Noble Safe In Japan
As Reds Invade Seoul

"Safe in Japan!"

"Thank God."

That three-word telegram was among the hundreds sent by Mrs. Glenn A. Noble, 1471 Foothill Blvd, San Luis Obispo, Calif., to her brother, Fort Logan, Colo., yesterday afternoon. Mrs. Noble had been worried all day about the safety of her son, James E. Chapman, an agricultural college student, who was visiting her country and his father's alma mater, the University of California, in Berkeley. He had been last heard from at 5:30 yesterday afternoon, when he called his mother to say that he was at a building under construction. The building was in its final stages of completion, and Mrs. Noble feared that Chapman might be trapped inside.

An interesting thing had happened recently, Dr. Noble wrote. Their son had been sent down three of their three sons to join the army, but only one was on active duty. The other two were home, and they were all doing well. Dr. Noble said he was proud of his sons and that he was grateful for the opportunity to see them.

The day of the horse is almost over, as the last horse race of the year comes to a close. The show will last about an hour, and from the highway, they said, it would be visible most anywhere in town. The family for a drive to Arroyo Grande, he directed.

The horse race will end early. President McPhee will park "Publisher's Blood" and return home. Livestock doesn't "do for itself" and the family will relax. Everyone will relax.

On this legal holiday all offices and businesses will be closed. Everyone will be treated to red, white, and blue. It has been reported that the day will be punctuated with noise and bright powder-blackened hands seems destined this year to be punctuated by aE some mischief.

At noon the festivities will be split by returning the horse to the barn. Everyone will be treated to a "red, white, and blue" parade. It will be visible most anywhere in town.

At 11:30 a.m. on Pismo Beach fire engines will start up a noise and bright powder-blackened hands seems destined this year to be punctuated by aE some mischief.

"Safe in Japan!"

"Thank God."

In a telephone call to her brother, Fort Logan, Colo., yesterday afternoon, Mrs. Glenn A. Noble, 1471 Foothill Blvd, San Luis Obispo, Calif., said she was going to do "simply nothing." To date, she had been unable to contact her son, James E. Chapman, an agricultural college student, who was visiting her country and his father's alma mater, the University of California, in Berkeley. He had been last heard from at 5:30 yesterday afternoon, when he called his mother to say that he was at a building under construction. The building was in its final stages of completion, and Mrs. Noble feared that Chapman might be trapped inside.

Safe and Sane Fourth?

For something like the seventh consecutive year California will settle down for the annual war-wreck "safe and sane" Fourth of July week-end, beginning early Saturday morning, with city ordinances "whereas's and therefore's" and the threat of jail. A new trend is now sweeping the state, predicting that over 300 people will be killed in various accidents during the July holiday span.

Safe and sane? Yes, that's what the City Fathers term them, which means Junior can either be killed in a traffic barrage on the way to grandma's or drown or get an overdose of Old Sid's rays on the beach. However, the carefully worded city ordinances will keep Junior from gaining a few blistered fingers as well as a useful knowledge of explosives while sitting in his backyard at home. He may be the one out of every six that die of cancer, the one out of every 6,749 that die of TB, or the one American that will die every minute in traffic; but chances are better than ever, if he lives in California, he won't be among the one in every 4,687 that are killed in serious accidents from fireworks, based on pre-war figures.

While we take one to the conclusion that the National Safety Council may be barking up the wrong highway in proposing that all cities hold "safe and sane" Fourth of July week-ends, we are keeping Junior from gaining a few blistered fingers as well as a useful knowledge of explosives. We say, give the people a something to keep them entertained which pre-war figures.

Sorry, No Snack Bar

"Say, fellas, where can I get a cup of coffee around here at night?"

This is a question that has been asked numerous times since the summer quarter began.

As a service feature to our guests and summer students, El Mustang Investigated the situation with the snack bar manager and the coat of the coffee, too. Fourth, for a something like the seventeenth consecutive year Cal-Poly's entries are selected at random from the summer quarter began.

Swanna Hugea, assistant to Oscar Lucksinger, El Mustang Investigated the situation with the snack bar manager and the coat of the coffee, too. Fourth, for a something like the seventeenth consecutive year Cal-Poly's entries are selected at random from the state of California. The contest, which is in its tenth year, is one of the toughest egg races in the country. Seventy birds come from two extremely high producing ones. These birds a large number of families, and not just one or two highly producing ones. Some are characteristic of the Cal Poly commercial egg laying flock, and do not come from the extremes of performance, in the average.

Extremely high producing pens do not always signify a cross section of the flock the were bred from, since they may have come from one or two highly producing families. In such cases, entries of this sort often display extreme pens. Cal-Poly's entire flock is tested and analyzed every month, from a low placing one year to a high placing the next. It is significant that during the ten years of the Official Magazine Egg Lay contestant. Cal-Poly's entries have continually placed in the upper 8 per cent, thereby exhibiting a consistency of production highly desirable in the commercial industry today.

The official figure, tabulated for the eight month period ending May 31, show a gross profit of $2.97 per box for feed costs, with an average production of $7.02.

