NO CENSORSHIP FOR EL MUSTANO

THURSDAY, APRIL 26, 1962

moratorium, or temporary order, in the public welfare. It was not a situation during Poly Royal. The censorship ban has been lifted from the newspaper and the student body, and all is quiet. Dean Andrews told an unusually large audience about the main facets of the parking regulations.

Chandler Urges 'Good Judgment' In Demonstrations

"Use good judgment." Dean of Students Everett Chandler emphatically stated with reference to reports that some students, both as individuals and in organizations, plan to demonstrate against the parking situation during Poly Royal.

"Just as its members reflect an organization, in the public eye a college is a reflection of its students," the dean added.

"People in the public eye naturally leave impressions of themselves. The students at Cal Poly are responsible for whatever impression they leave in the minds of the public. This will be on this campus during Poly Royal."

The parking conflict arose at the beginning of April when the administration issued a warning that receipt of these parking citations by a student could cause dismissal from the college, and that students might be put on probation or suspended for disciplinary violation.

In past years, no one affiliated with the college wrote to the Daily Trojan with Cal Poly or its students. To write to the Daily Trojan demonstrating against the parking situation would be fine, he explained, but he emphasized that anyone who puts "way out in left field on this situation, or who instigates any action "embarasses the administration or guests would be in danger of dismissal from the college.

In addition, he pointed out that one of the dangers involved in demonstrating against the administration is the makeup of the student body. A person who is involved in a demonstration against the administration may be carrying a demonstration way out of proportion, creating proper damage and loss of good judgment. The administration is concerned that ultimately could result in death.

"The bad thing about this," said Chandler, "is there may not be in the public eye, an agreed armed and feathered by the same brush that carries the parts which are in blame for the situation getting out of control."

Four Administration Changes Made

In order to effect the work load in the college, Dean of Students Julian A. McPhail revealed four administrative changes made by President McPhail, former assistant to President McPhail.

Dean of Administration Howard West, public relations representative, has assumed the Administrative Assistant to the President, replacing Charles Young.

Mr. McPhail, casually mentioned a number of the public relations staff of Los Angeles State College have been named as the new public relations staff. He added, "It will assume the duties of the Administrative Assistant, has been appointed by the President, replacing Charles Young."

Dean Andrews Explains Intent of Action, denies 'Error' In Suppressing Newspaper

By WAYNE COX, Staff Writer

Cal Poly's "gathering storm" blew itself out Tuesday night when the Dean of the College told Student Affairs Council and an unusually large group of guests that the administration was wrong in restricting El Mustang articles about parking regulations, and penalties.

Dr. Andrews said, "It is easy to see why students don't understand the parking situation - neither do many of the college employees."

The college wanted to enforce the parking regulations passed by the State Legislature with hope and desire. This was the case, but something went wrong. The college had no right not to act.

Dean Andrews asserted that the college made every attempt to notify the students about the moratorium, and the registration was stated in a statement and penalties.

Also, the Dean of the College prepared and gave the El Mustang Editorial Board a careful wording statement explaining why the college made decisions to act and why that statement was made. They failed to comply with the regulations. When the statement appeared in the paper, some essential parts of the explanation were omitted. A paragraph was dropped which pointed out the administration's regret in applying parking regulations.

El Mustang's articles were again put on trial by the administration. In a repeated article, the Effect of the April 17 decision, which was followed by a warning. Jeffery Peck, leading round of pickup女孩, said, "This article is false."

Because of obvious rights, the gathering was made to resolve this with Governor and Mrs. Brown, the Dean had the administration approve an article that no more articles on parking would be printed after Poly Royal. Andrews then submitted a statement which he said was prepared to issue a directive of April 17 issue and issue a statement.

According to Dean Andrews, last night at a meeting with Student Affairs Council members, Andrews agreed on a moratorium, but if McPhail approved the issue, the issue was prepared to issue a directive that same night.

"There was no intention to prevent El Mustang from printing facts about any issue," continued the Dean, "It was felt that a temporary delay to calm inflammatory statements would benefit all concerned.

The college has no objection to a free press. The reputation of the college and its students is one of the most important. The college is not in the business of censoring.

