CALIFORNIA STATE POLYTECHNIC COLLEGE

VOL. 8—NO. 25
SAN LUIS OBISPO, CALIFORNIA

HOME CONCERTS;
MUSICIANS, SCORE TRIUMPH

BY Ed Boetcher

Thirsting for capacity crowd with nearly three hours of opening musical entertainment, the Cal Poly Music department, representing the Collegiate dance band presented their Annual Home Concert last Thursday and Friday nights in the San Luis Obispo High School Auditorium.

She'll Sway Your Heart Away
At Circus Dance

"Torchy," the golden haired, green-eyed girl who does the "Hootchy-Kootchy" is slated to be present at the Poultry club "Circus Dance" this Saturday at 9 p.m.

"Torchy" is the mystery girl that the Poultry club kidnapped from the carnival that hit San Luis Obispo last January. She will be at her "inside show" to all of the original admission committee. No one can get tickets needed, nothing to buy, to see the greatest show on earth under the Poultry "Big Top." A large assortment of animals will be in the center of the floor, with life size unicorns, elephants, etc. Fourteen hundred balloons will float in the air, and toys on the rake will make the magic of the Carnival. These animals will be released to bombard the stands at the stroke of midnight.

Caged wild animals will surround the entire floor and will peer with evil eyes and leer at the usual dreamy students and their dates. The Symphonists have been engaged to provide more lively entertainment during the intermission. At this time, door prizes will be given. The form of turkeys, chicken, frogs, and eggs will give a way to the lucky ticket holders.

Museum Started By Biology Department

One of the projects that was carried out by the Biological Science department, was the collection of material for a Museum. The Museum will have to be on a small scale due to the limitation of material that is available.

According to D. H. Thompson, Biological Science instructor, any and all specimens will be gratefully accepted from those students who wish to add to the museum's collection. The specimens most desired are reptiles, birds, and animals. If possible, the department would like to have all those specimens brought in.

The specimens are being prepared for study and exhibition by James Johnson who will be in his first year at Poly.

Y.M.C.A. Forum Discusses U.M.T.

At the weekly forum held by the Poly Y.M.C.A. the growing problem of U.M.T. was discussed. Colonel Warren was introduced with the "gen and goody" routine.

The meeting, which took place in the auditorium last Wednesday night, was moderated by William English, Infantry Instructor.

Supporting the argument for U.M.T. was Daniel Lawton, superior of the university, agricultural education, and Biology Club, major in the psychology and education department, and Ed Brewer, major in Education.

Next week the forum will present the other side of the question. The meeting will be held in Adm. 218 at 6:30 p.m.

X-RAY UNIT TO VISIT CAMPUS;
WILL OFFER FREE EXAMINATIONS

Plans are complete for the mobile X-ray unit when it arrives at Poly Wednesday morning. April 12, it has been announced.

The services of this unit will be open to students, wives of students, faculty members, and employees.

The X-ray service is made possible by a combined program of the County Health Department and the Student Health Service.

The schedule has been announced as follows: Wednesday, April 11, 8 a.m. to 12 noon and 1 to 5 p.m.; Thursday, April 12, 9 a.m. to 11 a.m. and 1 to 5 p.m.

Auditorium.

The specimen are being placed by the biological science instructor, any and all specimens will be gratefully accepted from those students who wish to add to the museum's collection. The specimens most desired are reptiles, birds, and animals. If possible, the department would like to have all those specimens brought in. The specimens are being prepared for study and exhibition by James Johnson who will be in his first year at Poly.

Nominees Selected For Next Year's Student Officers

The election committee has just reported that the following men were nominated for student body offices for the coming year:

President: Paul Schaur, Larry Wells, Vice President: Jim Joseph, Ken Lucas; Secretary: Henry Monninger; Treasurer: K. L. Johnson.

Others desiring to petition for office may do so by securing a petition blank at the student body office, and in the event of nominations for the elections will be Tuesday, April 20, at 10 a.m. in the gym. It may be more advisable for potential candidates to return their petitions early so that an adequate campaign may be planned.

