Annual Holiday Luncheon tickets on sale Nov. 10

Tickets for this year's annual Holiday Luncheon, set for Wednesday, Dec. 3rd, will be on sale from Monday, Nov. 10, through November 25th. Tickets are $30 and will be sold on a first-come basis. Employees are urged to buy tickets early.

The buffet will include rosemary roasted chicken or feta-tribble-boudin, garlic mashed potatoes, vegetable medley, mixed green salad, and Waldorf and jicama orange salads, breads, beverages, and apple swizzle.

Staff members are provided with the entertainment. Canned goods and cash donations will be collected at the door. To reserve tickets, call Kay Riedel at ext. 6-1314; Gen Bohn, ext. 6-2321; Sydney Francis, ext. 6-5492; Anne Arnst, ext. 6-4251; Barbara Pens, ext. 6-2161; Joanne Elk, ext. 6-5767; Chris Lancektti, ext. 6-2226; Sondra Gorman, ext. 6-2131; Angela Von Rauner, ext. 6-1121; Maria Gomez-Jaruguel, ext. 6-5866; Dawn Annoni, ext. 6-0299; Lynette Klooester, ext. 6-7993.

Tickets for "The Imaginary Invalid" are $8 for the public and $7 for students and staff. The play is produced under the auspices of the College of Liberal Arts.

Position vacancies

Vacancy information and applications for the following positions are available from the appropriate Human Resources office. Vacancy information can also be accessed from the Cal Poly home page on the World Wide Web (address: wwww.calpoly.edu, click on "General Information").

[Admissions]

Admissions (Adm. 312, ext. 6-2844)

Candidates interested in faculty positions are asked to contact the appropriate department office at the phone number listed for more information and an application. Please submit all applications materials to the department head/chair unless otherwise specified. Rank and salary are commensurate with qualifications and experience, and timescale where applicable, unless otherwise stated.

CLOSING DATE: December 31

Assistant Professor in Recreation, Management, Natural Resources Management Dept. (805/756-2702). Time-track position; academic year appointment starting fall '98. Duties include teaching undergraduate commercial recreation, tourism core recreation administration courses; relevant research; and professional involvement in the tourism industry. Ph.D. in recreation, park management, tourism, natural resources, or a related field with a minimum of one post-graduate degree in recreation, park management, or tourism. Applicants should have a combination of teaching, practical and scholarship expertise in commercial recreation and tourism. Knowledge of rural recreation, sustainable tourism development and planning is required. Preference will be given to applicants who possess advanced computer literacy and instructional media expertise. Application to Bill Hendricks, Search Committee Chair, Natural Resources Management Dept., Recreation Administration Program.

CLOSING DATE: December 1

Network Analyst (Foundation level), ITS-User Support Services (Unit 95), $15.40-$21.90/hr, temporary interministration-call to 6009, with possible extension.

NOTE: For positions marked with an asterisk, qualified on-campus applicants currently in bargaining units 2, 5, 7, and 9 will be given first consideration.

[Foundation] (Adm. Build. 300, ext. 6-2747)

Assistant Professor in Recreation, Management, Natural Resources Management Dept. (805/756-2702). Time-track position; academic year appointment starting fall '98. Duties include teaching undergraduate commercial recreation, tourism core recreation administration courses; relevant research; and professional involvement in the tourism industry. Ph.D. in recreation, park management, tourism, natural resources, or a related field with a minimum of one post-graduate degree in recreation, park management, or tourism. Applicants should have a combination of teaching, practical and scholarship expertise in commercial recreation and tourism. Knowledge of rural recreation, sustainable tourism development and planning is required. Preference will be given to applicants who possess advanced computer literacy and instructional media expertise. Application to Bill Hendricks, Search Committee Chair, Natural Resources Management Dept., Recreation Administration Program.

CLOSING DATE: December 1

Part-Time Lecturer Pool, Landscape Architecture Dept. (805/756-1319). Possible openings during winter and spring quarters 1999. Primarily teaching in core courses in professional practice, site analysis, planning and design; landscape architectural construction; materials of construction; design fundamentals; and design theory. Must have master's or bachelor's degree in landscape architecture or related field, and significant teaching experience. Preference will be given to applicants with expertise in site analysis, planning and design. Application to Paul Zingg, Search Committee Chair, Landscape Architecture Dept.

