McMillan Discusses 'Good Old Days' At Student Assembly

Don C. McMillan, known as the "Rage of Bandon," and Democratic congressional candidate from the 11th district, addressed the student and faculty of Cal Poly in Wednesday's assembly.

McMillan, an alumnus of 1919, described in a humorous vein the period during which he attended Poly. He pointed out the advantages and improvements the school has been through since then, and he discussed the opportunities that are now open to students of Poly.

Judge Paul K. Jackson, who was a Poly student 25 years ago, also talked to the students about why careful reading for the student is important. He pointed out the many new books being published and the need for students to read and study the work of thinking men before driving.

The band played a few numbers under the direction of student director Paul Waterman and Bob Hays.

The meeting was presided over by student body president Gene Dinius, and arranged by student body vice-president Robert Fisher who acted as chairman for the day.

Poly Collegians Dance Band Features 'Sophisticated Swing'

The Collegians, Cal Poly's own dance band, a small but actively engaged campus organization. The Collegians play for all student body and Collegiate club dances and will play again tomorrow night for the annual Valentine dance.

-By George Tallman

One of the outstanding organizations on the campus, with only 16 members, but nearly 500 students and 800 people turned out to hear the band last week, enjoys an unusual popularity and is the college dance orchestra— the Collegians.

The band is composed of men who enjoy playing their type of music as a hobby. Seven hours a week the band members are in the music room working together. But, on an average, this group meets about 20 hours a week together.

Students have been asking about the band, the credit they receive for this work and if there is any money involved. The concert committee is an all-electric credit which is good for credit toward the music room work and the band. But, on an average, this group meets about 20 hours a week together.

THE COLLEGIANS... Cal Poly's own dance band, a small but actively engaged campus organization. The Collegians play for all student body and Collegiate club dances and will play again tomorrow night for the annual Valentine dance.

MSS PAT WALKER... Chico State Good and this year's Poly Young Royal queen, will be introduced to the student body at the Valentine dance this Saturday night.

Poly Royal Queen To Be Introduced At Valentine Dance

Poly Royal Queen, Pat Walker will be the guest of the Crops club at the annual Valentine Dance this Saturday night, and introduced to the Poly student body.

The Valentine motifs of the dance will be added to by the use of all artificial flowers which are gathered by club members in the canyons back of Poly. As at past Valentine dances, there should be a pleasant fragrance with the decorations.

"Sophisticated Swing" music will be furnished for your dancing pleasure by the Collegians when the music begins at 9:30 p.m. and its decoration and its decoration will be under the supervision of Bill Bise, Crops club vice-president.

Mustang Five to Invade North Country for Two Tussles

By Bill Roth

The Mustangs, who have yet to hit the winners circle, will be presented again this week. Two games will be away from home, the Mustangs facing off against CPD Friday night and San Jose Saturday night.

As showed by the record, both Poly and San Jose are on the upswing. While Poly has yet to win a single game this season, the Mustangs can boast a record of five won and none lost.

The Mustangs are in North California for two games with both San Jose and Poly. The Mustangs are in North California for two games with both San Jose and Poly.

Season's First Rain Soaks Pasture Endowment

A total rainfall of 18 inches will make the Poly department of Agriculture's Pasture Endowment more attractive. The Poly department of Agriculture's Pasture Endowment has a budget of $30,000 for the 1948-49 fiscal year. The Poly department of Agriculture's Pasture Endowment is the estimated cost of the new Poly pond. Although not many people now live in the area, the Poly Pond will be a great addition to the area. Poly pond is the Poly department of Agriculture's Pasture Endowment's largest asset. The Poly department of Agriculture's Pasture Endowment's largest asset is the Poly pond. Naval Reserve Unit Plans Flight Training

At the regular meeting of the San Luis Obispo Naval Reserve Battalion Monday night, it was revealed that a number of officers and men are now taking an active part in the program. "This is sufficient," Larry Oglesby, commanding officer of the unit said, "to justify our application for an organized unit in the near future." Our application will be on the way to the Navy department before March 1st.

The Naval Air Reserve is progressing rapidly, according to Vance Lewis, area representatives of the Command in our Naval district, "There is every reason to believe," Lewis said, "that there will be flight training available to San Luis Obispo county men with Navy planes operating at our county airport."

"Our all out effort to recruit men into this new clerical reserve program will definitely and on March 1st." Oglesby said. "Anyone interested in either the Naval Air program or the Naval surface program should enlist before the end of the month.

Automobile Sale

The security officer requests that students who own cars to another student report the change of ownership to his office. The request is made that each automobile owner will not be inconvenience if transferred the car be identified as yours through the serving of a temporary permit.