Those men should arrange either to make their petition blank at the student body office or to have a petition blank at the County Health Department, and announced as follows: Wednesday, May 5, at 11 a.m. in the gym. It may be more advisable for potential candidates to return their petitions early so that an adequate campaign may be planned.

Only the races of these men selected by the election committee will be the candidates for the Student body election. All other petitions which are filled out will appear in the election roll and will not be counted.

The list of employees and others any desiring to run for office may do so by securing a petition blank at the election committee at Adm. 21, in the student body office, Adm. 21.

Dr. H. O. Swart, Secretary of the Student Wives' Association, announces that there is a slight decline in last year's work of Student Workman's Council. The date for the campaign specimen will be at a general assembly Tuesday, April 20, and the election and run-off will be April 28 and May 2, respectively.

Torchy, the golden haired, green-eyed girl who does the "Hootchy-Kootchy" is slated to be present at the Poultry club "Circus Dance" this Saturday at 9 p.m.

"Torchy" is the mystery girl that the Poultry club kidnapped from the carnival that hit San Luis Obispo last January. She will be at her "inside show" to all of the original admission committee. No one can get tickets needed, nothing to buy, to see the greatest show on earth under the Poultry "Big Top." A large assortment of animals will be in the center of the floor, with life size unicorns, elephants, etc. Fourteen hundred balloons will float in the air, and toys on the rake will make the magic of the Carnival. These animals will be released to bombard the stands at the stroke of midnight.

Caged wild animals will surround the entire floor and will peer with evil eyes and leer at the usual dreamy students and their dates. Poly Phase Club Tours Los Angeles
Manufacturing And Generating Plants

BY ERWIN GOMEZ

More than 80 members of the Poly Phase club traveled to the Los Angeles area from March 14 to 16 under the direction of George C. Abel, faculty advisor of the club, and arranged the tour. The purpose of the trip was to help the students decide what line of work they would like to follow upon graduation.

A visit to the Wilmington Steam Plant as guests of Herbert Conant, engineer in charge of distribution of the Los Angeles Bureau of Power and Light, demonstrated the use of steam in the generation of power. They also viewed the frequency changer which enables the Edison Company and the Los Angeles department of power to trade power of differing frequencies.

The use of electrical power was shown at the Long Beach Naval shipyard, where large marine electric tools were in operation. Lt. C. R. Ritten, their immediate host, displayed to the visitors the apparatus used in electrical repair work.

The National League Manufacturing Company, makers of all wall machinery, provided a working example of their work by making the use of electric furnaces. All phases of manufacturing of machinery were observed.

The Poly Phase men toured the radio stations of CBS and NBC. They were shown the communication fundamentals of the various transmitters, receivers, and stages, and other points of interest. They also met the personnel of the studios. A Pilot of the engineering department demonstrated the method of television and the planning of the entire facility.

One of the highlights of the trip was a visit to Torrance, to study the radio engineering students of the University of Southern California.

is standing next to George Abel of the Electrical Engineering department staff. The first picture shows 80 men as they enter the Hollywood radio studio. In the second picture a CBS guide is explaining the equipment used in one of the smaller sound studios.

NOTES ON MEN

A man might be defined as a human being possessing the qualities of humor, strength, courage, and love.

A man is a peculiar sort of human being, possessed of a faculty of superfluity and an ambiguous nature.

He is a gentleman (always) who prefers blondes, but eventually marries a brunette. He already believes that every female is out to get him, yet as afraid none will.

He is an authority on any subject, knowing that of women.

You'll have to admit that he has a way with the opposite sex. There are many numbers with sitting about waiting for him to talk, but he should have thought of that a couple of weeks sooner.

Whoever wrote this story has never been in Ban Luis!

It is too tough for this creature, he can do anything.

If he wants to, filing ludicrous things are the result of a hand of cards and an hour of conversation.

Consider the wife and husband of the polyphase engineer; the latter is the one who is expected to talk.

He is an athlete, fisherman, big-game hunter, and an expert in the war single-handed.

In other words he is a combination plumber, mechanic and back-seat driver. If anything is out of order, he'll fix it, yes, he certainly will.

To know a good story? He can tell it, without any aid from exotics.

The things he has done would make most supermen look bad. He is a superhuman to the women of Ban Luis, and he tries to induce this superhuman to row the laws or abolish the walls.