[Foundation] (Adm. Build. 300, ext. 6-2747)

A leading American poet to read Nov. 14

A leading American poet whose "poetic concerns range from the vagaries of sexuality to the pressures of mortality" will visit the university on Nov. 14. Paul Zimmer’s images and ideas seem both humorous and conceptual," says English Professor Kevin Clark. Zimmer, who is the director of the University of Iowa Press, has published 11 books of poetry. His most recent, "Crescendo to Sunlight: Selected Poems," is a rich and varied collection of more than 100 poems that range across 35 years, offering both a retrospective and a current look at his work. Other work by Zimmer includes "The Family Re-unions," which won an Award for Literature from the Americas Academy and Institute of Arts and Letters, and "The Great Bird of Love," which was selected for the National Poetry Series. The reading will be held in the Phillips Recital Hall in the Cohan Center. Tickets are $2 for students and $3 for the public. The presentation kicks off the 14th annual San Luis Obispo County Poetry Festival scheduled to run from Nov. 14 through Nov. 23. The reading is also part of Cal Poly’s Writer’s Series. The ticket price is $5 for the festival and $3 for the public. The presentation benefits the Poetry Festival and the Literacy Council. For more information, call the Music Department at ext. 6-406.

... Sports Complex cured by the Foundation from outside sources. President Baker has asked the Foundation not to use its own capital. The debt service on the secured loan is well within the annual private and special support capacity of Athletics. The idea is to employ those special donations, and secure from private sources for the university’s academic program. Sports Complex funds come from those who designate their support to that facility. As mentioned above, the cost of relocating the Sheep Unit will be paid from the Facilities Planning budget. Special regard, however, must be given to our plus expenses, and relocation of the rodeo facility is to be covered by donations secured from private sources by the rodeo program. Finally, maintenance and utilities costs for the Sports Complex will be paid by the university. It should be noted that most of these costs would have been incurred on the fields eliminated by university recreation elsewhere on the campus.

What is the history of consultation on this project?

As described above, preliminary campus discussion began in 1990-1991 and became focused in 1994 with the tentative identification of a site for a new equestrian facility. The Campus Planning Committee was involved early in these discussions. The Planning Committee includes representatives from colleges, the Academic Senate, ASL, and the city and county of San Luis Obispo. The committee reviewed and adopted the campus land use master plan which identified potential recreation use sites. Finally, the campus master plan was reviewed and endorsed specific locations for the recreational fields and adopted this project schematic design. In response to concerns about the initial site location expressed by the College of Agriculture and Land Use Committee in spring 1995, the university worked with the committee to select a site that had the college’s endorsement.

Campus opinion has been sought through presentations before the Academic Senate and student groups. During the design process, the Facilities Planning Department consulted with campus officials and conducted public forums in June 1996. Once the draft environmental impact report was prepared, it was opened to public review during a 60-day period, and it was formally presented at a meeting during a November 1996 public forum at the Monday Club. The university has also consulted with the Campus Landscape Advisory Committee. In early spring 1997 the university invited the Biological Advisory Committee to provide advice and recommendations on procedures in which to mitigate the environmental impact of the project and about potential ecological restoration measures. The university has received a report from the committee and has committed to ongoing efforts to follow up on its recommendations. During the assessment and planning phases of this project, ASL and College of Liberal Arts suggested that the university may want to seek additional sources of public discussions, board meetings, financial briefings and an open forum and conducted a student survey. Discussion by students regarding the need for replacement and enlarged facilities for the Sheep Unit was ongoing during construction of the Recreation Center. Needs identified by the student body have been incorporated into the design of the complex.

Pianist to give talk-demo, recital

Seattle pianist Ryan Whitney will present a free recital at 7:30 tonight (Nov. 5) and a lecture-demonstration at 11 am Thursday, Nov. 6, both in Room 218 in the Davidson Music Center. Whitney is currently a graduate student in the works of late 19th and early 20th century Russian composers, will begin the evening recital with Nikolai Medtner’s Two Szaskii in C minor and Alexander Scriabin’s Sonata No. 8 and Waltz.

He will also play Sergei Rachmaninoff’s “Ten Preludes and Polonaise from Peter Tchaikovsky’s opera "Eugene Onegin." The programs are sponsored by the Music Department and College of Liberal Arts.

