New Column Starts Today in Mustang

Starting this week we are featuring the columns of student Richard B. Chatterton. Bob Chatterton, who has his hands full trying to write the column "Idle Chatter," will be turning the column over to Bob Chattor, who was one of my best friends in High School and has a lot of good stories to tell on the subject of "Steel Grandstand Ready By First Home Ball Game"

A contract for construction of a new steel grandstand at the Cal Poly campus has been awarded to the Pittsburgh-Das Mahne Steel Company in Pittsburgh, Pa., it was announced today by President Julian A. McPeek.

The contract calls for the seating capacity at Cal Poly to be approximately 70,000. These stands will be 24 rows high and 270 feet long and will be constructed of large steel beams and other steel markers on the east side of the field.

The Pittsburgh-Das Mahne company, which is the largest manufacturer of steel in the world, also announced that the first of these stands will be completed by the first home game, October 2, unless some unforeseen delays occur in the steel production. Cal Poly will pay the company $90,000 for the stands themselves.

Future plans call also for the extending the ends of the present stadium and the expansion of the press box area.

Land Grants Give Former Students Arizona Acreage

The Arizona Corporation of States will have government lands in the state, according to a bill introduced in the legislature through a government drawing for former students.

Elbert W. Phillips of Delano and Robert S. Eastman of Phoenix have now homesteaded approximately 3,200 acres of land, it was reported that the acreage drawn for was 20,000 acres.

In legal tender. (Probably a fig leaf.)

Poor Man

There's lots of talk going around about guys named Bob Met and Bob Wattes. But there's been a lot of talk about Bob Met and Bob Wattes for a few years now, because he's born a few days early. But that's the way it goes. He不然-but to handle his duties by skipping West High for a few hours and coming back after a ball game--it was a bit of a change, he said. After he spent five nights in the hospital.

Wanna Make a Buck?

Bjorgzel! Walter B. Sellen, president of Southgate Furniture Company, has a grand plan to build a new furniture store. This is a plan he says he has been thinking about for some time. He says he is going to make a grand plan to build a new furniture store.

We shall start a campaign in this country to have all furniture stores sell their goods at higher prices than the other stores. We shall also sell a lot of furniture at lower prices than the other stores.

Where Home with This?

Good post of palms trees instead of fences along the sides of the buildings. The two of us have been working on the installation of the Orange Bowl stadium, according to O. W. Hulbert, secretary of the campus. Mr. Hulbert said that the new stadium will be a big improvement.

Instructors Solve Housing Woes With Mutual Project

The housing project located in Los Angeles, San Francisco, San Diego, and the Sacramento areas is in process of meeting housing needs of a number of Cal Poly instructors and students. The project is managed by the department of housing and has four phases: the first being the completion of a small-scale model house; the second being the construction of the first phase of the project; the third being the construction of the second phase of the project; and the fourth being the construction of the third phase of the project.

Glover, Freeman, and Holm, who are to receive the honors, are the president of the board of directors and the chairman of the board of directors, respectively. They have been active in the organization of the state for the past nine months.

The number of instructors in the project is expected to reach 2,000 in the next two years.

Campers of Home

Freemeyer House will be a house of one and one-half stories, and will be constructed of concrete blocks. The psychology of the house is a study in modern living, and the front yard is a study in modern landscaping. The back yard is a study in modern landscaping.

Expanding Faculty To Meet Needs Of Increasing Fall Enrollment

The appointment of five new graduate students to the Cal Poly and University of California was announced this week by President Julian A. McPeek.

Instructors also learn by doing... the hard way to build a house is to do it yourself.

Poultry Sales-Room

John, chicken, Planned

Plans are in progress to construct a 300 foot extension on the west side of the poultry plant, the large building.

Work on the project should start sometime in the next year. The addition will house offices for the poultry department and instructors, and also provide facilities for an additional feeding and showing facilities.

Governor Warren Visits Poly Campus

We are happy to report that Governor Warren made a visit to Cal Poly's southern campus this week, with a business meeting to discuss the campus plans. Governor Warren is a busy man, and has been a guest at Cal Poly's southern campus for a number of years.

The Governor was greeted by the president of the college, Byron J. Fichter, and the student body president, Bob Fichter. Governor Warren was also greeted by the student body president, Bob Fichter.

