Cal Poly Youngsters Taught To Swim
In Organized Class
Cal Poly's ROTC cadets and leaders are employed in the testing of boys and girls in swimming, under the guidance of assistant football coach, Ralph R. Beede. Each candidate, after the test, will receive a report card, which will be kept on file for future reference. The test will give the candidates a chance to meet the requirements established for their branch of the service. The list of candidates will be kept on file until the end of the current academic year.

J. A. P. Loiselle, head of the ROTC program, has announced the eligibility of 44 Cadets to the airworthy test, to be conducted by the Miles team. Their eligibility was announced at the beginning of the term.

Cal Poly ROTC training has been along general army lines. Graduates are not associated with a specific function of the ROTC program. As members of the west coast's first "Branch-General" ROTC program, they will be trained in a combination of physical training and academic instruction, in order to prepare them for further training in their branch of the service.

The selected list included:
- Omar King, Jr.
- Frank O'Keefe, Thomas Dubois
- John Moore, Jr., Charles Blevins, Michael Instructor
- William H. Williams
- Richard Carlson
- Randolph Wahl
- Grant Miller
- Vern John Reid
- Edward Pryk
- Robert West
- Peter Meahlman
- Donald Dierkens
- Charles Sabatke
- Richard T. Baker
- Richard Warden
- Franklin Hall
- Charles D. Moss
- George Shackleford
- Bob Hassell
- Anna Bond
- Robert Zsiska
- Pat Carroll
- Leslie Mason
- Robert Dupuis

Swimming instruction has been modeled after the training given to the Miles team. As members of the west coast's first "Branch-General" ROTC program, they will be trained in a combination of physical training and academic instruction, in order to prepare them for further training in their branch of the service.

Familiar Commando Is Slated For Commercial Run
By William Chafee
All the candidates that have been working on the project have been given the go-ahead for a commercial run. Owen Stowell has confirmed that the plane will be ready for takeoff at any moment.

Stowell says that the new service will be ready for airline service as soon as the weather permits. The planes will be airworthy and equipped with all the necessary equipment for commercial service. The planes will be ready for takeoff at any moment.

The airplanes were originally purchased by the Army for use on a demonstration project. It had been planned to have the planes on the ground for approximately six months before they could be used.

Poly Contribution To Local Economy Near Million Mark
Locally owned firms and contractors in the Poly area have contributed to the local economy to the tune of almost half a million dollars. The Poly area is known for its research and development in fields such as materials science, engineering, and biology.

In the entrance area of the Poly Campus Shop, there is a sign that reads: "In the Poly area, we are proud of our contribution to the local economy." The sign is posted next to a display of Poly products, including books, pens, and other items.

The Poly area is known for its research and development in fields such as materials science, engineering, and biology. Some of the major firms in the area include:
- AEDC (Advanced Engineering Development Corporation)
- Polytronix
- PolyChem
- PolyMech
- PolyBio

**MUSTANG HANDBOOK WILL ROLL; **

*‘Help Fresh’ Ideas Welcome*

The 1964-65 "Mustang Handbook" will go to press on July 18 and any information that will be of help to freshmen and returning students should be submitted not later than next week, according to Barry Btevena.

The handbook was designed with the idea of helping students with registration, housing, and even the idea of freshening up feelings, says Btevena, who is assistant activities officer. A lot of pertinent information will be packed into this helpful booklet, in addition to information on the school year, and many other useful tips on what to do while at Poly. The Mustang Handbook contains a wealth of information that even the old students will be interested in.

School state, department heads, and local color are compiled into an easy-read guide of the college. The layout of the booklet will be much the same as last year’s, with new information of value to students.

Students or staff members who want to help new students with vexing problems should submit suggestions to Miss Btevena with pertinent information will be packed into this helpful booklet, a book of new information of value to new students.

**Local Lady Has Housed 149 Students In Past 23 Years**

While many a San Luis Obispo family owns Cal Poly students attending the university, family on San Luis Obispo’s east end, Henry Jr., and Claire Higuer, has been a leader in the foster family role. "I Off-Campus Mom."

Henry Jr. and Claire Higuer, call themselves "Cal Poly Tradition as our" and the result is a successful apartment complex. Mrs. Higuer, chairman, housing and engineering, is the leader. Mrs. Higuer and her husband are chairman and one of the college's "wheels" to better acquaint the students with Poly life.