Confident communications focus of Nov. 19 workshop

Learn to "Communicate with Confidence" at a Human Resources workshop scheduled from 1 to 4 pm Wednesday, Nov. 19, in UU 220. Professor Fred Stults of the Psychol

Women’s Studies plans fall quarter potluck

Students, faculty and staff are invited to the Women’s Studies Fall Quarter Potluck from 6:30 to 8:30 pm Wednesday, Nov. 12, at the home of Shawn Burson, a professor in the Psychology and Human Development Department. To sign up for the potluck and obtain directions, call Burson at 756-2671 or the Women’s Studies Program Office ext. 6-1525.
... Sports Complex

Concerns raised by several individuals, including faculty and staff from the Cal Poly Biological Sciences Department, aed the extended public review period. The CSU review determined that these individuals had not introduced information sufficient to delay approval of the FEIR or the project, and they were encouraged to discuss their concerns with the campus administration regarding follow-up to their concerns.

- The design of the complex and the EIR were developed simultaneously. As problems were identified, the scope of the biological sciences department's concerns changed. A reduction from seven to six recreation fields and its configuration modified to mitigate environmental concerns.

The CSU Board of Trustees approved the FEIR and the Sports Complex proposal at its March 1997 meeting.

Biology faculty study

In the meantime, the administration encouraged an independent, third-party committee formed by the Biological Sciences Department to study the project and its implications for instruction at Cal Poly. The university's Biology Advisory Committee last week presented a report titled "Preliminary Biological Study of the Impacts of the Cal Poly Sports Complex".

- The report says that the proposed sports-complex site and the surrounding area currently show environmental problems owing to land-use practices started many decades ago and that, in the process of building this complex, efforts could and should be made to mitigate that earlier damage.

- The report suggests that, "Prior to construction..." the exact locations of wetlands in the field for our examination. We will work with the developer and the University to provide a larger buffer zone with a goal of providing a minimal buffer zone of 50 feet." (from wetlands).

- The report goes on to say: "If we can work together to mitigate problems owing to land-use practices..."

- The report concludes: "We must work together to mitigate problems owing to land-use practices..."

What are the educational issues?

Relocation of existing agricultural facilities

Sheep Unit and related infrastructures

The administration has made a commitment to use state funds to relocate the College of Agriculture's Sheep Unit and to undertake necessary infrastructure improvements, including a road upgrade and significant lead-paint remediation. It is likely that this work would have eventually been necessary, even without the Sports Complex, because of pollution problems. (IPE) The cost of relocating the Sheep Unit is estimated to be $380,000, with construction costs accounting for $200,000 of this total. Of this amount, $90,000 will come from the Facilities Planning budget, and the balance will come from special repair funds and current-year surplus revenues.

Rodeo facility: The present rodeo facility will also be displaced by the Sports Complex. The rodeo program is a student club activity. Like other club activities, it does not receive state funds. The program has historically been supported generously by private donors, and we anticipate that the rodeo program will be able to secure external donations to support relocation of the rodeo facility. A separate environmental assessment of the proposed rodeo facility for the site is being undertaken.

Potential educational uses of the new Sports Complex

The university can use the building of the new sports project as an opportunity to create a better teaching environment in the form of a living biological laboratory.

- The surrounding acreage can be used by students and the faculty to experiment with different methods to remediate environmental problems and, in the process, actually restore and enhance the wetlands and other wildlife habitats on campus.

- As for the sports fields themselves, they will give students a hands-on laboratory that will provide practical experience that is important in a Cal Poly education. For example, students and faculty can use the site to evaluate the use of different grasses and other plants to see if they are suited for use in a recreation area while also experimenting with irrigation practices, fertilizers, etc.

How is the complex funded?

- The report concludes: "We must work together to mitigate problems owing to land-use practices..."
Solicitation of vacation leave

Employees are being asked to donate vacation credits on behalf of Stephanie Allen, assistant professor in Computer Engineering, who must take several months off to care for her newborn son who is undergoing surgery.

Donated vacation credits will help meet the university's commitment to protect credits for all employees who must use them for family leave.

Evaluating teaching topic of videconference

Faculty members are invited to participate in an interactive videconference designed to improve college teaching and enhance the evaluation process.

"Evaluating Teaching Performance" is scheduled from 10 am to noon on Nov. 14, in Room 25 in the Business Building.

The program will be presented by Peter Seldin, distinguished professor of management in the Lubin School of Business at Pace University in New York, and Thomas Angelo, professor of educational and psychological studies and coordinator of the Higher Education Program at the University of Miami.

The workshop will focus on student ratings, peer review, self-assessment, teaching portfolios, mid-course feedback, and the relationship between teacher evaluation and student learning.

It will include a variety of short presentations, demonstrations, visuals, role-playing, and dialogue. Participants will:

- Review the latest research
- Discover what works, what doesn't, and why
- See and hear examples of the best practices.

