Grants to help Cal Poly aid local arts education

The Liberal Studies Program has received an award of $321,000 from the Eisenhower Foundation and the California Postsecondary Education Commission to help five rural schools expand arts education.

Schools in the Atascadero, Paso Robles, Shandon and San Miguel districts will be part of the pilot project.

The grant is the third the Liberal Studies Program has received in the past year to provide arts education in "disadvantaged" in county elementary schools. It previously received $150,000 from the California Arts Council.

The program is also completing the fall year of a grant from the Institute for Educational Inequality that has provided $20,000 a year since 1999 for its Arts in Education program in four San Luis Obispo County districts.

The projects give elementary teachers new curricula and strategies to support arts education and skill and support additional performances and instruction in all the arts forms. Cal Poly students participate in the projects, helping teachers develop curriculum materials to meet new state standards.

The project faculty members are Susan Duffy and Kathleen Friend, who supervise the projects.

Dairy symposium planned

Dairy experts from around the world will share the latest trends in marketing, science, manufacturing technology and applications of value-added dairy ingredients at the 4th Annual Dairy Ingredients Symposium Feb. 25-26 at the Cliffs in Shell Beach.

The symposium, hosted by Cal Poly's Dairy Products Technology Center, will include such topics as "Business Strategies in Dairy Ingredients," "Co-op Marketing and Dairy Research Activities," "Global Marketplace for Dairy Ingredients" and more.

Participants will include faculty members from Cal Poly, South Dakota State University and Texas A&M, as well as industry representatives from the Dairy and Beef Products Center of Moorpark in Ireland, Massey University in New Zealand, Milk & More Dairy Products Management, Inc., the U.S. Dairy Export Council, and the U.S. Department of Agriculture. 1968 Olympic sprinter to speak in February

In celebration of Black History Month, Tommie Smith, best known for his Black Power protest after he won the 200-meter race at the 1968 Olympics in Mexico City, will speak at 7 p.m. Feb. 7 in Chunushman Auditorium.

He was Smith — along with third-place finisher John Carlos — who raised a black-gloved fist in protest as he and Carlos" eyes during the "Star-Spangled Banner" as he stood on the podium. His symbol is intended to bring attention to the injustices against black Americans were facing and serve as a call for unity among blacks. The act cost him his gold medal and resulted in his removal from the national team.

Over the years Smith has expressed his commitment to the sociological, educational and spiritual cause of blacks in America, said Tiffani Hamilton, coordinator of the Cal Poly Center, which is organizing the event. Smith will talk about how sports and racism have changed since the 1968 Olympic Games and about the importance of community activism.

His appearance is co-sponsored by the College of Liberal Arts as part of its Lynceum speaker series. For more information call Tiffani Hamilton at Ext. 6-1405.

Lawyers guild director to talk on civil liberties

Internet2

The arrival of Internet2 capability at Cal Poly will also benefit local students in grades K-12. Through a partnership with the San Luis Obispo County Office of Education, K-12 teachers and their students will have access to data, graphics and research available on Internet2. Internet2 was activated in the Kennedy Library computer lab last week. Cal Poly joins CSU Hayward and Cal Poly Pomona and all nine UC campuses as members.

Initial membership in the Internet2 consortium cost Cal Poly roughly $45,000. The university will pay about that much annually to maintain Internet2 membership and access.

Cal Poly spent another $25,000 on equipment to provide a single Internet2 access point in the library and each of the colleges. The initial costs and the first two years of Internet2 fees were paid for by federal grants awarded to Cal Poly with the assistance of U.S. Rep. Lois Capps (D-Santa Barbara).

The Department of Defense grants were awarded to the university for its California Central Coast Research Partnership (C3RP), formed to create a technology park to house public and private partners interested in technology research and ventures. Partners will have access to Internet2 for their research and development operations and will pay for that access.

For more details on Internet2, visit the website www.internet2.edu.

Marisa Silver, acclaimed fiction writer and filmmaker, will give the next Writer-Speak presentation at 7 p.m. Feb. 8 in Phillips Hall in the Christopher Cohan Center.

Carrying a torch

(Leftright): Cal Poly history major Brandi Dias, Environmental Studies/Geology/History Professor Emeritus Wes Conner and business student Courtney Page carried the Olympic torch last week as part of the relay leading up to the 2002 Winter Olympics in Salt Lake City. Page was one of six individuals to carry the torch on the campus leg of the relay; Dias and Conner were part of the San Luis Obispo contingent.

Cal Poly teams up with Internet2 consortium

Cal Poly has become the third CSU campus to connect with Internet2, a new private Internet system linking 180 member universities and colleges and 60 corporations at speeds light-years faster than offered on the commercial Internet. The connection will allow students and faculty members access to equipment, advanced software applications and graphic research databases among campus members.

Accessible equipment includes the $4 million electron microscope at CSU Hayward, the twin towers of the Gemini Observatory (one in Hawaii and one in Chile); and the nanoManipulator at the University of North Carolina at Chapel Hill, a network of scanning probe microscopes enabling users to see, feel and manipulate specimens ranging in size from DNA to single atoms.

Other technology available includes the 3-D mapping project at the University of Pittsburgh, the Space Physics and Astronomy Research Collaboratory at the University of Michigan, and the x-D Dateline