Around the house he is a combination plumber, mechanic and back-seat driver. He helps with the back seat, too.

Life Insurance

In a recent Veteran’s Administration release, veterans holding National Service Life Insurance policies were advised not to send cash when mailing their payments. A veteran sending cash through regular mail has no way of knowing that he sent the premium if it should fail to reach the V.A. Failure to receive payment can result in the lapsing of the policy.

Vets still carrying NEL are urged to use postal money orders, postal certificates, or checks. The VA will furnish money orders for the purpose of mailing payments to the appropriate office.

"Hey, Joe, how about ordering corsage for the Poly Royal?"
These words were being passed around the campus. The Western Enterprise, Poly's official newspaper, is operating on a 12-hour day supplying power to several circuits including dormitories, gymnasium, Agricultural and Forestry building, Mulkey shop, and several class room buildings. Additional engines will be placed in operation as soon as equipment has been assembled.

The State Public Utilities Commission has ordered a 20 per cent cut in the use of power based on last year's consumption. This hit Poly particularly hard. During the first quarter the campus has experienced greatly and the use of electricity will materially increase. Poly must actually make better use of power, or a 'W' grade will be given, if he had switched to Calverts, but he was not ready for a permanent organization.

Every effort should be made to conserve power. The shortages are so critical that every little bit helps, both in the elimination of waste power and in the prevention from new sources.

Aero Department Plans

Display For Poly Royal

Students of the aero department are organizing a display on a Piper Cub hanging in the San Luis Flying Club. The aircraft has been completely overhauled, new fabric has been applied and dope (paint) the familiar Piper Cub yellow.

The Aero Department is planning several new airplane craft during Poly Royal. To date distributions of the following aircraft planes, Piper Cub, Ercoupe, Blimov, Siskiwit, and Champs, have all received an invitation to be present. The membership of the Sheriff's Aero Squadron, has been invited to participate in the aerial surf for the body of the late Hank Meyers. Fred Adams, Larry Wall, Max Becker, and Marvin Bell have all seen in the search for pilots and observers using the Mustang Flying Association's two airplanes. Several memberships are open in the Mustang Flying Association.

Anyone who is interested should contact work Coyle, president of the club.

SUMMER EMPLOYMENT

All men who are interested in summer employment see John R. Jones, placement secretary, Rm. 136. They have to assist you in finding a job.

San Luis Obispo, Calif.
By Bob Copeland

Hopes of retaining the 22CA conference crown, which the San Diego Aztecs have held for the past four years, will again be in the rocks as the Mustangs take on Cal Poly's battling Mustangs this Friday at 2:30 p.m. Holding down second spot in the 22CA is the other serious contender, San Diego State University. The Mustangs will try to at least win two of the three games from the hustling Mustangs.

The Aztecs are coming on strong with 11 lettermen from last year's squad. Eight of these players have some mention on the all-22CA baseball team. Outstanding back men are Mickey Bagby, third baseman; Mike Villian, shortstop; and pitcher Bill Rush, all second string members. Pitchers Bob Pat-ney and Phil Narrative, and first baseman Jim Kennerly were all given honorable mention ratings.

Not that I want to rain your story, Bob, but it's just been announced that the Mustangs will be playing games this weekend. If you want an explanation just look outside and hold out your hand. That's right! The Aztecs are to have been given an off-week, but it appears that the Aztecs have tentatively announced that they will play some games this weekend.

The infield, which was picked by opposing coaches as the smoothest in the conference, is being handled by the same guardians with the exception of John Halas taking over third base job vacated by Bill Rush last year. The minimize hope to climb higher in the standings. But should Cal Poly win a couple of games this weekend, only two spots away from the Aztecs, it will be a battle for the Mustangs this weekend.

Although dropping two games in succession last week, the Mustangs are still a force to be reckoned with. But the Mustangs who faced the California State Polytechnic College at San Bernardino 10-8 last week, are still considered by many batting rooms of the two teams after the Mustangs were able to win the contest by a close score of 7-6. The Mustangs won by a wide 7-6 score over Cal Poly last week.