Students will win in best-paper contest

Two environmental science students split the $250 first-place award in a statewide competition for papers on pest control.

Shelly Head wrote about the use of reflective mistiches to control whitflies, and Tim Thomas researched a paper on a new whitfly insecticide.

The contest was sponsored by the California Agricultural Production Consultants Association, an organization of professional pest-control advisors.

Robert Rice, who teaches integrated pest management in the Environmental Horticultural Science Department, said Cal Poly is the state's biggest user of pest-control advisors. He noted that a Cal Poly crop science student won last year's competition.

More than 70 students studying abroad

Seventy-one Cal Poly students are studying in 12 foreign countries as part of the CSU's 1997-98 International Programs.

The students represent more than 20 academic disciplines and international education programs that have enriched student learning.

More than 20 academic disciplines and international education programs that have enriched student learning.

The program is coordinated by the Office of International Programs.

The proposal also includes a number of projects that will enhance student learning.

Replacing of lost fields

The major reason for the complex is to replace fields that have been lost as a result of past and current destruction of academic and support buildings on campus.

The proposed Sports Complex north of Highland Drive will be the subject of discussion for some time. The issue came to a head recently with the ASI decision to extend student funding and the issuance of a preliminary report by the Biology Advisory Committee.

The contest was sponsored by the California Agricultural Production Consultants Association, an organization of professional pest-control advisors.

Robert Rice, who teaches integrated pest management in the Environmental Horticultural Science Department, said Cal Poly is the state's biggest user of pest-control advisors. He noted that a Cal Poly crop science student won last year's competition.

The Performing Arts Center and the Rec Center and will lose more to the forthcoming parking garage. Even if we had remained in Division II, we would have had to seek replacements for those lost competition spaces. Safe and adequate practice and playing facilities are needed.

The sports complex will support men's and women's soccer, softball, and baseball, and provide a practice space for football.

Why didn't we reduce the size of the project when the city dropped out?

Before the city left the project, the planned number of fields had already been reduced to the number that ASI approved a site for the Sports Complex.

The College of Engineering's Advanced Technology Laboratories will work with the city to meet the minimum needs of clubs and other structured recreation programs.

The proposed Sports Complex will be a proposed project in 1996.

Evaluating teaching performance

The program is coordinated by the Office of International Programs.
Solicitation of vacation leave

Employees are being asked to donate vacation credits on behalf of Stephanie Allen, associate professor in Computer Engineering, who must take several months off to care for her newborn son who is undergoing surgery.

Donated vacation credits will help her receive full pay during her absence. Anyone interested in donating leave credits can contact Ellen Stier in Computer Science at ext. 6-5525 or e-mail the Catastrophic Leave Donation Form.

For family care catastrophic leave, only vacation credits may be donated. Eligible state employees may donate up to 16 hours of vacation credit per fiscal year in increments of one hour or more.

Evaluating teaching topic of videconference

Faculty members are invited to participate in an interactive videconference designed to improve college teaching and enhance the evaluation process.

"Evaluating Teaching Performance" is scheduled from 10 a.m. to noon Friday, Nov. 14, in Room 25 in the Business Building.

The workshop will be presented by Peter Seldin, distinguished professor of management in the Lubin School of Business at Pace University in New York, and Thomas Angelo, professor of educational and psychological studies and coordinator of the Higher Education Program at the University of Miami.

The workshop will focus on student ratings, peer review, self-assessment, teaching portfolios, mid-course feedback, and the relationship between teacher evaluation and student learning. It will include a variety of short presentations, demonstrations, visuals, role playing, and dialogue. Participants will:

• Review the latest research.
• Discover what works, what doesn't, and why.
• See and hear examples of the best practices.

Learn strategies to improve teacher evaluation.

George Stanton from the Assessment and Testing Center will lead a discussion after the videconference, and lunch will be provided to those who make a reservation with Janie Eitel at ext. 6-5935.

Two students win in best-paper contest

Two environmental horticultural science students split the $250 first-place award in a statewide competition for papers on pest control.

Shelly Head wrote about the use of reflective mites to control thrips, and Tiffany Hamlin authored a paper on a new whitefly insecticide.

The contest was sponsored by the California Agricultural Production Consultant Association, an organization of professional pest-control advisors. Robert Rice, who teaches integrated pest management in the Environmental Horticultural Science Department, said Cal Poly is the state's biggest supporter of the contest's pest-control advisors. He noted that a Cal Poly crop science student won last year's competition.

More than 70 students studying abroad

Seventy-one Cal Poly students are studying in 12 foreign countries as part of the University's 1997-98 International Programs.