This has been the case recently and has caused some excitement among the automobile owners. The new owner should remove his parking ticket, contact the security officer, and advise the new owner to the same.

Poultry Class Freezes Its Toes in SLO Ice House

Last Tuesday, Feb. 10th, the poultry market products class under Don Swain went on a field trip to the American Refrigeration Company. They observed the operation of the company's refrigerating system, as well as their equipment for handling frozen and cold products.

The company's equipment can produce temperatures from 22 below 60 degrees above 40 below zero for the refrigeration of products.

The poultry market products class is now studying this field and the class learned much in the operation of a refrigerating plant.

Among the highlights of the tour were the baseball fights with the Frost from the cooling pipes, the last run through the 46 below zero quick freezing room, and the sampling of the same turkey sold by the company.

The class actually went through two separate outfits, one being the ice company where ice for storage and human consumption is made, and the cold storage plant with its slaughter room, lardering room, cold storage lockers, and packing plant.

Besides learning how and why refrigeration is carried out, the class learned how refrigeration is based in modern commercial produce storage.

We hate to see the price of playing a joke box holstered to ten cents. It should have been raised to $1.00.

Drop in at your Arrow store and pick out a couple of your favorites.

Arrow handkerchiefs with your man's initials from 25c.

Basketball Ticket Procedure Changed for Coming Games

There will be a change in procedure for obtaining basketball tickets for the coming games with Fresno State and San Diego State scheduled for Friday and Saturday, Feb. 19 and 21, in the Poly gym, according to Vernon Maneschew, dean of student welfare.

There are some students who, because of schedule conflicts, have not had the chance to attend many games. So in order that a larger percentage of student body card holders may attend at least two home games, the following rules have been drawn up.

For the Fresno - Poly game on Feb. 19, only those who have seen two or less home games are eligible for tickets on Wednesday, Feb. 18. The tickets will be issued beginning 10:15 a.m. in room 21 administrative building.

In the event that all tickets are not picked up Wednesday, which seems probable, the remaining ones will be given out Thursday, Feb. 19, at 12:15 p.m.

Dougherty Attends Weed Control Conference

The 10th annual western weed control conference, recently held in Sacramento and attended by Paul Dougherty, crops department head, demonstrated the assignment of all duties by chemical and oil sprays.

The conference, lasting three days, was attended by over 1000 people from 11 western states. The largest state delegation was from Idaho with 80 with present. Dougherty commented on the abundance of several former Pol students and graduates now engaged in weed control work in California.

Low volume weed spraying using the little as three gallons of spray an area at 40 pounds pressure is now being done successfully, according to Dougherty, and was demonstrated at the conference. New selective weed controls to stimulate growth among broad leafed plants such as alfalfa, flax, cotton, celery, and onions has been successfully undertaken.

Presidential Senate election was also demonstrated at the conference. The idea of the advancement of land undisturbed by culture will show up only one crop of weeds. These weeds are killed immediately before the crop germinates, eliminating much weeding thereafter. Dougherty also commented on the remarkable display of various companies manufacturing weed spraying equipment. Everything from tractor drawn spray rigs to airplanes were present and some 20 companies located in western states.

Spartans Shut-Out Mustangs In Hard-Fought Casaba Clash

by Bill Roth

Disappointing their usual lightning brand of play, but lacking the needed height the Mustangs dropped their fifth straight conference game to a strong Spartan team from San Jose State last night in the Poly gym.

Taking the floor as the definite underdogs, the Polyites were aware of the task ahead of the house that they weren't to be too complacent as they may by the feeling of the Spartans before the game. With the court not even settled in their seats, Captain and Moroski dropped in consecutive shots to put the Mustangs out in front.

Howard, San Jose, employing a fast-breaking tactic that reached the localfive completely off guard, immediately ran the score to 7-0 in their favor.

With ten minutes left to go in the first half the score reached 14-7 in favor of the Spartans. Mark Moroski literally proceeded to catch fire as he personally accounted for eight points in bringing the score up to 16-14 at the half. This was only the first sign for Moroski, who was easily the outstanding player on the floor setting up most of the plays and finding himself in 28 points himself.

The first half was just a question of how much longer could Hughes and Hogan. In the second half the Mustangs came out and put on a mighty preformance, even though they couldn't quite close the gap. Hughes dropped in a fast break shot for two points and the score read 20-16, but Coghlan and Moroski followed to make it 22-16.

The next two for the Polyites were actually going to take the lead away from the Spartans. Will Baker, however, had a push shot from 20 feet out to make the board read 22-20 with just one quarter to play. The Spartans rallied again to

With the rest of the team overcalled by a wet blanket, Tilstra and Moroski took things into their own hands. Between the two of them they scored 10 points in the second half, but the lead was too far away. Hughes in the game, but this noble effort was drowned out by Tilstra and Moroski to leave the Spartans too far out. At the final buzzer the Polyites had closed the game with 35 points to 16 for the Spartans.