Jeanne Chapter, By State Bureau Men

Members of the chapter of the state bureau of agriculture education in California met this week at the Poly campus. The president of the chapter was present, and the meeting was called to order by the chapter chairman.

In the afternoon, the chapter chairman introduced Byron J. Fichter, and the chapter chairman presented the chapter's new officers.

Glover, Freeman, and Holm, who are to receive the honors, are the president of the board of directors and the chairman of the board of directors, respectively. They have been active in the organization of the state for the past nine months.

The number of instructors in the project is expected to reach 2,000 in the next two years.
THE HOT DOPE ON HOT-RODS

CON

California is famous for having among its inhabitants characters who wear double-breasted mink sport coats and ancient Stanley Steamer to a Rolls Royce. Although the diamond-studded sun glasses to Hollywood premieres. Now through various methods, on any kind of chassis from an These youthful mechanics usually place a Ford, or Mercury other safety factors have been neglected. Often the brakes, and the headlights are faulty. Many "hot rods" fail to sport a windshield or horn. In order to have his car "like the other guys have theirs", the "hot rod" mechanic must be prepared to spend up $100 on special parts and glistening paint jobs. The finest "hot rod" is not the one with the most powerful engine, not very road worthy. The body of the car is often very flimsy, and under the vehicle is a nightmare at high speeds. Because he has no adequate brakes, the "hot rod" driver is naturally inclined to drive at very high speeds.

"A hopped up" car driven by an individual who believes in doing 90 miles per hour through the center of town is a definite menace to safety.

The construction of a "hot rod" can be excellent training in automotive mechanics, but we do suggest that these vehicles be inspected for necessary safety features by competent authorities. If the owners of these vehicles insist on driving at insane speeds, then their cars should be impounded until such time that他们 can curb their desire to fly along the highways of California.

PRO

to categorically ban a certain form of transportation merely because a few individuals enjoy the very same way of thinking, a silly and at the same time serious blunder. "Hot rods" are a fact of life, and the authorities have no choice but to work for the safety of the driving public.

Mason was an animal husbandry student; one of Poly's finest students who will be missed the rest of the winter quarter. The former Farmer...
Phys Ed Workshop to Star Top Instructors

Athletic Director Robert A. Mott disclosed this week that the California Physical Education Association will conduct an athletic workshop at Cal Poly August 16th. All schools are invited to attend. The workshop is designed to bring about a better understanding during the season of the proper attitude of the individual athlete toward the sport he will be playing.

MOROSKO'S MAILBAG

By Herb Moroski

For the past week or so, the fair city of San Luis Obispo has been undergoing a transition of sorts. It seems like one of the most successful promotions in many years. "Shop Around" week, which featured some of the most popular magazine covers, was a great success. The city was all decked out, and the atmosphere was electric. Everyone was happy and the streets were filled with activity. The shops were open extended hours and people were out looking for deals. It was a real treat to see how much fun the community had getting involved in something so special.

Teaching Positions Offer Employment To '48 Graduates

Two graduates of the current year at Cal Poly have accepted teaching positions for the 1948-49 school year. J. A. McPhers and H. H. Bathfield will join the faculty, taking over teaching positions that were vacated by the departure of two other instructors.

Polynian Sparkle at Sacramento Ball Tourneys

By Earl Graven

In search of the seemingly greener pastures of one of the print shop's linotype operators, called, "I'm Laughing on the Inside," the Polynian Sparkle is now, and wish them a world of good fortune.

 coef had the following to say:

"I'm Laughing on the Inside" is that my pal, Art G., is considering a change of occupation. He used to be a nice guy deli clerk at the El Camino bowling alleys. Certainly did hate to see our old friend set up the pins in the gutter. Of course, he'll be missed, but we wish him well in his new endeavor.

Morosko's Mailbag

By Herb Moroski

He used to be a nice guy deli clerk at the El Camino bowling alleys. "I'm Laughing on the Inside," the Polynian Sparkle is now, and wish them a world of good fortune.

The Polynian Sparkle is delighted to join the ranks of the happily married. It all takes place on Saturday, August 23rd, in the little town of Orcas, Ill., and it doesn't happen to a nice guy.