The students represent more than 20 academic disciplines and have been selected to enhance their nutritional science to computer engineering. They are studying in Denmark, France, Germany, Israel, Italy, Japan, Mexico, New Zealand, Spain, Sweden, Taiwan, and the United Kingdom.

Cal Poly is one of 23 CSU campuses to participate in the International Programs. This year more than 400 CSU students were selected to study abroad.

The international scholars continue to earn academic credit toward their degree during their year abroad.

Students pay their own transportation, housing and food costs, plus home campus fees.

International Programs provides an affordable opportunity for students to study in more than 70 centers of higher education in 17 countries. The programs help fulfill one aspect of the CSU's mission of developing a multicultural communication and international understanding among its students.

What are the environmental issues?

Choice of the site

From among 11 alternatives, the Campus Planning Committee in 1994 initially approved a site for the Sports Complex at the corner of Highland and Highway 101, a site identified on the Land Use Diagram for recreational use. When the College of Agriculture Land Use Committee objected in spring 1995 that this would cause loss of Class 1 agricultural land, the university's land use has negativley impacted access to and maintenance of these resources. Now, we are planning to increase student housing on campus, and this will further increase the demand for off-campus facilities for recreation.

Intercollegiate athletics

Athletics has lost competition space to Engineering and the Rec Center and will lose more to the forthcoming parking garage. Even if we had remained in Division II, we would have had to seek replacements for those lost competition spaces. Safe and adequate practice and playing facilities are needed.

The sports complex will support men's and women's soccer, softball, and baseball and provide a practice space for football.

Why didn't we reduce the size of the project when the city dropped out?

Before the city left the project, the planned number of fields had already been reduced to the number that ASI considered the minimum acceptable. With both campus and city use, six fields would have been necessary to meet the minimum needs of clubs and other structured recreation programs. With five fields, we would have to seek replacements for those lost competition spaces. Safe and adequate practice and playing facilities are needed.

Why didn't we reduce the size of the project when the city dropped out?

Before the city left the project, the planned number of fields had already been reduced to the number that ASI considered the minimum acceptable. With both campus and city use, six fields would have been necessary to meet the minimum needs of clubs and other structured recreation programs. With five fields, we would have to seek replacements for those lost competition spaces. Safe and adequate practice and playing facilities are needed.

The contest was sponsored by the California Agricultural Production Consultant Association, an organization of professional pest-control advisors. Robert Rice, who teaches integrated pest management in the Environmental Horticultural Science Department, said Cal Poly is the state's biggest supporter of the contest's pest-control advisors. He noted that a Cal Poly crop science student won last year's competition.

The contest was sponsored by the California Agricultural Production Consultant Association, an organization of professional pest-control advisors. Robert Rice, who teaches integrated pest management in the Environmental Horticultural Science Department, said Cal Poly is the state's biggest supporter of the contest's pest-control advisors. He noted that a Cal Poly crop science student won last year's competition.
Sports Complex

The report calls for further study so that "...more-specific recommendations and mitigation plans can be developed to protect Cal Poly's sensitive biological resources for future generations. This will not only result in a more beautiful campus, it will provide quality outdoor laboratories, a better learning environment for all students, and a wildlife area that will support a diversity of species including several that are currently listed as sensitive species. We believe the Cal Poly campus could support a model campus for agriculturally, biologically, and environmentally sound land-use practices and should strive to do so." University officials welcome the Biology Advisory Committee report and look forward to continued work with the committee to identify and implement specific measures to mitigate the impact of the Sports Complex project. The university also welcomes the opportunity to work with the committee to identify potential longer-term measures for restoration and enhancement of campus ecosystems.

Are the educational issues?
Relocation of existing agricultural facilities

Sheep Unit and related infrastructures: The administration has made a commitment to use state funds to relocate the College of Agriculture's Sheep Unit and to undertake necessary infrastructure improvements, including a road upgrade and significant land-management projects. It is likely that this change would have eventually been necessary, even without the Sports Complex, because of the need to address pollution problems. (DEE) The cost of relocating the Sheep Unit is estimated to be $380,000, with construction costs accounting for $200,000 of this total. Of this amount, $90,000 will come from the Facilities Planning budget, and the balance will come from Special Repair Funding and current-year surplus revenues.

Rodeo facility: The present rodeo facility will also be displaced by the Sports Complex. The rodeo program is a student club activity. Like other club activities, it does not receive state funds. The program has historically been supported generously by private donors, and we anticipate that the rodeo program will be able to secure external donations to support relocation of the rodeo facility. A separate environmental assessment of the proposed relocation site for the facility is being undertaken.

