Call Of North Korea Answered
As Seven Students Report

The Korean War is beginning to show its effect upon Cal Poly population. So far this quarter seven men have been drafted to go over the call of duty, or the draft board has received more applications for service.

Those who left are: Lee Johnson, active duty; Kirby Robinson went in for the Marine Corps which follow the same pattern. Also, students on their way to the draft boards, and so far this quarter seven men have been given their papers. All old students who were present for this regular meeting were given their authorization papers to enroll for the Fall Quarter.

New Bus Acquired

Students Benefit

Poly has acquired a new bus which has the latest equipment, a special rest room, and an automatic temperature control. Several Poly passengers have already taken advantage of the new bus. It is a great improvement in Poly transportation.

Ground Squirrels

Eliminated By Use Of New Poison

As the gauge is pressed into the ground, a poison mist is set free in the burrow, the poison being the same as was used in the mustard gas war. By the next day the squirrels are dead, and the rodents are held in check.

Expect The Draft? See Welfare Office

If you have not yet received your draft board papers, see me or your advisor. Mr. Meacham, dean of student welfare, has been gaining the signatures of all eligible students.

Chickens For Sale

Students have acquired a flock of chickens which will provide fresh eggs for the Poly campus. The chickens are kept in a special pen and are fed a special diet which is high in protein.

New Crop Of Low Fruit

The students are growing a new crop of low fruit which they hope will be a good one. The fruit is grown in the Poly's experimental garden and is expected to be ready for harvest in the near future.

Registration Sked Released For Fall Enrollment

A Permit to Register for the Fall quarter is available at the Business Office for all old students who were in attendance the second week of the current quarter. All new students who are interested in attending the Poly campus last quarter as part of a buddy drive to kill ground squirrels. According to Van Epps, this plan will work, given the time of registration, the proper authorization papers, and the use of the proper poison. Students cannot be cleared for registration until they have the proper authorization papers at hand. The proper poison is sent to the students who are interested in handling this particular job. Van Epps, who was very interested in the discovery for which there is no specific name, stated that the type of poison is being tested on a small scale.

Ripe Crops Tested With New Gauge

Cal Poly's crop production students are using a new instrument that works similar to a common equipment for testing the ripeness of fruit. According to the instructor, the new instrument will be used in the College of Agriculture to test the ripeness of crops. The instrument is designed to give the students a better understanding of the ripeness and quality of fruit.
Our Manners Are Showing

It was recently called to our attention by an older and wiser member of the Mustang family that while our "upside down" type of education has turned out some valuable men in agriculture, industry and engineering, it is completely falling in one big respect—turning out gentlemen, or at least a reasonable facsimile.

We can, of course, see that many of our rapidly receding halo-line too much recall a freshman address given by President McNair one hot September morning in 1944. We remember specifically his mentioning such things as abusive language and the partaking of meals in the local cafeteria smelling like a member, not a student, of the swine units. We remember very well because we thought it rather strange that men of college age, most at that time quite offer, should have to be reminded of such things.

While the whole matter has been brought to a sharper focus in the last few weeks with the presence of coaching families on campus and now the invasion by PE women, we can only hope that education still looks on the faces of a few while when trying to close a cup of El Corral coffee with their feet for purposes of quizzing students haphazardly and boldly of their latest adventures at Pismo Beach. We could sit, but mention the name of one group moving from a table in the cafeteria when a couple of students came to dinner with a strong agricultural aroma about them. We have established the administration, the age department, or the parents of these students, but no doubt we are well on the way to being forgotten. In the field of social affairs, we write our own public service release. What visitors carry back to their home communities concerning 1 of 1

... (Continued from page one) P.M. Monday through Friday. Over night service 7 a.m. to 8 p.m. on Saturdays and Sundays.

Letters to the Editor

Your last edition answered some burning questions about the library. However, some others wish to ask.