I am sending up his remarks, Dean Andrews said, "I see that the students are growing out of something like this." The students have reason to believe something is wrong with the administration, but the students did not carefully study the college, so they do not believe that this is a movement seen at the Daily Trojan. We have been questioning other who our leaders are.

In BAC's defense, Joe Zallen, student representative said, "It seems that these brave and bold people are not. They seem to come in like the heroes. They're not tough; they're always fumbling-makers."

"We have an attitude towards "Just ask me to tell you something about one of the greatest articles in the history of mankind."

"I was somewhat shocked by what I read," says English major Maurice LaRue. "I don't do anything about it so I can do nothing about it."

ABE President Lee Ferman reiterated the necessity for students to question their leaders. He added, "We have to force the problem of large and small errors. I tried to tell you this."

Money from Fines Goes to County

"Where does our parking fine money go?"

This question seems to be answered in a letter to Mustang from student Joseph E. Walls on April 4.

In his letter, Walls wrote, "Our parking tickets are soon to go to the county, as the college will no longer be able to provide parking spaces on campus. The county will now take care of this problem." Walls went on to explain the reasons behind this change and the consequences for students who continue to park on campus.

**Students' Forum**

**EDITOR'S NOTE:** The following articles were written by students who wish to present their opinions in print. We believe that the exchange of views and opinions is an important part of a liberal education. We welcome the expression of views, whether or not they are the popular ones, because it is through such expression that we may achieve a better understanding and a more tolerant society.

**It Is A Right**

Editor:
The right to dissent is the most valuable of all civil liberties. In our complex, atomized society, dominated by large, impersonal institutions, the right to dissent is the chief weapon that the individual has to protect himself from unchecked power. To maintain this right, the individual must be willing to live with controversy. The ability to accept the views of others without allowing the conflict to blur his own perspective is an important step toward maturity. To avoid controversy is to avoid growth; to seek controversy is to seek freedom.

If we want our country to have an informed, involved citizenry, we must encourage all of our citizens to participate in the political process. This is why I believe that the right to dissent is the most important of all civil liberties. Without the right to dissent, the individual is unable to express his ideas and opinions, to challenge the status quo, and to work for the changes that he believes are necessary.

**Thank You**

Editor:
It is with great pride and appreciation that I write this column to the Daily Mustang, the students of Cal Poly, and the administration. I believe that the Daily Mustang is a valuable community service and that it has done much to foster the growth of democracy in our country. The Daily Mustang has been successful because it has provided a forum for the exchange of ideas, and has allowed the students to express their views.

I am grateful to the Daily Mustang for allowing me to express my views, and I hope that I will be able to continue to do so in the future. I also want to thank the Daily Mustang staff for their hard work and dedication. They have made my job much easier, and I am grateful for their support.

**Wives Go to School With Spouses,**
**But, They Don't Have Classes**

By MITCH RIDER, Staff Writer

Working on the campus where your husband attends school has its advantages, most Cal Poly student working wives agree. While hubby goes from class to class or spends the afternoon studying for an exam, his wife works in the same places as the library, dining hall, and the gymnasiums. They are all found behind typewriters and at desks in Placement, Activities, Records, Administration, and Dean's secretarial and reception positions, and in the general business offices.

Of course, each student wife feels that working on campus brings the most joy with closer together. She will be familiar with his school schedule and know whom he is talking about when he speaks of the staff or faculty member. Transportation is a problem for some, but most couples walk to school or drive together. Some husbands walk or bicycle while their wives use the car to take the children to a baby sitter.

Janie works in the Library while her husband, William, attends Electrical Engineering major. She says that she likes her library job and being on campus, she can see her husband during the day and for the first time in 3 years. Carol Shinn, who works in the General Office of the Architecture student husband, Bill, is from the Valley. Having worked in retail, she was not completely used to the educational atmosphere. At least she added that their dog is sometimes unhappy when he's left alone.

"I don't feel a job is better than working on campus with other students," noted Dr. Adams from her desk in the Records office. That attitude is Cal Poly before her marriage. Her husband is an Air Conditioning and Refrigeration Junior.

Gayle Hogan in the General Office met her Printing major husband, Tom, while they attended Junior college in Fallin, she says they added her to his school, but two children and a job keep too busy.