Potential educational uses of the new Sports Complex

The university can use the building of the new sports project as an opportunity to create a much better teaching environment in the form of a living biological laboratory.

The surrounding acreage can be used by students and the faculty to experiment with different methods to remediate environmental problems and, in the process, actually restore and enhance the wetlands and other wildlife habitats on campus.

As for the sports fields themselves, they will provide students a hands-on laboratory that will provide practical experience that is important in a Cal Poly education. For example, students and faculty can use the site to evaluate the use of different grasses and other plants to see if they are suited for use in a recreational area while also experimenting with irrigation practices, fertilizers, etc.

How is the complex funded?

The report says that the proposed sports-complex site and the surrounding acreage currently show environmental problems owing to land-use practices started many decades ago and that, in the process of building this complex, efforts could and should be made to mitigate that earlier damage.

The report suggests that, "Prior to construction... the exact locations be staked in the field for our examination. We will work with the developer and the University to provide a larger buffer zone with a goal of providing a minimal buffer zone of 50 feet" (from wetlands).

The report goes on to say that the Cal Poly Sports Complex will result in unavoidable impacts to wildlife and wildlife habitats, especially wetlands, on and around the project site. However, by using a combination of on-site and off-site mitigation, we believe the impacts can be mitigated.

The College of Engineering is discussing its use with industry partners in a promotional television program being aired in major U.S. cities. They are encouraged to support the "Millennium of Love" event that "helps people graduate to be successful engineers," said Dean Peter Lee. The college is using the slogan to "express our appreciation to our industrial partners and to invite other companies to consider developing a similar relationship with us," Lee added.

The presentation is part of the Phi Beta Kappa Day at Cal Poly, sponsored by the Philosophy Department. For more information, call ext. 6-2041.

Poly Forum to take a peek at Rose Float

Want to get a sneak preview of Cal Poly's contribution to the 1998 Tournament of Roses parade? You can at the next Poly Forum from 7:30 to 9 am on Tuesday, Nov. 18. The float is the latest product of a 50-year tradition involving students at Cal Poly, San Luis Obispo, and their peers at Cal Poly Pomona. No other group — amateur or professional — has driven a float down Pasadena's Colorado Boulevard on 50 consecutive New Year's days.

The front half of the float, including its drive system, is built by students in San Luis Obispo, who spend a week of weekends working on the project. The structure is moved to Pomona on Thanksgiving weekend to be joined with the second part.

The theme for this year's float is "Countryside Joyride" and features flocked farm animals.

Poly Forum participants will get a peek at the front half of the 1998 float, talk to the students who built it, and learn how it will be finished, decorated, and driven.

The forum, part of Rose Float Week, will be held at the Rose Float Flower Field. (If rain, the forum will be held in the Performing Arts Center.) Tickets are $10 if bought by Friday, Nov. 14, and $14 thereafter. Breakfast and parking are included. To reserve by phone, call ext. 6-1590.
Leading American poet to read Nov. 14

A leading American poet whose "poetic concerns range from the vagaries of sexuality to the pressures of mortality" will give a recital Friday, Nov. 14 in the San Francisco Examiner as having the "voice of molten gold." She has performed with some of the world's "great opera companies, symphonies, and singers," including Jessye Norman and Placido Domingo.

She has performed under the batons of James Levine, Simon Rattle, and Zubin Mehta and recently made her Carnegie Hall debut with Loren Maazel and the Pittsburgh Symphony.

Stein, a pianist, conductor, scholar, and teacher, is recognized as one of the leading authorities on Schoenberg and his music.

He became associated with the Viennese master while a student at USC and UCLA in the mid-1930s and Schoenberg came to Los Angeles as a refugee from Nazi Germany. Their association lasted 16 years, with Stein first as student and eventually as editor of the master's texts on harmony, counterpoint, and composition.

Admission to the recital is free; however, donations will be accepted for Cal Poly's Vocal Studies Scholarship Fund.

The recital is sponsored by the Music Department and College of Liberal Arts. For more information, call the Music Department at ext. 6-406.

Sports Complex
cured by the Foundation from outside sources. President Baker has asked the Foundation not to use its own capital. The debt service for the secured loan is well within the annual private and special support capacity of Athletics. It should be noted that Sports Complex are not being taken from private sources for the university's academic program. Sports Complex funds come from those who designate their support to that facility.