1. Are most of the exterior staircases to the library kept in darkness during the evening study hours? This may be trivial to some, but for the person who suffers a nasty fall, it may mean a broken arm and a doctor bill which he himself must pay.

2. Collections without some suggestions is not too constructive, therefore, I offer the following:

I. Have all the exterior lights to the stairways and entrances to the library turned on during the evening study hours. No light at all might illuminate the stairs as each end of the building.

In the last few weeks with the presence of coaching families on campus and now the invasion by PE women, I expect the administration will find it to be an eyesore happen to be or out which the building.

3. I suggest that future buildings and walks be designed so that stairs and walkways are illuminated wherever practicable. This would provide a much quicker and safer escape than stairs.

Provide some sort of plan or program which will cause for students injured while attending school. Withdrawal from school due to incidents often means the end of college for the unfortunate victim.

Yours truly,

William W. Branden

**THE SPORTLIGHT**
*By ISLER*

Let us give thanks to the powers that be for the rescheduling of the scheduled football game with CCA All-Stars for the reason of the flu. A young fellow named Eddie LeBaron ragged them from the sidelines, and all I can say is that he will be there for several days. Memories of the little redhead still haunt us all in the 1955 era. Stay away from door.

Following that startling upset of the mighty Philadelphia Eagles by the undervalued College All-Stars, many immediately started among the press of taking it easy. The territory that Philadelphia had taken with their victory was quickly reversed by the CCA All-Stars. LeBaron's victory was as complete as it was surprising.

The Eagles' victory appears to have paved the way for the CCA All-Stars to fly a little higher. LeBaron's victory was a step in the right direction. The Eagles' victory was as complete as it was surprising. The CCA All-Stars were able to take a much-needed break after their hard-fought victory over the Eagles.

**Here’s How Visiting PE Teacher Regards Poly And You Students**

"Poly’s boys are not typical college boys; they are more mature than most students on other college campuses," was the present evaluation made by special visitor, Jewell. Jewell is one of the many working teachers who traveled Poly earlier this week. Jewell is now teaching at Roosevelt High School near Long Beach.

Incidentally, man, her phone number is — oh! I promised not to tell. However, I have a suspicion that the statement is entirely true or not. I wouldn’t volunteer to say. However, if this is true, she must be one of the most dynamic on the East Coast. She is certainly not as dynamic as the CCA All-Stars, but she must be one of the most dynamic on the East Coast.

**Football Practice Starts Next Week**

Football practice gets underway Monday, August 18th. That’s the first day from foot grille coach Roy Hughes, who installs the camp.

Candidiates wishing to get a head start on the rest of the field can do so by picking up practice gear on the 16th and 17th at the field house.

Two practice slates will be held during the first week. These workouts will taper off according to the needs of the club.

Hughes stated that he expects about 50 men to report for the first practice at which time he will start selecting the men from the boys. Hughes envisages the first practice to be a fresh chance for Polynians to prove their worth.

Some Guys Get All The Luck; Here's One To Prove It

"You're nuts," and Bob B. Winterbourne is not old enough to vote, but he is old enough to be a junior at San Luis Obispo. He is also a junior at the Big San Luis Obispo Poultry Dopt Places Grads

Leach explained, is the unique type of poultry training is combined but that a majority of the fall quarter. September 13, head at the big San Luis Obispo Poultry Dopt Places Grads

Some High Quality ——Same Clean Wash

Jewell didn't have much to say, but she only had a few glimpses of the town. However, she was pleased with Poly's campus.

"Everything is so continuous it has a good liga. You don't have to worry about getting around, and it is a beautiful campus," was the answer she gave when she was asked what she thought of the place.

Jewell added, "I don't know much about the college's philosophy—Learn By Doing—but I do approve of the system.

When Jewell was asked if she approved of the way Poly students are trained, she said, "I don't know much about the college's philosophy—Learn By Doing—but I do approve of the system.

"I don't know much about the college's philosophy. "It's sure nice," said Bob J. Winterbourne, 27, a high school senior,