Sen. Jose showed a smooth working offense and Tilstra in guard was hard to beat this season. However, at thePoly, the Spartans won the contest 86-25. Poly came out and fairly burned up the Sagehens in closing seconds.

Sagehens in Closing Seconds

By Bill Roth

The clock stops—Two seconds are left in the game. Whitle and Baker steps to the foul line and calmly drop in two charity tosses to take Poly from the brink of defeat to victory. This was the story Monday night at Claremont as the Mustangs edged out Pomona 69-65 in a game that was featured by stifffights in the last seconds of play.

With just seconds of play remaining time coming and Poly behind by a point, Tilstra fouled a Pomona player in a desperate attempt to get hold of the ball. Here's where the trouble began. The Sagehens evidently didn't like the way he was fouled and took exception to it with flying fisticuffs. He wasn't content with just eviscerating and throwing insults to Whitle, but had to start swinging at the ref too. The ref expelled him from the game and Whitle led up the game with the first one and won the game with the last one.

The first half was all Pomona, as they led at the half 34-30. Poly must have received quite a shot to their ego coming out and firing back up the court in the second half, scoring 41 points to 24 for Pomona.

Everyone had their eyes on the basket as Moroski, Tilstra, Coghlan and Bublik all hit for 11 or more points. Moroski was still high for the Mustangs with 17 points followed closely by Tilstra and Coghlan with 14 each. Olsen hit the horn for 14 and was high in the air at half time because of the Sagehens.

HALF OF THE BIG GAME

**SPORTS**

Mitmen Whip Gaucho Pugs

Cal Poly fought to a 6-2 victory over Santa Barbara in their second most of the year, here last Monday night. The Poly coached Poly fighters took the first two official bouts of the evening, dropped the next two, and then won the rest of the bouts on the program.

Art "Gogi" Guglielmelli took an easy decision from Frank Dunnec, Lee Rialing, literally had his way on his opponent, Bill Corriner, Santa Barbara's 200 pounder, and starved there the entire fight to win the decision, although the bout was no easy job.

Willie Baker and Jim Watt turned in a fine performance in a trip and tuck fight of all the way. Baker repeatedly beat Watt to the punch with an overhand right and a left to thrill the crowd and amass Watt.

Santa Cathcart again dominated Ranil Barr. Sam and George fought four times, each taking two decisions. The next time they meet, they should be a "dandy,"

Gordon Ziegler staged a fine exhibition bout. Baker stepped in and added another point to his record in poor condition, but proved to be the better boxer.

Gene Pimentel decisioned Royal Cathcart in the final bout of the evening. Neither figher was in the best of condition, but Gene had a little more muscle and experience.

The Polyites dropped in 22 points themselves to secure the victory. With just seconds of play remaining time coming and Poly behind by a point, Tilstra fouled a Pomona player in a desperate attempt to get hold of the ball. Here's where the trouble began. The Sagehens evidently didn't like the way he was fouled and took exception to it with flying fisticuffs. He wasn't content with just eviscerating and throwing insults to Whitle, but had to start swinging at the ref too. Three By Eight...

In one of the journalism trade-journals we get around here is an ad with the action line reading, "Never Underestimate the Power of a Woman." After going to the Student's Wife's carnival last Saturday night, I can see what they mean.

Those gals really knocked themselves out putting on a good show. The tables and booths were well made and attractive. The food good . . . and that Bingo! I shot three toads in one game, but I barely made a dent on the prize table.

It was my personal opinion that the prize table was the moral focus of the prize table. The wives had called on practically every student to come to their own town and asked them to donate some item to be used as a prize. They have all either used the prettiest or costliest item, or they might have been because no merchant refused them. They had everything from boy Stout and ironing boards to 10 dollar baskets of food and eight pound hams. In the future I plan to advertise for Polyclub shows. Show a pretty smile, etc., and we merchants can double our advertising rate.

But to get back to this Bingo. I went after that game with a passion. I bought three cards at a crack and shelled out quarters. I maintained my thinking that this was the worst idea that I naively thought respectfully ' buried. To the students of the Women's Wives carnival I say: "Vegas is a need of long standing.

John's idea, though not new, brings to light what we think was written by John Zetkov. Inviting suggestions towards, and a need of long standing. John Zetkov.

Student Union Building

In today's "letters to the Editor" will be found a letter by John Pattoracon, Cana Reno, Dava Roee, Bob Saunden, John flnapp, Joe Stocker, George Bernal, Emmonn Blake, Dave Ooodman, John Henley, John R. Henley. "I'm trying to think of a different club. If not for fun, then for profit. The building would have tremendous public-relations possibilities. A structure of barn-like proportions would be just the thing. We feel that such an idea is fraught with merit. We are interested.