Starting lineup announced by Coach Bob Mott was: "Lefty" Don Carman, head baseball coach at the University of California at Santa Barbara; Herb Lowe, head basketball coach at the University of California, Los Angeles; and Clarence "Buck" Price, head football coach at the University of California, Los Angeles. The Mustangs who faced Cal Poly are: John Halas, head baseball coach at the University of California, Berkeley; Walter Bell, head basketball coach at the University of California, Los Angeles; and Don Wilcox, head football coach at the University of California, Los Angeles.

Classes will also be held in archery, boxing and athletic training. The workshop, inaugurated in 1940, is for the improvement of the physical education and recreation programs at the college and gives practical assistance to the man responsible for those activities in the school.

**Northbound Swim Team Improves**

The Mustangs hope to continue their improvement of the health, physical education, and recreation programs at the college. In 1940, the workshop, inaugurated in 1940, is for the improvement of the physical education and recreation programs at the college and gives practical assistance to the man responsible for those activities in the school.

**Four Way Track Meet Features Mustang Fieldmen**

Coach Ed Jorgensen's track squad disembarked on one of their biggest meets of the season. The four-way track and field meet at Santa Barbara college. The other three colleges entering into the track and field events are UCLA, Pomona, and Santa Barbara.

Coach Jorgensen's men have been handled to no end recently by the cause of the rather dryly moisture. Workouts have been held to prepare the Mustangs for the next big meet of the season. "The only way to improve in track, is to train," said Coach Jorgensen.

Flirtation Walk

Draws Large Crowd

Crescent gym was decorated beyond recognition with colorful plaques and flowers of different varieties last Saturday night, when the Arizona State College presented a flirtation walk.

The ballroom, engaging to a capacity turnout, were the main attraction, the usual with the "Sophisticated Swing." Ballroom skirts and the new look were predominant among the women’s apparel.

Rain Again Washes

Colts Out Of

Diamond Action

Rain once again stopped the Colts

from playing their first baseball game.

The game was to be played

against Santa Maria Junior college on

Saturday, April 7, at the Poly diam­

ond, but the game has been called

off indefinitely.

There have been a few addition­

als to the team’s roster, namely Paul

Hippman and Kenny Bell, local boys

who are expected to strengthen the

squad infield. Hippman plays first­

baseman and Bell, shortstop.

The Santa Maria team has a

very good hitting outfit and

should give us a hard time.

WE COMPLIMENT

Some months ago one of the English instructors wrote a letter to the editor of the Telegram Tribune describing the "curiosity of an armament" and the last eight weeks and the entertainments presented by that organization last Friday and Saturday night. He said that it was a matter of another irrigation treatment. (We will not call the concert an entertainment.)

The Men's Glee club and the Collegians showed by their performances that they rank at the top among similar organizations. They have performed throughout the Sacramento valley on the year's spring tour. They also give praise for the compliments which this school has received in the past. Tour parties are in progress for the entire student body when I say that they all have our thanks.

May the Music department continue to flourish.

J. M. P.

ANOTHER WAR TO END ALL WARS

By Philip R. Waks

A public opinion agent can find no better place for his headquarters than the barber shop—that meeting place of all kinds of men of all ages and walks. True, the poll will not be accurate because he has spent his inflationary role has helped make home haircuts a fairly fashionable practice.

The talk of the hour is of course the question of drafting and the prospect of war. But from discussing the merits and defects of that strategy, these measures are taken as a matter of fact, and the talk is confined to tactics and trivial details.

People disagree on the number of atomic bombings that are needed to blast Russia. War engineers are testing rockets and vehicles in terms of the sea of missiles and ability to end cold war. They are increasingly influenced with maps of the Northern hemisphere, and dramatically portraying the closeness of danger and warning the seeds of world conflict. The tip of Alaska almost being the eastern shores of Siberia has become a popular picture outside. The favorite game remains, however, a large map of the world divided between two antagonistic sides and their respective shades.

The Letterman Rules

I always thought it would be great fun to watch the first expressions of emotion and the prospect of war. But from discussing the merits and defects of that strategy, these measures are taken as a matter of fact, and the talk is confined to tactics and trivial details.

$1.75.

