A Cool $1,500 Bills Heisted In Weekend ASB Burglary

Whitson Outlines Math Department Requirements

By JAMES MALCOLM

Cal Poly math professors believe that the best way to teach mathematics is by the method of "learning by doing," according to Assistant Professor Charles R. Whitson.

"In the past three years, we have come to realize that the way we teach mathematics is not the best way," said Whitson. "We have come to realize that the students need to be involved in the process of learning mathematics."

Whitson explained that the best way to teach mathematics is by the method of "learning by doing." This method involves the students in the process of learning mathematics by working on problems and exercises that are directly related to the material being taught.

Whitson noted that the students need to be involved in the process of learning mathematics. This is done by providing them with opportunities to work on problems and exercises that are directly related to the material being taught. The students are encouraged to work on these problems and exercises independently, and to seek help from the instructors when they encounter difficulties.

"We have found that the students learn mathematics much better when they are involved in the process of learning," said Whitson. "This is why we have decided to implement the method of "learning by doing.""
Hell's Angels—CP Branch

Black leather jackets, long, uncombed hair and motorcycle boots are the trademarks of a wild breed of motorcyclists known as the "Hell's Angels." When they hit town, business closes and lock their doors, the police call out and people fear for their lives.

Call City police riders don't look like the Hell's Angels or have the same effect on the campus. But sometimes they do make people fear for their lives.

For instance, the roar of an unsmothered exhaust as a cyclist takes off in a cloud of dust scares many a person out of his way. Some cyclists have little regard for the rights and lives of pedestrians. Instead they see the warning signs of severe hits and blocking places to frighten normal people off the streets.

Granted, all motorcyclists and scooter riders aren't exhibitionists and show-offs, but the clubs have been known to cause a mess. At least three and four two-wheelers can be seen parked in the red zone, crosswalk, or infringing in the car parking space, no matter how small, can seemingly accommodate a cyclist.

The bike riders take advantage of this. At least three and four two-wheelers can be seen parked in the red zone, crosswalk, or infringing in the car parking space, no matter how small, can seemingly accommodate a cyclist.

The cyclists have even gone so far as to create their own private parking lot. Although very illegal, this "parking lot" is located in the heart of the campus and blocks a road completely.

Cycle owners unconcernedly leave their two-wheelers—no less than 30 to 20 scooters and bikes—at the intersection of North Poly View and Campus Way. At least three and four two-wheelers can be seen parked in the red zone, crosswalk, or infringing in the car parking space, no matter how small, can seemingly accommodate a cyclist.

Penguins Plan Road Society Sponsors Ride Saturday Seat Belt Clinic

The Cal Poly Motorsports Club will sponsor a road ride through the San Luis Obispo Club will hold its second ride of the year on Saturday, Oct. 8, at 7:30 p.m. The ride will leave from 8th and 9th Street. The route will be over graded roads in the area, and the club will meet at the Agriculture Engineering Building for a pre-ride meeting. The ride will wind its way through the city and out into the country, with planned stops for refreshments. The ride will conclude at 9 p.m. at the club's headquarters.