The need for a Student Union is apparent. All we need is that little bit.

John Zetkov's idea is a good one, and we invite reader's comments, suggestions, and criticisms. We believe the idea in principle and think it is OK.

Just Give Us a Barn

There has been some idle chatter recently concerning the possibility of a Student Union building for the student body of Cal Poly. In my opinion, it would be a good idea to have a student body building, it would be simple and comparatively inexpensive.

For as we can see, it is better to have a streamlined barn now than wait ten years, or more, for an ivy tower.

dear Editor:

Three By Eight...
Can We Stand Challenge?

by Phillip Nahassiah

"To be the master of the civilization he has created, or to be the next body of ignorance which has built one upon the face, or will it be a Frankenstein monster that will defy its own maker?"

These are the questions that Raymond Fonleid raised in his book "The Old Savage in the New Civilization," at a time when the world's most destructive weapons were not yet born, when there were neither V-2 nor V-I, and the vision of the atom was still a nurtured dream.

Before and after Fonleid, and especially today, these questions are being proposed with a force that is unbelievable. The peoples of the world want to know their future and their children's future; they want to know if man's power to create is a boomerang to his desire to destroy; they want to know if science is a curse or a blessing to human kind.

Energy—Blind and Demb

The tremendous amount of energy lying dormant in nature is being harnessed by science for man's use. But this energy is blind and dumb. It can destroy with exactly the same force and efficiency it can build.

A bank of dynamos may show up a house with the innocent people or a mine and provide coal for useful needs. To control this force and give it meaning and purpose is the toughest challenge to human will.

Let us follow briefly the implications of this simple atomic equation set by Einstein in 1905. Energy (E), equivalent to a mass (m) multiplied by the velocity of light squared (c squared) or E=mc squared.

To put it into the understanding of the layman, the equation states that if one pound of matter were entirely converted into energy, it would give as much energy as the total electric power output of the U.S. for three weeks.

This tremendous energy is a revolutionary achievement that has made all forms of dealing and thinking obsolete.

Thinking Revolutionized

"In his message to Congress in October 1946, President Truman stated 'In international relations as in domestic affairs, the release of atomic energy constitutes a new force too revolutionary to consider in the framework of old ideas.'

Albert Einstein, who may be worthily called the father of atomic energy, said: 'Today the atomic bomb has altered the rule of the road.' The equation of energy gives us a new concept of the nature of the world as we know it, and the human race consequently finds itself in a new habitat to which it must adapt its thinking... A new concept of the nature of the world as we know it, and the human race consequently finds itself in a new habitat to which it must adapt its thinking... A new concept of the nature of the world as we know it, and the human race consequently finds itself in a new habitat to which it must adapt its thinking... A new concept of the nature of the world as we know it, and the human race consequently finds itself in a new habitat to which it must adapt its thinking... A new concept of the nature of the world as we know it, and the human race consequently finds itself in a new habitat to which it must adapt its thinking... A new concept of the nature of the world as we know it, and the human race consequently finds itself in a new habitat to which it must adapt its thinking... Vets Eligible For Study Abroad

Veteran men and women are eligible for overseas study under the G.I. bill on the same basis as in the United States.

According to information just received by the Veterans Administration, the number of World War II veterans studying abroad under the G.I. bill has increased almost 400 percent during the past year.

At the beginning of the current year, 4,600 ex-service men and women were studying in 428 schools and colleges in 46 countries. This is an increase of 4,761. Almost half of these veteran-students are enrolled in schools and colleges in the Philippines Islands. Other countries in which vets are attending school are: Canada, France, Mexico, Switzerland and Great Britain.

Those students going abroad for study must arrange for their own passports, visas, and transportation, the V. A. said. All arrangements for such study are made with the Department of State which administers the foreign training benefits of the G.I. bill.

Empty Extinguishers
Create Fire Hazard

Students using fire extinguishers and returning them to their hooks are creating a serious fire hazard, according to E. A. Steiner, security officer.

He added that some people are under the impression that you can use a little of the solution and then hang it back up. This is a mistake. Once the two solutions are mixed, the extinguisher is said to be discharged and is absolutely no good in case of an emergency. On the average, three or four extinguishers a week are found to be discharged.

"It is possible," Steiner also stated, "that some of the extinguishers found to be empty may have been discharged accidentally. In any case where an extinguisher is found to be empty, the fact should be reported to the security office."

Chesterfield Deal
Making Big Hit With Dorm Students

The Chesterfield giveaway deal announced in last week's El Mustang is rolling along great guns.
