SAC Endorses Proposed Student Gov't Changes

Months of planning a new student body government by the Student Government committee received recognition by Student Affairs council Tuesday night when that group gave wholehearted endorsement to the plan. Dick Johnson, SAC secretary, moved: "That the SAC accept the report as presented by this committee." George Herba, president of the Student Affairs council, seconded the motion.

Reasons for Change

Reassertion of the proposed changes in the student government is the main purpose of the committee. "If this were the first time we were to be organized, we would just have to start all over," George Herba said. "However, we have some limitations, but we can still try to get the changes we really need and solve the problems that we have." The old Student Council was not dissolved, although several members of the Student Affairs council came over to the SAC meeting, and the new group was created in the same manner as the previous committee. The new group will be under the control and supervision of the Student Affairs council." The Student Affairs council is the last word on the subject of the new SAC, "Dick Johnson told the students at the meeting. "We're working on this in the best of our ability, but there are problems involved."

Engineers Top Competition For Second Straight Year

For the second consecutive year Cal Poly mechanical engineering majors have taken top honors in Society of Automotive Engineers competition in California. Len Ackles, who received the Massey award for the southern area, and Dick Canetone, who was given a cash prize in northern competition, were the honorees. They are two of the 120 students who are off-campus housing facilities. Off-Campus Housing Facilities

Fund Drive Bogging Down, Says Tours

The drive's 60-day college union running out its essential week and possibly losing the support of its original projects for the purpose of expanding the student government. The drive, which was started by the Student Affairs council, has not been successful. The drive is being conducted by the Student Affairs council, which is also responsible for the student government. The drive will continue until the funds are raised and the student government is able to meet its obligations.

Off-Campus Housing Facilities Being Checked For Expansion

Beginning of an approved housing plan for off-campus housing for students has been announced by Cal Poly. The plan seeks to allow the lodging of a larger number of students in quarters made available by San Luis Obispo householders. Cal Poly officials are now preparing a list of available rooms which will be visited by students as a means of checking the facilities. The list will be used in the selection of the off-campus housing facilities. The plan is being conducted by the Student Affairs council, which is also responsible for the student government. The drive will continue until the funds are raised and the student government is able to meet its obligations.

ASB Election Set For Tuesday: Fewer Candidates

Poly students will go to the polls next Tuesday and Wednesday to vote once more for next year's student body officers and ASB leaders.

The revolution, which resulted from a violation of campaign rules involving most of the candidates in last month's elections, includes the following ASB aspirants: George Martell, John Rogers, Bill A. (Bill) Brown, president; Bob Schilling, vice-president; Dick Johnson, secretary; and Charles Anderson, treasurer. Candidates for ASB leader include: Larry Mearns, George E. Giesy, John M. Chandler, dean of students, and John Bruno.

Awards Winners . . . Ben Ackles, left, is shown accepting the Dick Canetone, who was given a cash prize in northern competition, were the honorees. They are two of the 120 students who are now off-campus housing facilities. Off-Campus Housing Facilities

ME Head Receives Fulbright Award
Thomas J. Ellick of the Cal Poly zoology department received a Fulbright fellowship for 1954-55. Under the terms of the award, Ellick will teach English at Fathewar University in Pakistan, in the School of Agriculture, beginning in September.

Ellick has also been in the engineering department at Poly, where he has been a faculty since 1948. In the meantime, Ellick has also taught at the University of Hawaii in Honolulu and at the University of Oregon in Eugene.

The Fulbright fellowship is open to American citizens who have completed at least three years of study in the United States.

ROTC Unit States President's Review

"The second annual President's Review for the ROTC cadets will be held at 4:30 p.m. on May 22 in the university auditorium.

All ROTC units and organizations will participate in the review, which will include a parade and a program of speeches and musical numbers. The review will be held in honor of the ROTC cadets and will be open to the public.

The event will be attended by ROTC cadets, faculty members, and guests from the community.

Poulittmen Make Annual Field Trip to SC Area

Poulitmen ranches in the southern California area are currently the subject of study by 10 Cal Poly poultry majors.

The students, accompanied by instructor J. O. Barton, visited ranches in the southern California area and attended a poultry judging competition.

The students were also given the opportunity to observe and take part in various poultry farm operations, including feeding, watering, and egg collection.

Homeless Ones' Set Football Flicker

Outings committee plans outing to be held in Eastern California. Next outing will be held in the desert.

