Pro and Con Arguments Presented

Following is a statement in favor of the constitutional amendments to appear in the Student Body electric on Tuesday and Wednesday. It was prepared by Harri Tunsil, chairman of the Student Government Committee, and other professors.

The basic issue in the current elections is the present form of student government. The present form of student government is being questioned. These changes are being considered, and the two councils have experienced considerable difficulty in obtaining information on their representatives on SAC with very little representation.

One of the basic problems inherent in our present form of student government is the lack of adequate representation of all students. The representation of the present student government is that the student government is chosen from the same group of people.
