Foreign Agriculturalists

Plan Summer Poly Study

Each summer, hundreds of foreign VIPs visit Cal Poly in connection with the International Corporation Administration (ICA). The ICA is a technical assistance program that originated with the Marshal Plan for World War II to help countries throughout the world become more self-sufficient.

Fifty countries and ten territories are presently members of ICA.

In connection with the State Department, Cal Poly has trained and placed technical assistants in ICA programs.

William Kirkpatrick, coordinator of the ICA program here, points out that although not as many people are visiting campus this summer, as in past summers, approximately 80 people from all countries will be arriving at Poly during July.

Housing Still a Problem

The housing situation will be just a "once in a while" this year, says Mrs. Richard of campus housing director. At the present time, hundreds of two bedroom houses are needed for married students.

"The houses are overcrowded," she said. "We have also had a problem unless they made reservations early. According to the Mrs. Murray, Women's Residence in charge, it will be provided housing available on campus. This year, approximately 3600 people from all countries will be arriving at Poly during July.

Rodeo Team Places Second In Nation

Cal Poly's rodeo team has returned with second honors in the National Collegiate Rodeo finals held at Kansas City, Mo., July 4 and 5.

Jack Rodney of Ben San took the National All Around Cowboy Award and the National Bull riding Championship. Paul Robban, a second team member, took the National Rodeo Award. Thirty-two states and Canada were represented.

Bill Nelson also won a saddle on the Robban Roping Award.

The Cal Poly team, coached by Don Scott, said that this was the second greatest season points of the Cal Poly team with 1061 points and just behind Texas Tech who had 1171 points. The Texas Tech team was much more than any other colleges attending the rodeo.

"The Rodeo Finals was the final system of the National Intercollegiate Rodeo Finals in Texas Tech and the National Intercollegiate Rodeo Association as reported.

"This was the first time in many years," said Bill Nelson, "that we were able to come out ahead of Bill Ross.

Water Safety Rules

This summer the beaches of San Luis Obispo County are again crowded with sun and surf worshippers. A look at statistics will reveal from five to ten accidental deaths due to drowning recorded in this county each year.

The needless waste of lives is due, in most cases, to carelessness and disrespect of basic water safety rules.

The Los Angeles City recreation and Park Department has made 19 water safety rules. This is applicable to the state of California Poly P.E. Department and confirms that all these rules apply also in the area.

DON'T swim in unknown waters: look before you leap, and be sure there is a lifeguard close by.

DON'T ride a bicycle in dangerous current. If caught, call for help immediately and change course.

DON'T swim near rip tides: lifeguards will tell you how to recognize these dangerous currents and how to combat them.

DON'T make long-distance swims unaccompanied by a strong swimmer or a boat. Don't talk about swimming, then swim.

DON'T swim near piers or jetties: they were designed for boats and have sharp cutting edges and surfaces.

DON'T expect the lifeguard to save you or your baby: he or she may be endangered thereby.

DON'T swim too soon after eating.

DON'T drink at the beach; both water and alcohol don't mix.

DON'T attempt to rescue anyone who is in drowning.能力，尤其是那些个的。

DON'T go in cold water; you will get cold, you will get cold.

Water safety rules can be applied only to the beaches, but to any swimming and boating area as well.

New Engineering Dean Appointed

Announcement of the appointment of Leon F. Oates, as acting dean of the Engineering division, and of a continuing appointment of Ray W. Anderson as acting dean of the Agriculture division was made by President Julian Haller Thursday, the announcements, which were made in the morning, were made in the presence of President Haller and Vice President R. K. Janney.

Dean Oates succeeds C. E. Kent, whose retirement after a career of 80 years as an engineer and teacher, and administrator, will be effective August 15.

The new engineering head has been head of the Mechanical Engineering department. His appointment is the second year on the faculty.

Mr. Anderson, a Cal Poly graduate, has been acting dean of the Agriculture division since the beginning of the spring学期. He is a member of the faculty of the Agriculture division.

The Los Angeles City recreation and Park Department has made 20 water safety rules. This is applicable to the state of California Poly P.E. Department and confirms that all these rules apply also in the area.

Modern Industry Offers Rewarding Vocation To the Technical Writer

No one need tell us we are living in an accelerating age, the age of the atom, propagation, electronic brains and computers, not to mention things yet unborn. Whether we admit it or not there is a rush of new ideas and we are being asked to think creatively.

Inventor or technologist stands a real chance of getting his ideas to the public. The supply of technical writers is low, the demand high.

According to a report by the Employment Division of the New York State Department of Labor all forms of technical writing have increased tremendously in the past twenty years. Writers start anywhere from $900 to $1200 per week, or $100 to $105, those with experience start at $130 per week.

High School Honor Students Find College Life Exciting

How about the high school honor students studying physical sciences and mathematics at Cal Poly this summer school who are as good as the 90 girls are considered for Cal Poly. The 39 girls, 15 from Northern California, 15 from Southern California, 10 from the East and 9 from the West, have been invited to attend the Poly Summer School. They have been chosen from the best high schools throughout the country.

Guest Lecturers Enliven High School Scientists

Guest lecturers from Stanford University and the University of Pennsylvania are participating in the Poly Summer School. The students who are now studying in the summer school are housed in dormitories and are receiving courses in physics, chemistry, mathematics, biology, business and English.

