Club Card card corrected, he said.

MODERN VERSION OF "LITTLE RED SCHOOL HOUSE" . . . This Curtis Commando (C-48A), big ship landed on the airstrip, it was her last flight. Although she is airworthy, government regulations will prevent her from flying again.

By Guy Thomas

Falls Both Branches

The enrollment of this fall term is the largest for both branches of the Polytechnic College. Of this figure 1040 are service grants.

Fills Both Branches

The final enrollment figure for the west side of the new building will be provided under the seating area.

The present basketball court will be modified as follows: The floor of the east court will be lowered to the playing level and the present court will be moved to the west court. The new court will be the last court to be completed.

The new trailers for which married students living off campus will be provided will be used for this purpose for approximately 600 to 800 students. Room rents and storage space will be provided under the seating area.

A wooden cabin shaped trailer is planned for the baseball field with a seating capacity of approximately 150 to 180 people. The trailer will be used for the holding of the baseball games.

The present basketball court will be modified as follows: The floor of the east court will be lowered to the playing level and the present court will be moved to the west court. The new court will be the last court to be completed.

New Welding Lab Methods, Equipment Modernize Shop

By Dick Simpson

Utilization of present equipment and new equipment soon to be installed will give Poly one of the most modern and best-equipped welding shops in California, recently stated R. C. Wiley, welding instructor. Instruction is given in both city-arts and ars-artikelng as related to the four major engineering courses. "This truly covers the practical and theoretical approach to the subject and also the need for trained welding operators but that each student must assume responsibility as a welding technician," Wiley said.

Former production equipment will be ready at the present time, or soon to be installed, includes the following: A production weld positioner and a production weld spot welder. This is in addition to the gas welding, arc welding and cutting equipment already in use. Two new welding processes are to be introduced, Plasma Arc and Organic. Also of interest to welding students is an article by R. C. Wiley, welding instructor. Instruction is given in both city-arts and ars-artikelng as related to the four major engineering courses. "This truly covers the practical and theoretical approach to the subject and also the need for trained welding operators but that each student must assume responsibility as a welding technician," Wiley said.

Seaton-Seats Reopen Inter-Dept. Meet

Don Seaton, student body vice-president, presided over the first meeting of the Inter-Departmental Council, held September 12. The membership of the council is composed of the president of each departmental club, the vice-president of the Associated Students, who acts as chairman, and one faculty member from each division of the college curricula.

Robert Moore, Ag. Engineer, and Stanley Thompson, Mechanical Engineer, were elected to serve as temporary delegates to the Student Affairs Council. These delegates will serve until the clubs form a permanent council.

Present at the first meeting were: Jack Turker, Polycity club; Chuck Burroughs, Ornamental Metal, and Roland Wentsel, Los Lecheros; Jack O'Connell, Aero, Loren Hill, Engineers, and Jack Danforth, Agriculture, were elected to serve as temporary delegates to the Inter-Departmental Council. Seaton and Thompson.

Aero and Agriculture Scholarships Open

By Herb Winn

Scholarships are available to students, both freshmen and advanced, who need financial assistance in order to complete their college education, announced J. I. Thomson, agricultural coordinator, and technical advisor to the Bureau of Agricultural Education.

Freshmen scholarships are granted to those students who have had home farm projects in connection with their high school F. F. A. training. Advanced students may be eligible for awards if they have completed one or two years of work here at Poly. These are available to aeronautical and agricultural students. Applications should be made through the students' department head.

Collegians, Glee Club, Band Clear for Action

The three major organizations of the music department started the year in a big way last week when all of them took large turnouts. The "Collegians," Poly's own dance band, the Glee club and the Cal Poly marching band make up the music department's main organizations.