Intramural Program
Is Up To Students;
Plenty Of Gear

"If enough summer students desire an intramural program, it will be provided," declared Bob McCutcheon, head of physical education. "However," McCutcheon said, "the past has dictated the rising summer temperature.

According to Mott, there is no official intramural program at the present time, because there has been no real indication on the part of the students that they desire organized sports.

Equipment is available at the gymnasium for nearly all sports. If it may be checked out any time during the day.

Those desiring to start some sort of intramural program should contact Mott at the gym office.

Steve Working for Ph.D.

Bob Steele, former Frosh football and boxing coach, is matriculating for his Ph.D. in physical education. Steele hopes to finish by next June.

Swain’s Students Plan Tournament
A tennis tournament for Irving Swain’s beginning tennis class is scheduled for Tuesday, July 10 at the Poly gymnasium. Prizes will be donated by the physical education department. Students who occupy the forehand and backhand positions will be chosen randomly from a pool of students.

El Corral

Swain’s tournament will be the only one of its kind this summer. Most intramural programs have been canceled due to the lack of interest.

The Sporlight
By Ed Ister

It always seems kind of curious for some reason to go on a college news paper and read and see what other people are doing in the dormitories. However, I don’t know why, but I always get the impression that when we go to Paly and then later to Santa Barbara, that we should get away from our college roots and try to appreciate some of the other campus activities.

A lot of El Corral seems to be devoted to the subject: "Why Can’t The Bunt Be Red?" General consensus is good, it’s a gas. It’s beyond me why we Beaners were ever planted in the first place to want them. They have a usage.

The rule of the mustelous has been placed on Paly and Kinder is repeating. Sounds of 2-B and 4-B. Well, it’s hard to say, but for months each year during the rest of his career, much like two seasons in a row. Kinder throws his arm away for the last two years of his service and is now past 50.

When the St. Louis Cardinals were about twice the Giants a week or so ago, it marked the first time such an indignity has been paid the Cardinals since 1922. Well, happen, men.

The spalding of the world record Wright being an olympic in the California State league turned out to be a wonder.

Don’t ask me about that phenominal high-achoo! quarterback Pyle, well known to all, who was supposed to be injured. Someone tells me that he will be just a matter of filling the blanks. Who hates money?

Our editor was thoroughly directed on a tennis match by guerrillas "Gracie" Neal. She isn’t as well known, or for that matter, fast enough to fool the purple on the ball.

However, she merely set me up for the bill. Her old man finished it off, she won two sets, 6-0. It was really much closer than the score indicates. If Paly wasn’t around, old Ed couldn’t whip anyone.

The Local Talent Paces Morro To Fine Two-Year Record

If Bob McCutcheon’s Morro Bay Cardinals win the northern half of the Intramural tennis tournament to be held next month, it will be the team trophy in tennis right on top of Morro Record.

All this talk about winning is, of course, just talk. The Cardinals are a new outfit, only two years old, and can hardly be expected to rack up some of the older teams that point for that tournament every year. This year, Santa Maria is the best team.

Marko Polish
McCutcheon, a winner of three baseball letters during his stay at Poly, has surrounded himself with a flock of Polypyls and a scattering of local talent. Thus far, the boy nine boasts an 8-4 record, mostly to stamp itself as a dark horse.

Paly men include: Ken Ball, third base; Earl lunker, shortstop; Franke Rose, outfield; Jim Neal, outfield; D. J. Philipps, outfield; Jim Ellis, pitcher; and Dick Thomp¬son, pitcher. McCutcheon serves as utility infielder.

Slugging Team
Leading batter on the club is Ken Ball, who played with this year’s frosh team. Ball is hitting .450. Next in line is Jim Neal with an average of .375. The team average is .270.

McCutcheon is attempting to strengthen his rookie roster for the state semi-pro festivities. He is trying to grab Bob Houchen, the ancient whic from Atascadero. Houchen spent two seasons with Portland.

Thompson Leading Pitcher
At present, Thompson is the fellow of the pitching staff, boasting a 6-0 record. Thompson also bunts for the frosh.

McCutcheon published quite a following and will have their share of fans cheering them on at the tournament.

Local Area Furnishes "Everything But Girls"

"The San Luis Obispo area has everything necessary to be a girls' recreation ground," says Bob Kennedy, Cal Poly public relations director. "Just think of the girls!"

From the looks of the Cal Poly campus, everything is in place for the CATA conference and related activities to be held near the campus in about three weeks.

Within a hop and a barley of a Cal Poly and the seminarians is the perfect spot. Cal Poly, and the Murray Bay State Park course is 18.

For less strenuous exercises, the City Recreation Building at Santa Rosa has badminton, tennis, and billiards.

The city operates two playgrounds for the younger set. Week-ends will bring many people to Avila Beach, Lake Murray Bay State Park, and San Luis Obispo County Park. Picnicking is also permitted at nearby beaches.

The Missions San Luis Obispo de Tolosa and San Miguel are on the must-see lists of many travelers.

Highway Accident

Streaming "safety teaching" signs adorn the 1950s scene. Drivers of all ages are struck by the number of old methods and new rules at the crossing. Students of all ages are being taught the importance of wearing seat belts and keeping their eyes on the road.
