26 Research on this paper has been aided by a grant funded by the National Science Foundation and the National Institute of Arthritis, Diabetes and Digestive and Kidney Diseases of the National Institutes of Health. I am also grateful for the close attention of Lawrence Finsen, Richard Fenn and Hilde L. Nelson.

“Dreaming Eden”

Rainbows of fish, streamers of dolphins.
A celebration for the world.
Pods of whales breaching, great hands splashing in a bowl of diamonds.
Shadows on the forest carpet were just the wings of eagles.
The redwood had no enemies.
Velvet cats walked the night.
Elephants and wolves had nothing to fear.
Weavings of jungle and swamp abandoned on the loom.
Home only to those who belonged there.
Water was clean, air was visible.
Earth was colonized by flowers.
No one here can remember, but it must have been quite a time.

— Kathleen Malley