The students studying under a project by the National Science Foundation, also are being induced to the Poly faculty until July 29.

Dr. William D. Donn of the University of California, Berkeley, addressed the Poly School, and the subject of his talk was "Optics." He summarized his work by Poly scientists and emphasized the importance of their work to the student.

Dormitory life is an important part of the Poly Summer School program. The students are housed in dormitories and are receiving courses in physics, chemistry, mathematics, biology, business and English.

The students who come from all sections of the United States receive a complete course in all subjects. On July 30, the students are scheduled to visit the University of California at Berkeley.

"Let us Learn to Live" will be the theme of the Poly School for the Poly School. The students are housed in dormitories and are receiving courses in physics, chemistry, mathematics, biology, business and English.

**Fishing, Swimming, Boats Offered At Local Beaches**

Hunting, fishing, swimming, boating, surfing, golf, and just hanging out, a few of the recreational activities in and around San Luis Obispo according to the Chamber of Commerce.

Poly students are encouraged to become active in the various school functions but there are other avenues of recreation besides the school activities that can be had. Morro Bay, just 18 miles from campus, offers some of the best fishing and deep sea fishing on the Pacific coast. It is also the county seat of Monterey County and Los Angeles.

**Golfing**

Morro Rock, just 18 miles from campus, offers some of the best golfing and deep sea fishing on the Pacific coast. It is also the county seat of Monterey County and Los Angeles.

**Boating**

Morro Bay, just 18 miles from campus, offers some of the best boating and deep sea fishing on the Pacific coast. It is also the county seat of Monterey County and Los Angeles.

**Attention Veterans**

"Cal Vet who are attending any approved college may utilize their GI training allowances by using them in the long run," says Howard Barr, president of the San Luis Obispo Veterans Organization.

"If they de not use them in the long run, they will de not be able to afford to continue their education," says Barr.

To those who de not take advantage of their GI allowances, Barr says, "The GI allowances were created to help veterans de at school, not to de at home."

**Grad Architects**

Cal Poly's Architectural Engineering Department graduated its largest class among the colleges of the University of California this year. The department has had an average of 60 graduates per year in the past two years.

**New Laboratory Equipment Donated By Westinghouse**

Dean Harold F. Hayes received today on behalf of Julian A. McPhee, president of California State Polytechnical College, a gift from Westinghouse Electric Corporation of equipment presented to Cal Poly in gift to the Cal Poly College of Engineering by the Westinghouse Educational Foundation.

Mr. Dwight E. Golde, South Pacific region vice manager for Westinghouse, and Mr. Harry A. Langendorfer, district engineer, made the presentation.

The donation is part of a nationwide program, announced early last January by the Foundation, which is supported by the educational equipment valued at over $500,000. The plans are credit electrical engineering, instrumentation and similar subjects.

**Summer Work Helps Students Earn By Doing**

Eight students, representing four colleges, are working on the electrical maintenance department of Cal Poly's maintenance department. Each student has responsibility for the maintenance of two or three state facilities in the 434 acre state park area near the campus.

The principal duties, busy about the same areas as in the previous year, are to provide maintenance and repair services for the park facilities. The special facilities include picnic areas, a large swimming pool, and a large parking area.

**Attention Veterans**

"Cal Vet who are attending any approved college may utilize their GI training allowances by using them in the long run," says Howard Barr, president of the San Luis Obispo Veterans Organization.

"If they de not use them in the long run, they will de not be able to afford to continue their education," says Barr.

**Grad Architects**

Cal Poly's Architectural Engineering Department graduated its largest class among the colleges of the University of California this year. The department has had an average of 60 graduates per year in the past two years.

**New Counseling Dean**

Louise L. Weiler has been appointed associate Dean of Student Counseling and Guidance, announcement made by J. A. McPhee, Cal Poly President.

Weiler will replace Miss Harry A. Grace who has accepted a position as director of student counsel in Los Angeles State College as Dean of Students.
Blackbirds Attack Passing Students
by Don Bishop

"One of the blackbirds hit me on the shoulder," says John Crow, Mustang editor. "They must be reason," Crow adds.
Blackbirds Attack

"I would swear that one of those times, was something as we flew," says John Campbell, El Mustang associate editor. Many other comments from unidentified sources ranged from "They're out for blood," to "There must be a reason.
\nSeveral students were reported among students but one student is reported to have stepped an attack using a notebook.
\nDavid H. Montgomery of the Business Department attacked that the blackbird hit him he the ignamement was the two dead blackbirds near the point of attack. The birds have a protective instinct the same as do humans," he said.
\nThe birds, sometimes one sometimes many, were male blackbirds that would sit in the trees and chase away any approaching person by turning his head, and would fly down after hitting a passing student. Not everyone was attacked, but the effect the small percentages of people who felt the rush of wind and the sound of wings next to his ear was that of confusion.
\nWe can't get used to the feeling," said Campbell. "And they won't bother unless you don't expect them.

El Mustang

WHAT MR. WOODIS

Don Bishop, English major, walks on despite the warm-up way of the diving blackbirds. The relay blackbird feathered display was attracting attention for the past week or the backburner near the Administration building regardless of their age, social position or size at their backburn.