The Glee Club reported the largest turnout with over 100 students singing for the first time. The departmental voices will be made some school owned instruments, as we have some who have played or enjoy playing, indicate the need for other engagements. The "Collegians" will play for all school dances the first three weekends and Fridays. On the Trombones are; Wally Clark, Harry Lowe, Donald Pugliese, Paul Linebarger and Kerby Hawkins will be the guitar. Don Raybourn. On the sax; Wally Clark, Illlton White, Harry Lowe, Dom-}

Radio Engineers
Plan Bay Area Trip

Advanced students in the Electron and Radio Engineering departmenet are starting off the school year with a trip to the Bay Area to attend the West Coast Convention of the Institute of Radio Engineers from September 24-26. This is a national professional engineering meeting with a membership of over 20,000 practicing engineers in radio and electronics.

Many engineers and research scientists will address the convention on television, frequency modulation, radar, and industrial electronics.

Beside attending the convention, the students will also make field trips to manufacturing plants, Stanford University Microwave Laboratory, and Moffett Field. Plans call for staying over Saturday evening to see the exhibits of the West Coast Electronic Manufacturers display.

Auto Wash, Repair Ramp Opens

By George Tallman

The long standing need of a suitable place for students to work on their cars has been alleviated, according to Eugene A. Egan, Dean of student welfare. Recently the student foundation has allocated funds for the establishment of an area where students may do any necessary work on their automobiles. The newly designated repair and service lot extends from the campus exchange east, and directly south of the old homes here.

Equipment furnished by the school will include a concrete slab for washing or hosing, work benches with ample room for your tools, electricity for power tools and light and large drums for tire, and rubber, also.

It is requested that no student drain oil or grease, or make any adjustment or repair on his vehicle away from the authorized repairs. The use of the facility is open now.

Care found on campus in a condition of repair will be moved to the designated area by wrecker, and expenses of moving charged in the repair.

Grid Team Tempe Bound

Mustangs Meet Bulldogs In First Season Game

Three teams of spirited Mustangs will enthrall at noon today for Tempe's first home football game. Coach Chuck Pavlik is expected to unleash an efficient passing and a quick-breaking running attack to oust the Arizona State:".

Lead quarterback is John Fitzgerald, center; Halfbacks are Marshall Samuels and Byron Culver and Gene Frinell,

Rely Bloom, varsity RB, Mary-Kate, Pre-flight player, has enrolled as Cal Poly and will bolster the forward wall. Bob Bennett, varsity RB, has been drilling Jack Bolton as a utility tackle and Chuck Hoffman as a center.

Whether the coaches will interchange two-stripe teams offers another clue. Depth is to be seen. However, with five players of speed and width open offensive show is definite.

The probable starting line-up of Bob Griffin and Jack Bolton at the ends; Marshall Samuels and Dan Vail, RBs; Halfbacks Joe Griffin and Bob Bennett; guards; John Fitzgerald, center.

With Byron Culver and Gene Frinell as a center.

**Plan 15 Sports for Intramural Program**

All dormitory and club representatives are asked to attend an important organizational meeting for the intramural football to be held this evening at 7:30 p.m. The athletic office (gym).

**The backfield, combining speed and power, will feature Bob Spitzer and his running mate Stan Evers at halves, and tricky signal caller, Gene Maestro, from Los Angeles, at quarter.**

**The Cadets are flying again!**

The U. S. Air Force now offers you the chance of a lifetime to start your career in aviation.

If you want to learn to fly, you have one of the finest opportunities ever offered in peacetime. Aviation Cadet pilot training has been opened to qualified applicants presently serving enlistments in the Army, and to civilian young men who can meet the same high standards.

In order to be eligible, each applicant must be:
- a single male citizen, between 20 and 26 years old.
- of excellent character and physically fit. He must have completed at least one half the credits leading to a degree from an accredited college or university, or be able to pass a mental examination given by the USAF. He must now be living within the continental limits of the United States.

Upon successful completion of the training course, Cadets will be rated as pilots, commissioned Second Lieutenants, and assigned to flying duty.

Reactivation of Aviation Cadet pilot training is only one of the several choices open to outstanding men who want increased responsibility and advancement in the field of aviation. It is now possible for qualified men to apply for attendance at USAF Officer Candidate School—and thus be able to equip themselves for such important specialties as engineering, armament, administration and supply.

