Mexican officials on campus to discuss technology transfer

Officials from five Mexican universities were on campus Monday through Thursday, Dec. 4-7, to talk about ways to share technology and other expertise.

The Mexican administrators took part in a program called “Innovative Strategies for Cooperation Among North American Universities.” It focused on technology transfer and technology adaptation in the areas of food production, manufacturing and environmental sustainability.

The four-day event is part of a new initiative called TEAMING (Technological and Educational Advancements in Mexico for Innovation and Needed Growth), which stems from a growing partnership that began in 1993 and opened relations between Cal Poly and the Mexican government.

Cal Poly aeronautical engineering professor Ruben Rojas-Oviedo and food science and nutrition professor Joe Montecalvo are directing the partnership effort. They secured approximately $16,000 in funding to bring the Mexican university officials to Cal Poly from institutes in Culiacan, Mazatlan, Durango, Morelos and the state of Mexico (in which Mexico City is located).

Through the TEAMING initiative, the American and Mexican partners plan to create the Center for Technological Innovation of Culiacan, the first in a network of centers planned to include four other regional sites in Mexico.

The TEAMING initiative and the center will initially boost the technological, economic and human resource development of the state of Sinaloa, located at the mouth of the Gulf of California.