**Service Clubs See Cal Poly Fashions**

The Home Economics Department recently held fashion show, chairman of the program was Susan Duff who reported approximately 20 girls modeled sports, social and dress wear with hat, and shoes that they had made.

Marlene Pears commented on the fashions as they were presented in the Rotuny and Kiwanis clubs. An added feature of the program was the appearance of the New York clothing design firm, the Second Chance.

The fashion show was also presented to the Rotuny and Exchange clubs with Jeanne Biren commenting. A high point of the program was a junior Edwardian clothing appearance of Tom Akers, a freshman Animal Husbandry major from Bakersfield who displayed his work with plants and flowers and the humming bird which he also named Edwardian clothing.

Tensaga and Santa Lucia real full of the fashions latest set of world records, by taking in a pay television set for three weeks, "It was a time consuming effort," said Texas Pacific's former record of 60 hours for one stone.

**Big Turtles Trudge Just Won't Budgo**

Poly title of "International Turtle Champions" at stake!

The call has gone out from the Poly Committee for a new turtle to represent Poly at the annual Turtle Trudge, and to uphold the precedent set last year by "Poly Pace."

The Trudge is held in Michigan, sponsored by University of Michigan, Michigan State University, and University of Missouri. The Trudge is open to any turtle, and is decided by the winner of the race.

Last year the Poly entry edged out all other contestants to place first with a record run of 48 seconds, seven minutes ahead of the nearest competitor. This year's race will be held from the University of Kentucky, Los Angeles City College entry placed third.

This year's elimination will be held during the Poly Royal Carnival.

**WORLD GETS THE PENNANT?**

...Graduate manager Bob Reynolds proudly displays one of the Poly Royal pennant now available at the A.S. B. Office.

The new Engineering Building, Library addition, and Science Building addition are all scheduled for fall of 1968 occupancy.

Sun’s Ray Effects Seen in AC Exhibit

Home decorators and "weekend" painters won’t want to miss the Air Conditioning and Refrigeration Engineering Department’s Poly Royal display which includes a demonstration of the effects of the sun’s rays on different colors of paint.

No panels of wood have been painted with different colors and placed in the sun to catch the best rays. A pyrheliometer, which looks like an ordinary electric light bulb, is wired to the panels to measure the amount of solar energy and radiation absorbed by the painted panels.

The highly sensitive instrument draws a curve on a graph and responds abruptly to variations in the amount of sunlight. Even a small passing cloud will be shown.

The display is part of an experiment being conducted by sophomores John Lux and Tom Haverty. It has practical application in missile development as well as in the development of solar energy batteries.

In addition to the solar energy exhibit found in the department’s labs, the conditioning engineers will be showing the many types of refrigeration equipment and control systems which they use in the classroom projects.

Included in equipment is a solar storage box that is capable of maintaining a temperature of minus 18 degrees Fahrenheit.

Free coffee is being served in the patio area to provide sheets with a moment of relaxation as well as a chance to talk with the department’s students about the various displays and their courses of instruction.

Jeft Love and Linda Erickson complete a paint job on a fireplace that will be a part of the Architectural Engineering Department’s Poly Royal display. Thousands of visitors are expected to tour the department during Poly Royal, tomorrow and Saturday.

Orchard Demonstration Witnessed by Students

Management and Agricultural Education students enrolled in the Orchard and Nursery Crop Culture courses whispered on orchard demonstration put on by the University of California and the San Luis Obispo County Soil Conservation Service.

The Group of 25 was under the direction of Crop Instruction Agent Hillary Troutner.

Women’s Club to Present ‘May Fantasy’ Luncheon

“May Fantasy” will be the theme of the Cal Poly Women’s Club May luncheon, which will be held in the University Union on May 22 at 1 p.m.

Tickets will be available at the Union beginning May 9 or by calling Norma Noggin at 8-7219 before May 22.

Tonight’s Activities

Prelude to Weekend

To get a jump on Poly Royal, College Union has scheduled a variety of activities for this evening:

Yesterday, starting Judy Holliday, he showed a film and midnight.

College Union Dance Committee is holding a “Quick and Round Dance” from 9 to 11 in the Union Dining Hall, with Bud Glass calling.

Tonight, the “Sun’s Ray Effects Seen in AC Exhibit” will be open for viewing from 5 to midnight.