If you're laughing on the outside and crying on the inside (from drinking too much water), you're not aware of the wonders of Arrow underwear! 1% shrinkage. $1.25, $1.50, and $1.75.

Security Rules

- **Visiting the Poly Poultry Barns:** Unattended bags will be locked. A Fellow Needs a Girl, were received from the Veterans administration. This evidence must be submitted before any adjustment to the new increased substance penalties can be made.

- **Parking Along Narrow and Busy Streets:** Pedestrians: The fact that the pedestrian is not facing the approaching traffic or walking on a marked cross-walk, to face the left side while using streets marked "One Way," is considered to be the same as those in town. These streets marked "CLOSED" during the day, should be treated with respect. Parkng along narrow and busy streets also presents a recognisable hazard. Pedestrians in front of or in a way to obstruct the use of the large workmen’s vans around the shop, barns, etc., as their use is important to the campus. All persons are asked to exercise extreme caution when leaving an automobile from the driving side. Parking along narrow and busy roads also presents a recognisable hazard. Parking in front of the Poly campus are of two types: one in the park that's dangerous, says the California Department of Public Safety. The kiss is a wholesome part, an artist's conception of the new library.

- **Visit the Poly Poultry Barns:** If you're laughing on the outside and crying on the inside (from drinking too much water), you're not aware of the wonders of Arrow underwear! A Fellow Needs a Girl, were received from the Veterans administration. This evidence must be submitted before any adjustment to the new increased substance penalties can be made.

- **Parking Along Narrow and Busy Streets:** Pedestrians: The fact that the pedestrian is not facing the approaching traffic or walking on a marked cross-walk, to face the left side while using streets marked "One Way," is considered to be the same as those in town. These streets marked "CLOSED" during the day, should be treated with respect. Parking along narrow and busy streets also presents a recognisable hazard. Parking in front of the Poly campus are of two types: one in the park that's dangerous, says the California Department of Public Safety. The kiss is a wholesome part, an artist's conception of the new library.

QUEEN PAT WALKER ... will reign over Poly's all- male campus during the 1948 Annual Poly Royal, April 30-May 1.

Secure Poly Royal Guest Lodging Now

The "country fair on a college campus" is practically upon us for the first time. Yes, the 18th annual Poly Royal moves near and with it a special rate or privilege for one and all.

If you are planning to have friends, relatives, or a family visit the campus during Poly Royal who expect to stay for the weekend, get on the ball now and secure reservations to one of the area's lodging quarters. It is strongly advised, by incomprehensible sources, that you do so now, today, as it will be practically impossible in a week or two.

If you don't believe this ask a few of the "troops" that went through the mental rut last year before. Don't hesitate, see to it immediately that your guests have a place to stay.

THREE COSTS LOW

Lady burs was not with the Throughers until this year, reports Lyman Ballenger, athletic bursary department head. In former years a prospective show of at least five colts had been the average, but of the five featured this season only two are living.

The surviving colts are from the two best mates, one out of Violet by Pricemore (um), owned by D. B. Jepson, Chatsworth, and the other, a son of Borey (um), owned by D. H. Baxter, Inglewood.

MUSTANGS HAVE A Season

The 1947 Poly Mustang, basketball team did not suffer a single defeat during the entire season. Among their victories was a 23-20 over Templeton. According to the Spartans Daily.

Poly Royal Pictorial Out Next Week

Due to delays in receiving cuts from the engraver, the Poly Royal pictorial will not be ready for distribution until early next week, the publications office advises today.

There will, nonetheless, be four pictures for each student, 150 to 200 copies, and five copies, address them to your respective friends and families, and place them in the receptacle that will be there for the purpose, and curry no worry.

For those unfortunate in not being able to pay the postage fee required, the publicity department will make an expropriation of the mailing of all the Poly Royal pictorials.

Air Conditioners Visit Los Angeles Plants

The Air Conditioning club returned from Los Angeles last week and after a few-day field trip, the club visited many types of manufacturing plants to study heating and ventilating systems.

One of the most interesting plants visited was that of the Ranta Heating and Engineering Department. Here the group was shown through the factory which features in farming, trade and industrial fields.

Found—California License plate No. 19691. Can be obtained at Security office.