"It's Going to be a Blast," one of the students said. "We're looking forward to it."
Intramural Sports Featuring Softball

Cal Poly’s intramural sports program is rolling again after a short intermission with softball the big item on the calendar. Under the student-directorship of Bob Halvorson, three-six-team leagues are competing Monday, Wednesday, and Friday. The days are set aside for the games, said Halvorson.

Most of the action so far has been supplied by a length equal to half of the “B” division, four win streak. Diablo needed only to get by Equally tough Crandall to win the Monday league. Diablo’s for the games, while Halvorson.

Mustang Spring Gridders
Delight Coaching Staff

It's a mile walk for football predictions, but if the rare display of optimism ever1r's creative in the CAFAA this season, it's forth from grid Coach Hugh Hughes—his prediction: "The Fresno State fans are in for another great year this September 
Curly Kulus.

With eight days remaining to the 60-day spring practice session, the "silver fire" was heard to say that "this is the best spring drill ever seen at Cal Poly." The familiar warning was accompanied in its absence by the usual coach staff Kent the 60-man squad through a series of spring scrimmages.

Confident
Hughes and assistant coach.
Javier Acarruna, Sheldon Harding, and Tom Lee were all unanimous in their praise of the Mustangs, although Harding couldn't resist the usual "compulsion" pitch, that "it's still look ing for lights on the dance floor.

A real ensemble for the starting eleven was the 72-man team that is the departure of Bob Lowe," Lawson, highlighted by the scrimmages, the new backfield. California Poly was at the forefront of the "Ugly monsters" of the conference and set the pace for the rest of the year, as the familiar Poly football men who'll be on hand next September to aid the local coaching staff will the 60-man squad through a series of spring scrimmages.

General Manager
Bob Houston—a tackle last year, but now resembling a center—"that's the kind of football we like to see. We're young and have to be a little rough because we're young."

You're hearing less about these boys in '84.

Baseball Squad Dumps Fresno
In Finals; Averages Released
Fresno State's CCAA baseball champions provided the competition for the final appearance of Coach Bob Mott's '64 Mustangs up in Fresno last week, and it proved to be a fine day all around for the green and gold. They abled the banks by a 6-4 count, gave the hosts a real "complex" and second half of the second spot in the league standings.

Good Reason
The Fresno win gave the Mustangs a fire season slate of 8-1, with only 2 losses. Final season statistics were released early this week by Poly Baseball.

Final Statistics
Dennis Edwards, Chief John, and the cold facts show that no less than 10 Mustangs wound up in that enviable fraternity. For beginners, the "silver fire".

Three years letterman Joe Mueller had a fine year at his standard. Mueller had the most hits in the club with a total of 89, and right behind him was infielder, "Franklin Smith with 69 in all at bats for a 48% average.

In the field the bright light was first baseman Mike Helen, a .368 clip, but only stepped in there 36 times, as compared to 8 at first. Helen's 170 hits to the plate. Mueller had the most hits in the club with a total of 89, and right behind him was infielder, "Franklin Smith with 69 in all at bats for a 48% average.

Another brother is "Alex Greenhalgh," the starting right end, who had a .349 average, and was out of school last season, recently returned home from his plays but he has lost most of his hand running ability or his rattling tackling talent. Making the fullback still the team's center is the popular "Barker's Field,"

Coach Hughes
Teaming to give Poly what many people think is the finest student athlete in the country.

Assembly Committee
Presents Program
Paul Leonard, bird man and musician, will present a program of "Songs of the Birds Harmonized to Music" tonight at 8 p.m. in the Union Hall.

The entertainment is being presented with the approval of the Assembly committee.

Santa Barbara sailboat races away with last week's CCAA single championship as was expected, while the Mustangs scored of Coast Guard fourth place. The Gauchos from San Pedro managed to stuff out a total of 19 points out of a possible 30 to turn back Big Orange State and Los Angeles State who tied for second with 18 points apiece.

The surprise of the tournament proved out to be San Diego City, Granville, as well as Robert. Robert's was a real upset, with the Gauchos in the First Singles division to win unanimous recognition as "the best college player in the CCAA."

Winning the green and gold was Junior Warren. The Poly win was a tough hand during the first day of the tourney, forcing the Aztecs to three sets before losing 4-6, 9-6, 6-4.

PARKING CHANGES
Effective Wednesday morning, the area immediately in front (west) of the Ag. Education building has been made available for 30-minute faculty parking. The area north of the above building will be marked and signed for faculty. It will be closed off at 5 p.m. and will be marked for 30-minute parking and restricted to 30-minute parking.

