Retired VP Landreth helping flood victims

Jim Landreth, emeritus vice president for business affairs, is on a three-week American Red Cross assignment in St. Louis, Mo., helping flood victims.

A volunteer member of Disaster Services Human Resources, Landreth has previously served twice as a supply technician for Hurricane Andrew operations in Florida and assisted with flood relief operations in Arizona.

Economic impact remains strong

Despite three years of state budget cuts, Cal Poly remains probably the largest single source of spendable income in San Luis Obispo County, according to an economic impact report recently updated by the university.

The study shows the university's direct and indirect economic impact has dipped from almost $334 million in 1989-90 to about $318 million in 1992-93—a decrease of 4.7 percent.

"The numbers have held up surprisingly well," said Kenneth Riener of the Business Administration Department. "Probably the largest factor offsetting cuts in state funding is student spending, both for living expenses, and for fees, which have become a greater part of Cal Poly's support.

"As long as state support and student numbers stabilize, Cal Poly's contribution to the local economy should not decline much more, if at all," Riener said.

The update shows the campus's direct economic benefit to the city and county to be $167.4 million for the academic year that ended June 30. In determining the indirect impact, researchers estimated that every dollar spent locally by the university, its students and employees generates 90 cents in additional local sales.

The economic update followed the same format as the 1989-90 study, which was prepared by Reiner and three other members of the College of Business faculty. The latest report was compiled by three recent business administration graduates.

Scholarship awarded to Ag grad student

The first recipient of a $500 scholarship named in honor of retired journalism professor Jim Hayes has been announced.

Meredith L. Rehrman has been selected to receive the 1993-94 Jim Hayes Journalism Scholarship award. A recent journalism graduate with a concentration in agricultural communications, Rehrman is working on a master's degree in agriculture.

Rehrman, in Costa Rica this summer developing a news bureau for the Escuela de Agricultura de la Region Tropical Humeda, served for three years as student assistant to Hayes.

The Jim Hayes Journalism Scholarship Endowment was established as a tribute to Hayes, who retired last year after more than 23 years on the journalism faculty. Hayes also served as the first director of the Brock Center for Agricultural Communication.

The scholarship will provide financial aid to qualified students majoring in journalism and related fields.

'Snuff Out Tobacco' pamphlets available

"Snuff Out Tobacco" guides are available for free at the Health Center.

The guides outline a four-week program to quit smokeless tobacco and include information and exercises designed to help individuals through the quitting process.

The program is open to anyone ready to set a date to quit. For a guide or more information, call the Snuff Out Tobacco Project coordinator, Liz Cofer, at ext. 5251.
Position Vacancies

Vacant staff positions at Cal Poly and the Cal Poly Foundation are announced in this column and are posted outside the respective offices. Contact those offices (State: Adm. 110, ext. 2236 — Foundation Administration Building, ext. 1121) for applications and additional position details. Both Cal Poly and the Foundation are subject to all laws governing affirmative action and equal employment opportunity. Cal Poly hires only individuals lawfully authorized to work in the United States. All eligible and interested persons are encouraged to apply. Applications must be received by 5 p.m. or postmarked by the closing date.

STATE

Call Facility Services for needed repairs

Areas in need of maintenance service should be reported to Facility Services.

Such things as broken Venetian blinds, loose ceiling tiles, broken desks and dripping faucets can be fixed.

Problems can be reported by campus mail, telephone (ext. 5555), fax (ext. 6114), or e-mail (FacServ or dp026@oasis.calpoly.edu). Be sure to include your name, department, phone number, and a location and description of the problem.

Who, What, Where, When

A paper by Leanne Berning, Dairy Science, "Functional Variation in Endogenous and Exogenous Immunoglobulin Binding of Bovine Neutrophils Relative to Par­turition," was published in the July 1993 issue of the American Journal of Veterinary Research.

Walter Perlick, Business Administra­tion, was one of six Americans invited to present papers at the Third International Conference on Entrepreneur­ship, held in Moscow and hosted by the Independent Institute of Russian Entrepreneurship.

Unny Menon, Industrial Engineering, presented results from National Science Foundation-funded research on rapid prototyping for concurrent engineering at these conferences: American Society of Engineering Education National Conference in Urbana-Champaign, Ill.; International Symposium on Logistics, in Nottingham, England; and the 2nd European Conference on Rapid Prototyping, Nottingham, England (co-authored by Martin Koch, Industrial Engineering, and students Tai Williams and Frank Burke).