All attention bow down! The guys who print this up paper are getting more work. Printers' Weekly, San Bern, Beasley, Curley, Bob Belland, Herman Lindhard, and instructor Guy Colburn can be seen quietly going about their work faster than they can set us up at the El Camino bowling alleys. As yet, Bob "Pitcher's Delight" Beasley hasn't lost his fellowship and harmonics. Beasley is one of those guys who can't wait to get up the pins in the gutter.

"I'm Laughing on the Inside" certainly did hate to see our old friend Bill Beach lose the fold. Mr. Beach's studio promises, however, will have no trouble in working around.

Congress is up in arms over the marriage of one of Cal Poly's finest athletes. It all takes place on Saturday, August 23rd, in the little town of Orcas, Ill., and it doesn't happen to a nice guy.

McPhee Announces Stuff Changes For Library

New appointments to the California State Polytechnic college library staff were announced today by Julian A. McPhee, president of the college.

Appointed as assistant reference librarian in the main reading room is Carl Stickler, a graduate of the school of library service at Columbia University. Stickler received the degree of master of library science from Cornell University in 1936, when he was a native of Ithaca, N. Y.

Miss Mary Ellen Dunkelburger, also a graduate of the library service school at Columbia, has been named assistant cataloger. Miss Dunkelburger graduated from the service school in June of this year. She has served as assistant in the cataloging department in the New York Public Library in York, Pa. She is a graduate of Pennsylvania State College.

Marcus Gold, formerly the assistant reference librarian, has assumed duties as the new assistant in charge of the audio-visual education section in the college. This is the first time in the history of the college that any member of the library staff has been able to devote full time to this section. Alvin White, head librarian states others appointed are Miss Gloria Billett of Cayucos, former San Francisco junior college student, who is assisting as a stenographer in the cataloging department, and Miss Shirley Pedrunti who is serving as a stenographer for Mrs. Dorothy Wright, assistant librarian.

Assisting during the summer months in the library are Mrs. Pat Coyne and Miss Jull Morris.

More on “Gus” (Continued From Page Two) and wedges it against the roof of the cavern. Gus warns that the trap now acts higher, blithely gives himself the square play. Bloody Hemorrhoids.

An interesting note here is that a gopher seldom goes more than two-eighths of a mile from the place of his birth. When he does travel, which he is doing constantly, he moves about in a limited area just looking for food or another likely spot to settle down for a night.

On the campus these methods are used to exterminate gophers—Bear Dune trap, carbon monoxide gas, and strychnine on carrots. The latter two are used only as a last resort when the burrows are too deep to dig. Poisoning is hazardous to pets and it does not determine the number of gopher destruction. Notwithstanding the vigilance of the "police force" and the various traps and poisons used to trap him, Gus and his family are on the increase. E. A. Riales is here warned that he may have another traffic problem on his hands.

Expanding Faculty (Continued From Page One) the past six years he has been assistant professor of biology at Southeast Missouri State college. Two instructors have been added to the physical education department—Theodore Mathew and Edward H. Clark.

Mathew, a graduate of the University of California, will instruct in chemistry. He has done additional study at Stanford University and at the College of the Pacific. He served as a research assistant at Highland elementary school in Alameda, instructed at Richmond high school, instructor at San Mateo junior college, served as a colonel in the C. & A. Army where he directed civilian pilot training, and was in the rated flight business in San Francisco for a year.

Clark, physics instructor, received the B.S. degree from the University of Rochester and his master's from UCLA. He served as undergraduate teaching assistant at the University of Rochester and as a graduate assistant at UCLA.

518 Count Shows Slump For Second Summer Session Registration figures boomed at Cal Poly last week as 518 students enrolled for the second summer session which will run until September 5.

C. Paul Winner, assistant dean in charge of admissions, guidance and placement, stated this figure exceeds what was expected during the second summer session. However, the enrollment is below the 711 that registered for the first six weeks.

Winner stated that only 600 were expected to register for this session.

In breaking down this figure, 17 are new students, 46 are former students who did not register for the first session, and the rest are holdovers from the first quarter.

Other appointments are Miaa Gloria Dunkelburger, named assistant cataloger. Miaa Mary Ellen Dunkelburger, a graduate of the library service school in June of this year.