Poly Dairy Cattle Purchased by Argentinians for Export Breeding Stock

Purchased Holstein-Friesian cattle, bred by California State Polytechnic college, attracted international attention this week when four breeding heifers and one bull were shipped to Argentina. The animals were bought by Manolo Rebella, the pioneer ranching family in Argentina, the Rebella brothers claim. They hope to arrange for another shipment in the near future. Previously the duo imported animals from Washington, Wisconsin and Canada.

The Rebella family are large ranch operators in Argentina with over 2,000 acres of alfalfa and 600 million cows—60 of these registered Holsteins maintained on the ranch, says George Drummon, Cal Poly dairy department head.

Production Cow
"Production of the average cow in Argentina is very low and the quality and quantity with such imports," Drummon says. Scheduled to be shipped about the middle of June, the animals made a favorable impression with the Argentine breeders.

"We like the large, good typeudder of California dairy cattle," the purchasers remarked. The Argentina visitors inspected the poultry and animal husbandry departments while on campus.

One of poultry head Richard Leach and head of the animal husbandry department, Lyman Pennell.

STATE OF MIND...

...AND THE STATE OF THE NATION

Perhaps far more than we realize, the state of our nation depends on our state of mind.

For if false fears can incapacitate an individual, they can do the same to a country, which is made up of individuals.

The people of Union Oil believe in America and its ability to continue to furnish the highest standard of living ever achieved by man.

We are backing this belief this year with a nearly one hundred million dollar vote of confidence which calls for new wells, new products, new plants, new refineries, new tankers, new trucks, new tools, new processes.

All of this will help to create new jobs and new opportunities in the years ahead.

All of this should help to create a state of mind that is good for the state of our nation.

Crops Club Installs Officers for 1954-55

Cuesta Park last night was the scene of the Crops Club agm. Held in the school auditorium, following the elections of new executive officers. Pres. Philip McDade elected secretary-treasurer for next year. Also elected are Jack Long, first vice; Art Mace, second; J. A. Anderson, third; and Kenneth Hazen, fourth. The club officers had an opportunity to meet and socialize with the senior members of the club. The meeting was opened by Pres. McDade, who called the members to order. After the roll call, the treasurer reported that the club had a balance of $350.00 in the treasury. The club officers then went over the financial records and made plans for the coming year. The meeting adjourned at 8:30 p.m. [...]

Senior Plans South America Trip

By Bruce Arnold

A trip to Mexico and South America will highlight the summer vacation plans for senior Bernard Froil, producing major events. From Santa Monica, Calif., Mr. Froil plans to visit Chihuahua, Mexico City, Guatamala, Cuba, Honduras, and Peru. In all of these places he will work for former classmates. He plans to take his friends and see the sights. Mr. Froil is looking forward to his vacation and is looking forward to the experience of seeing his country.

Hot Rod Pilot Makes Hobby Of Building Racing Cars

By Bill Miller

Building and driving hot rods is the dangerous and expensive hobby of Dr. Joe Geller from San Diego. His hobby is one he is committed to and one that he has been working on for over a decade.

Dr. Geller has been building hot rods for over a decade and has become quite skilled in the art of building and driving them. He started with a small car and has gradually increased his collection to include several high-performance machines. His favorite is a 1953 Ford convertible which he has completely rebuilt to include a high-compression engine, disc brakes, and a host of other modifications. He plans to participate in races this summer and is currently working on a new project with the aim of building a car that will be competitive in the top echelon of racing.

The hot rod is a car that is modified to achieve higher performance than the manufacturer intended. Dr. Geller believes that there is much potential for improvement in the world of racing and is dedicated to exploring that potential. He is always looking for new ways to improve his cars and is constantly testing new ideas to see if they work.

Dr. Geller is an experienced racer and has competed in several events, earning several awards and accolades for his performance. He has a passion for the sport and is always looking for ways to improve his cars and his driving skills.

Geller was one of the original board of directors of the San Diego Timing association and has served on the executive committee. For those who wonder how they got started, Geller outlined the following steps:

1. Assemble the parts.
2. Assemble the engine.
3. Assemble the frame.
4. Assemble the suspension.
5. Assemble the brakes.
6. Assemble the body.
7. Assemble the interior.
8. Assemble the electrical system.

The top speed reached in hot rods today is about 160 miles per hour, and the quarter mile acceleration is about 10 seconds. Any hot rodder worth his salt knows that the car is only as good as the parts that go into it, and that the parts must be of the highest quality. The key to success in hot rodding is to be able to balance the parts and to make the car operate as a whole.