As mentioned above, the cost of relocating the Sheep Unit will be paid from the Facilities Planning budget. Special regard should be given to the plus expenses, and relocation of the rodeo facility is to be covered by donations secured from private sources by the rodeo program.

Finally, maintenance and utilities costs for the Sports Complex will be paid by the university. It should be noted that most of these costs would have been incurred on the fields eliminated by university construction elsewhere on the campus.

What is the history of consultation on this project?

As described above, preliminary campus discussion began in 1990-1991 and became focused in 1994 with the tentative site for the Rodeo and Recreational fields. The Site Planning Committee had been involved early in these discussions. The Site Planning Committee includes representatives from colleges, the Academic Senate, ASI, and the City and County of San Luis Obispo.

The committee reviewed and adopted the campus land use master plan which identified potential recreation use sites. The university has received a report from the committee and has committed to ongoing efforts to follow up on its recommendations.

During the assessment and planning phases of this project, ASI also held a number of public discussions, board meetings, financial briefings and an open forum and conducted a student survey. Discussion by students regarding the need for replacement and expanded recreational facilities on campus.

Women's Studies plans fall quarter potluck

Students, faculty and staff are invited to the Women's Studies Fall Quarter Potluck from 6:30 to 8:30 pm Wednesday, Nov. 12, at the home of Shawn Burns, a professor in the Psychology and Human Development Department.

To sign up for the potluck and get directions call Shawn's house at 545-1625 or visit the Women's Studies Program Office ext. 6-1525.
Annual Holiday Luncheon tickets on sale Nov. 10

Tickets for this year’s annual Holiday Luncheon, set for Wednesday, Dec. 3, will be on sale from Monday, Nov. 10, through November 25th.

Tickets are $5 and will be sold on a first-come, first-served basis. Employees are urged to buy tickets early.

The buffet will include rosemary roasted chicken or feta-artichoke involtini, garlic mashed potatoes, vegetable medley, mixed green salad, and Walnut and jicama orange salad, breads, beverages, and apple strudel.

Staff members are asked to provide the entertainment.

Canned goods and cash donations will be collected at the door. To reserve tickets, call Kay Riedel at ext. 6-1314; Gen Bose, ext. 6-2321; Sydney Francis, ext. 6-5492; Anne Arnest, ext. 6-2451; Barbara Fenske, ext. 6-2096; Joanne Lavelle, ext. 6-5767; Chris Lancettti, ext. 6-2226; Sondra Gorman, ext. 6-2131; Angela Von Raumer, ext. 6-1121; Maria Gomez-Juaregui, ext. 6-5866; Dawn Ammoni, ext. 6-0659; Lynette Elcoester, ext. 6-7693.

Tickets for “The Imaginary Invalid” are $8 for the public and $7 for students and staff.

The play is produced under the auspices of the College of Liberal Arts.

Position vacancies

Vacancy information and applications for the following positions are available from the appropriate Human Resources office. Vacancy information can also be accessed from the Cal Poly home page on the World Wide Web (address: www.calpoly.edu-click on “General Information”).

<table>
<thead>
<tr>
<th>FACULTY (Adm. 312, ext. 6-2844)</th>
</tr>
</thead>
</table>
| Candidates interested in faculty positions are asked to contact the appropriate department head at the phone number listed for more information and an application. Please submit all applications to the department head/chair unless otherwise specified. Rank and salary are commensurate with qualifications and experience, and time where applicable, unless otherwise stated.

CLOSING DATE: December 31

#83030: Academic Assistant in Recreation Administration, Natural Resources Management Dept. (005756-2702). Instructor-track position; academic year appointment starting fall 1998. Duties include teaching undergraduate recreational, tourism and core recreation administration courses; relevant research; and professional involvement in the tourism industry. Ph.D. in recreation, park management, tourism, natural resources, or a related field with a minimum of one post-graduate degree in recreation, park management, or tourism. Applicants should have a combination of teaching, practical and scholarship expertise in professional recreation and tourism. Knowledge of rural recreation, sustainable tourism development and planning is required. Preference will be given to candidates who possess advanced computer literacy and instructional media expertise. Apply to Bill Hendricks, Search Committee Chair, Natural Resources Management Dept., Recreation Administration Program.

CLOSING DATE: December 1

#83052: Part-Time Lecturer Pool, Landscape Architecture Dept. (005575-1319). Possible openings during winter and spring quarters 1998. Primarily teaching in core subjects areas of professional practice, site analysis, planning and design; landscape architects of construction, materials of construction; design fundamentals; and design theory. Must have master’s or bachelor’s degree in landscape architecture or related field, and significant teaching experience in related subjects. Apply to Search Committee, Landscape Architecture Dept.