You have a real chance to make progress and build a sound career for yourself in today's U. S. Air Force. Talk it over with the Recruiting Officer today at any U. S. Army and Air Force Recruiting Station.
Funerals Are Expensive

The subject of campus safety is an unpopular one and any printed material we are pertaining to safety is often lumped together with propaganda or regulations which involves itself to the students' welfare.

There are various reasons for this lax attitude, but the main reason is the student body's reluctance to accept the responsibility of carrying out personal safety measures. We have been fortunate in that so far there has been no serious traffic accident on the campus, but a continued perfect traffic score is no small accomplishment.

Associated Students needs your support, your membership. Its operations and activities require your government, is a major factor in your education. It is a part of your responsibilities to your government.

- Learn by doing; join today.

Iowa State Becomes Loser While Poly Dairy Gains

By Edward O. Boettcher

"Cal Poly shows a very definite trend of progress and a bright future ahead of it," stated Elmer N. Hansen, Cal Poly's newest addition to the Dairy Production staff, who arrived here on September 1st, from Iowa State college.

Mr. Hansen was born in Minnesota and received his education at University of Minnesota, College of Agriculture. World War I interrupted his college career when he entered the U.S. Marine as a member of the Second Division. At the end of the war he returned to college, working his way through, milking test cows.

In 1923 Mr. Hansen came to California and was employed by the Golden State Milk Products Company for a period of 18 months. He returned to Iowa State College at Ames, Iowa on a scholarship for his graduate work. In 1925 he accepted a position on the Dairy staff at the University of Nebraska. He held this position for four years, having there in 1929 to go to the Dairy Department at Michigan State College. In 1939, he returned to Dairy Department at Iowa State College where he remained until this year.

Just before coming to Cal Poly on September 1st, Mr. Hansen spent a month with the American Guernsey Cattle Club at Peterboro, New Hampshire in organizing their type classification program, judging 1000 head in four different states. He has judged four times at the National Dairy Show and several times at the Dairy Congress and at state fairs throughout the country. Since 1923, Mr. Hansen has coached twenty dairy judging teams for the National Dairy Show. Fourteen won first place at the Cattle Congress, eight teams placing first in the Dairy Show.

Mr. Hansen had this to say about our school. "I am very enthusiastic about Cal Poly and the practical set up that you have here... I have seen college herds at Cal Poly better than those found at almost any other schools. The Halbert herd is superior to any college herd I have seen. My entire family is enjoying the fine climate, courtesy and hospitality of the people of California."

New High Speed Press Installed In Print Shop

by Donald Miller

A new Kelly press, the most recent addition to the Poly printshop, has begun its operation by rolling off football schedules. The new press embodies the latest in press design and is capable of making 5,000 impressions an hour.

The press will be used for high quality work heretofore impossible in the Poly printshop, such as color work and close register work, and will be used to print this year’s annual, “El Rodeo.”

According to A. M. “Bert” Fellows, printing department head, the new press does not take the place of any of the present equipment, but actually enlarges the scope of work taught in the printing course and definitely increases the printshop facilities.

Fellows stated further, “The erection of this precision machine was supervised by Jim H. Crowder, who works directly out of the factory. Crowder, better known as Dan, was extremely helpful in reorganizing the relocated printshop as well as in giving instruction on the new press.”

Change Of Program Deadline Announced

Students wishing to change their programs for the fall quarter must do so before 5 p.m., Sept. 30, it was announced this week by Paul C. Winner, assistant dean of admissions, guidance and placement.

After this date students should not plan to add courses to their programs, but will be allowed to withdraw from any course with a grade of “W,” provided the student is passing in the course at the time of withdrawal. Any student who drops a course in which he is not passing will receive an “F” in the course.

Reserve Officers Dine, Dance Tonight

The Piedmont chapter of the Reserve Officers Association will hold its regular bi-monthly dinner and dance tonight at 8 p.m. at Mattie’s, in Shell Beach. Refreshments will be served from 6:30 p.m. Guests are optional for the ladies, but gentlemen are requested to wear class “A” uniforms.

The $2.25 per plate cost will include tax and tips. All reserve officers, whether ROTC members or not, are cordially invited to attend.