Emergency phone numbers, phone numbers of the study halls and many others are also included, even the school pail-and-flap.

Many of the prominent local merchants and doctors are serving making for an excellent guide book of both Cal Poly and San Luis Obispo.

The layout of the booklet will be much the same as last year’s, with new information of value to students.

Ollie Miller: Men never learn about women, but they have a lot of fun trying.

**Farmer Farmers Formed**

For several years she not only roomed but "boarded" her Cal Poly students. For several years she not only roomed but "boarded" her Cal Poly students. But most important of all, says the dean, is that the long-lasting friendships so many students have formed with their landlords. And many students have formed with their landlords. And they have a "slight leaning" toward students from the aeronautical engineering department. Hoy Meta, Alden Turner, and M. C. Martinson, aeronautical engineering instructors, were other names. And their presence is a reminder of the future of Mrs. Hoover's two sons, who, on graduating at Poly, now reside in California, but always come back to San Luis Obispo, says Mrs. Hoover.

Mrs. Hoover takes a great deal of satisfaction in numbering the part she played in helping provide a wholesome atmosphere for the area’s future citizens. Mrs. Hoover is the wife of the late Henry Hoover, who served as a professor of mechanical engineering for a young man who some day might be the inventor of a cure for an incurable disease.

School Officers Teaching Graduate Courses at Poly

Poly is welcoming two prominent school administrators this week, Dr. Charles Webster and Dr. Elliott Regan. Both are part of the summer sessions in Charles Webster, Ed. D., and Elliott Regan. New two additions to the college faculty, they are being taught by Webster, Ed. D. 110 School law and Ed. 111 School finance, which are graduate courses for teachers interested in school administrative growth. In teaching Ed. 110 and 111.

Regan is a former instructor, a firm believer in the team-building process, taught aircraft recognition and athletics during the war in the navy. He taught at Poly for 17 years.

Food Managers Set Short Course Here

In a total of 3,000 school lunch managers and allied personnel, 250 are expected to arrive at Poly at 11:00 a.m. on July 19th. It has been announced that a day-long, 5-hour short course will be offered to school administrators in the areas of nutrition, budgeting, cafeteria management, menu planning, and in purchasing through several workshops and没 in the program include the lunch manager, and Mrs. Geraldine Miller, school dietitian. This is the first time the short course has been offered at Cal Poly. The lunch school program calendar, which is in its fourth year of operation.

Poly Cadets Train At Ft. Lewis, Wash.

Twenty-one Cal Poly ROTC students were among the 700-acre camp run by the Army. The camp, which is a part of the summer session at Ft. Lewis, Wash., will contain the army’s first west coast operation for ROTC freshmen cadets. Led by student Lt. Col. Charles M. Shulster of Ontario, the Cal Poly contingent reports to Camp Lewis for summer training. As a part of “Point-Style” type of training, the cadets were exposed to a variety of environments and in the course of training.

"What made you decide to be a cadet?" I asked. "A plan of three land
guns."

Watch For Grand Opening of the New Streamlined
Palo Alto Nurseryman Stresses Value of California Industry

The payroll from our own nursery has been calculated to be in excess of $1,000,000 per month, said Mr. W. E. Edwards, the owner of the Edwards Nursery, which is located in the heart of the California nursery country. Edwards added that the nursery business is not only important to the state of California, but to the nation as well.

Edwards explained that the nurseries in California provide a great variety of products, ranging from flowers and plants to trees and shrubs. He said that the nursery business is a major contributor to the state's economy, providing jobs for thousands of people and generating millions of dollars in revenue.

The nursery business in California is a combination of agriculture, horticulture, and recreation. Edwards said that the nursery business is a labor-intensive industry, requiring a great deal of hard work and dedication. He added that the nursery business is a year-round activity, with nurseries busy all year round, regardless of the weather.

Edwards explained that the nursery business is a highly competitive industry, with nurseries all over the state vying for customers. He said that the nurseries in California are known for their high-quality products and exceptional customer service.

Edwards added that the nursery business is a very important industry to the state of California, and he urged everyone to support local nurseries and buy California-grown plants.

Edwards then suggested to the nurseries in California to work together to promote the industry and to create a sense of community among the nurseries.

'Is This You?'

A few students have failed to turn in their program cards and are consequently not eligible for the $50.000 scholarship. Edwards said that these students who didn't turn in their program cards should follow up with their instructors and make arrangements to submit their cards.