CLOSING DATE: November 21

#83027: Part-Time Lecturer Pool, Landscape Architecture Dept. (005575-1319). Possible openings during winter and spring quarters 1998. Primarily teaching in core subjects areas of professional practice, site analysis, planning and design; landscape architects of construction, materials of construction; design fundamentals; and design theory. Must have master’s or bachelor’s degree in landscape architecture or related field, and significant teaching experience in related subjects. Apply to Search Committee, Landscape Architecture Dept.

CLOSING DATE: November 21

#83028: Part-Time Lecturer Pool, History Dept. (005756-2702). Possible openings during winter and spring quarters 1998 to provide supervised instruction of members of the social sciences in a middle school setting. The purpose is to provide a current California Social Science Teacher Certification for those who are interested in teaching social sciences in a middle school setting. Successful candidates must have a current California Teaching Credential in the Social Sciences, have experience as a master teacher and teaching pedagogy courses, and Master’s degree preferred. Send application, CV, three letters of reference, and 10-15 pages of history. (Continued on page 7)

щ

Only Argan’s money. As the household disintegrates and chaos ensues, a saucy and inventive maid employs a number of schemes to expose the truth.

Dance and Theatre Department

The Cal Poly Dance and Theatre Department will open its 1997-98 season on Molliere’s comical farce “The Imaginary Invalid” at 8 p.m. Thursday, Nov. 13.

The play will be staged again at 8 p.m. Friday and Saturday, Nov. 14 and 15, with a matinee performance at 2 p.m. Sunday, Nov. 20-22, in the all-the-all theatre.

Moliere’s tale of how love and truth triumph until a scheming lawyer, Argan, a hypochondriac who tries to marry his oldest daughter, Angelica, to a dim-witted doctor in an attempt to reduce his own doctor’s bills.

Angelica, though, loves the doctor’s son, and Argan’s second wife loans only Argan’s money. As the household disintegrates and chaos ensues, a saucy and inventive maid employs a number of schemes to expose the truth.

Dance and Theatre Department

Chair AI Schnupp will direct the play. David Thayer has designed the set, and Howard Geis is the technical director. Both are staff members.

Tickets are on sale to country music star John Anderson’s Feb. 12 concert in the Cohan Center’s Harman Hall. Tickets are $18 and $26 for this Cal Poly Arts Center Stage event.

Campus facilities info available in ‘Plan Room’

The Facilities Planning Department Plan Room, upstairs in the FACULTY Services Warehouse Building, provides access to resources that the facility and staff can use for classes and other general university purposes.

Materials include campus maps and general-purpose building and room maps, as well as blueprints and plans of current campus projects. Room layouts, available in 8-1/2 x 11” size, can be helpful when units remodel or simply rearrange furniture in an office.

The information is also made available to senior project students. Other students should obtain these items from the Media Resource Center in the Architecture Building, Room 101; the Kennedy Library Maps and Documents section; the SCARAB Print Room in Engineering West, Room 232; and the Facilities Home Page (via Cal Poly Home Page) on the Web for digital versions.

For an appointment to access these resources, please call Debby Ryan at ext. 6-6806.

Food industry endows ag scholarship

The University of California, Santa Barbara’s ag alumni association, a group of many Cal Poly alumni, established the scholarship fund with $12,000. The organization is committed to raising the figure to $50,000 within a few years, according to Jack Kooker, chairman of the scholarship committee and director of the United Agribusiness League.

This year $750 will be awarded to a student in the Food Science and Nutrition Department interested in working in the food processing industry in the northern part of the state.

“We want to be able to contribute to building the industry here in Northern California,” Kooker said.

When the scholarship fund reaches $50,000, the annual student award will be $2,000, Kooker said.

Wayne State library dean to talk on information age

The dean of the university libraries at Wayne State University will give a presentation on “Student Learning in the Information Age” at 3 p.m. Wednesday, Nov. 12, in the Wayland Dining Room.

Patricia Breitwe, a former American Council on Education Fellow, is chair of the Wayne State University Information Literacy, a group of more than 65 national organizations concerned with people’s need to understand and use information effectively.

While at Cal Poly, Breitwe will also meet with campus committees and units to explore ways to structure information competency programs for effective teaching and learning.

Breitwe’s visit is sponsored by Tich Davis, dean of the library, and Paul Zingt, provost & vice president for academic affairs.
