Val DeGeus Is PR Queen

More than 1700 votes, 40 percent of the student body, were cast in the election for PR Queen, with Val DeGeus, Santa Maria beauty, winning the coveted title. Jim Treanor, queen committee chairman, announced this week.

Val will reign over O'Day festivities, and will have as her court the four contenders for queen, who were: Jan Angell, Sam Banford, Dorothy Combs, and Pauline Woods. The queen will be crowned April 27 at the festive Queen's Coronation at Camp San Luis Obispo.

Val DeGeus Never Like This

This is what Gus Beck, father of the fabulous Polyl Royal, seems to be thinking as Queen Val DeGeus pays him a fitting tribute following announcement that she won the title. Beck has fostered the PR celebration from its inception 25 years ago, to its present status as one of the outstanding open house activities of any college, anywhere.

Heart Rally Planned for Saturday

Fun at North Cafeteria, 7 p.m.

A 'Heart' Rally was planned for Saturday evening before the Poly-Los Angeles basketball game in the North Cafeteria, according to Rally committee officials.

With prizes to be awarded for the best hat worn to the rally, entertainment by the Polyl choir, and other songs and games being planned. Set at 7:30 p.m., resting meals section will be served for rally-goers in the gym.

Food and Drug Men
Tales Here Tomorrow

Both agriculture and biological science majors are expected in town Jan. Kenneth Kinney of the Mechanical Engineering Department, and Robert Wells of Food and Drug Administration work, are expected to attend the Thursday meeting.

Dr. Mugu Engineer
Talk Here Thursday

Head mechanical and engineering manager for Point Mugu of the Guided Missile Test Center, Dr. Thomas M. Wells, will be here Thursday and Friday to talk with Poly students.

Join Dance and Chinese Candy

Featured by Polyl Chi Saturday

A "Man Who Was" will be presented at the Poly Chi Club in the Temporary College Union Monday, according to Francis Yang and Margaret Simon, the program committee.

University of the South

Tennis Tournament

Fins up at Poly Thursday

Los Angeles will be the site Thursday and Friday of the annual tennis tournament featured by the University of the South. Poly will be represented by polo players.

Taco Recipe

By Margaret Simon

A Mexican "taco" recipe is shown below.

4 tortillas

2 Tbsp. atole

1 cup cheese

5 corn panchos

This mixture will make four tacos. Serve with guacamole and sour cream.

Blood Drive Selected

As Blue Key Project

For college-wide bone marrow a participant's Polyl share of the Tri-County Blood Bank will be solicited by members of Blue Key. The project was selected by the Tri-County Blood Bank as the Blue Key f
tural project this year. The drive will be held on campus sometime after the Polyl Royal, according to President Diane Corbett.

A fundraiser project of hosting visiting teams and other groups on the campus, in action taken at the Wednesday meeting.

SAC Gets Careless

Student Affairs Council has unknowingly, or not, appropriated $1000 for use by next year's ASB president for official expenses, if SAC minutes are accurate.

It began with a recommendation by Finance Committee to allocate the ASB president a yearly sum of $800 as full consideration for salary and all types of hosting expense. Don Walker, ASB vice-president, moved that this be approved.

A substitute motion by Haydn Lee, after being amended, read: An item not to exceed $800 be budgeted for the purchase of reimbursement for the ASB president incurred at official functions. It passed with 10 yes votes, 6 negative votes and 3 abstentions.

On the heels of this, Steve Emmelius moved that the ASB president be granted $800 in addition as full consideration for salary and all types of official hosting expenses. This was seconded by Don Walker, ASB vice-president, and moved that this be approved.

Two motions, therefore, each authorizing $800 be allocated for presidential expenses, were approved by the group. While the intention apparently was that only one can be in effect, Council action, as shown by the minutes, certainly denotes carelessness.

Two questions arise: Why did ASB president Ed HVKIN not rule the second motion out of order? Secondly, why did a vast majority of SAC members approve the action?

Another question might be: Where is Finance Committee going to chomp other budgets to make up this additional $800?
Poly Phase Club Gets Answers
On Value of Campus Activities

"Of what value are extracurricular activities when you're considering a graduate for employment?" Seventeen industries, polled by the Poly Phase Club, represent a cross-section of potential employers for any Poly engineering graduate. All of the industries agreed that extracurricular activities are beneficial in providing a well-rounded education, although the value of these activities varied with different industries.

Nearly all of the companies felt the activity record was especially important when considering a person who had been an active member of a group rather than a lack of technical training. Of special interest to the industries questioned was the least enthusiastic about extracurricular activities. The Industries questioned stated that activities in the freshmen and sophomore year were most important or those in the Junior and Senior year.

