Epicor donates software to College of Engineering

A recent gift of software will help engineering and business students learn high-tech methods for planning and tracking manufacturing jobs.

Epicor donated a Vista software package that will simulate “real-world” manufacturing management environments, according to Sema Alpeltin, chair of the Industrial and Manufacturing Engineering Department.

"Vista will provide us opportunities for experimentation,” Alpeltin said. “Among its components is a very effective integrated financial analysis module and a good job-tracking module. The integrated system will allow students to gain greater experience with the overall impacts of decisions made on the shop floor and in the production planning modules.

Students from the College of Engineering and the College of Business will use the Vista software as part of the Teaching Factory, a project partially supported by Cal Poly Plan fund.

The Teaching Factory is being developed jointly by Alpeltin; Reza Pourghasemipour, professor of industrial engineering; Din Waldorf, assistant professor of industrial engineering; and Patricia McQuaid, associate professor of business management.

... Endowment continued from page 1

"This wonderful gift means a great deal to us,” said Vice President for Student Affairs Juan Gonzalez. “It will further insure we never forget Rachel.”

Planned by students, ReEmer is held in conjunction with “Take Back the Night,” an event dedicated to preventing violence against women.

ReEmer first took place in 1998 by students in the ASI, Panhellenic Council, and Women’s Center and has become a Cal Poly tradition. It is intended to be a time for reflection and commemoration and to provide solace and support.

The event has become a movement to Newhouse and Cuesta College student Andria Crawford, whose bodies were found in the spring of the program in the spring of 1999. The program also honors Kristin Smart, a Cal Poly student missing since May 1996.

For more information, contact ReEmer and the Newhouse Endowment, call the Women’s Center at ext. 6-2690 or e-mail Jesseine Kelley at jolley@calpoly.edu.

Donations to the program are welcome. Mail checks payable to the Cal Poly Foundation, to Kelley, UU 217-M. D

Distinguished Teachers to hold panel discussion

Professors Colette Frayne of the Global Strategy and Law Area in the College of Business, Carol MacCurdy, English, and Leonard Myers, Computer Science, will also take questions from audience members.

Students from the College of Engineering and the College of Business will use the Vista software as part of the Teaching Factory, a project partially supported by Cal Poly Plan fund.

The Teaching Factory is being developed jointly by Alpeltin; Reza Pourghasemipour, professor of industrial engineering; Din Waldorf, assistant professor of industrial engineering; and Patricia McQuaid, associate professor of business management.