The aircraft industries with one glaring exception were the least enthusiastic about extracurricular activities. These were the most enthusiastic about basic education and training programs. Nearly all of the companies felt that extracurricular activities varied with different Industries. The electronic Industries especially varied were the least enthusiastic about extracurricular activities. We feel confident that extracurricular activities do not jeopardize his academic standing.

"The Customers Always Write...

The Other Side
Dear Editor:
"A. C. Clark" has written a most stimulating letter. His suggestion for a letter to get the companies and travel authors in greater detail are heartily endorsed. We add one request: that Interna­tional Students who are in need of Inter­national experience and have their own funds to cover the cost, be encouraged to come and get along with others in similar situations. A letter that a lack of technical training," stated one of the replies.

It was unanimous, however, that the student should believe his time so that extracurricular activities do not jeopardize his academic standing. Over half (68 per cent) of the responses.

More on Internships
Dear Editor:
There's an add on the Men's Colony story of last Tuesday. We're sorry we forgot two of the Internships which might be mentioned for any who are interested. As a matter of fact, there is a few more, if one looks for them. Dr. Robert Maurer, Dean of Arts and Sciences (Editors notes: Other Internships are available in the areas of Science, Engineering, Business and Medical fields. Simply drop us a line or call collect.

Did We Miss You?

During our recent visit to campus, we had a chance to meet many of you to discuss career opportunities in the field of telephone communication. We'd like to thank all those who arranged their schedule and took time out to discuss their future in the Bell System; we feel confident that they found it worthwhile.

Did we miss you? We realize that some of you weren't able to see us then. To you, we'd like to extend a standing invitation to hear all about your opportunities in one of today's—next year's—most exciting fields. Simply drop us a line or call collect.

C. P. MORRILL, Jr., College Relations Representative, The Pacific Telephone & Telegraph Co., 140 New Montgomery Street, San Francisco, California, Oakland Field 1-9000, Extension 2778.

Poly Punchers to Box Return Match with SJS

Coach Tom Lee and his Mustang "Leathernecks" travel to San Jose State to meet the Bobcats. Lee is confident the Mustangs can win the match after his team defeated the Bobcats by a score of 12-5 in the Spartan ring earlier this season.

The Mustangs have won and lost all season, but have been more consistent than SJS. On March 1, the Bobcats lost to San Jose State. Lee noted that the Mustangs will be without two key boxers, but expects to hold their own in the squared circle. Lee also has on his roster two heavyweight boxers, and they will be the main Attractions to the crowd.

The meeting of the Mustangs and the Bobcats is an opportunity for the Mustangs to prove themselves and to gain confidence for future matches.

Poly Splashes Headed by Trio of Local Stars

Leaping Coach Dick Anderson's swimming team will take on the Bobcats on March 1. The Mustangs have been performing well this season, and the team is looking forward to the meet.

The meet will feature three local stars, including Coach Anderson, who will guide the Mustangs to victory. The meet will be held in the Poly Swimming Pool, and is open to the public.

Mustangs Down Westmont; Face Diablos in Finale

With two upset wins in their last two meetings, the high-flying Mustangs are looking for more. Coach Anderson's team has been performing well, and they are looking to continue their winning streak.

On Friday, the Mustangs will face the Westmont College Wildcats at 7:30 p.m. The meet will be held in the Poly Swimming Pool, and is open to the public.

Poly will be looking to maintain their momentum and continue their success against Westmont College.
Power Poles May Be On Way Out
As Senior Project Seeks New Cables

The unsightly, yet essential, power poles that modern living has imposed on our landscapes may soon be on its way out.

Tens of thousands of miles of street and utility poles, ranging in size from 30 feet to over 60 feet are now being conducted at Cal Poly by H. Alcantar, a senior in electrical engineering sciences from Orange, are calling on new materials for ground cables used in distribution of high voltage and arc-resistant electricity in underground cable systems.

The work is being conducted as Alcantar's senior project with aid of the City of Los Angeles, department of water and power officials. They have supplied necessary materials to the work. Alcantar is using college equipment.

One post-striking block, says Alcantar, has led to metal and maintenance which will reduce corrosion, noise, and maintenance. In the event of power failure, the underground conductors are not affected. The Underground conductors are not affected. The underground conductors can be switched in to service, Alcantar explains.

The underground conductors will last longer than the exposed at Cal Poly, he was drafted into research. Because of better protection, which is another asset to their installation," Alcantar points out.

Alcantar was born and raised in Orange and graduated from Orange Union High School in 1968. He spent two years at Santa Ana Junior College graduating in 1969. Paul Alcantar of 480 N. Cove in 1968, while in his junior year, moved to Orange.
