Smokers Enjoying It Less, But Still Puffing

By Dave Kostlana

College smokers are enjoying it less as a result of the national government's recent action to increase the tax on cigarettes.

The majority of smokers interviewed said that the tax increase has been a major factor in their decision to stop smoking or cut down on their intake. Some students reported that they had started to smoke again after the increase.

In fact, most students have commented that they are more likely to be自觉 in their smoking habits. The change in cigarette prices has also led to a drop in the number of students who buy cigarettes on a regular basis.

The drop in smoking rates is likely to continue as students become more aware of the health risks associated with smoking. The University Health Center has seen an increase in the number of students seeking treatment for smoking-related illnesses.

Meanwhile, the Tri-County Blood Bank has reported a significant increase in the number of people donating blood, with monthly drives now attracting an average of 400 donors. The bank has also seen a rise in the number of people requesting information about blood donation.
Religion In Schools

Topic of Speaker

"Religion and Religion" was the topic presented by Dr. L. W. Linksn, Assistant Dean of Students in the College of Letters and Science, at the Religion In Life Week meeting in the Memorial Union.

The author of the talk stressed that the importance of religion in education is primarily a personal and philosophical matter, and that there is no reason to exclude the study of religion from the curriculum.

As an example, he cited the recent development of a new course in comparative religion at the University of Wisconsin, which focuses on the study of the religious beliefs and practices of different cultures.

Authority Is Respect
Says RILW Speaker

The authority of a teacher should not be seen as a matter of control or personal power, but rather as a respect for the knowledge and experience of the students.

Dr. Linksn, who served as minister of the College Christian Fellowship, emphasized the importance of respectful communication in the classroom.

For students, it is important to recognize the authority of the teacher, while also being mindful of their own knowledge and perspectives.

New Method Screens Heart Attacks

An efficient new screening method for use in detecting certain conditions in the heart is being reported by Dr. Arthur C. Hensin, Jr., San Jose optometrist.

The method, which involves the use of a special camera and light, promises to be a significant advancement in the field of heart disease.

The procedure is expected to be especially useful in identifying early signs of heart problems, allowing for more timely intervention.

Red Fire Engines Are Going Yellow

Another American tradition may soon be history as fire departments across the country consider changing the color of their fire engines.

Traditionally, fire engines have been painted red to symbolize the heat of flames, but this may be changing due to new research on color psychology.

The new approach suggests using a lighter shade of yellow, which is thought to be more easily seen by drivers and pedestrians.

Miscellany

An editorial discusses the importance of respecting the authority of a teacher, while also recognizing the value of student input.

The author suggests that teachers and students should work together to create a mutually beneficial learning environment.

Editor Discusses
Enlistment, Religion

It is unfortunate that religion should still be a matter of debate in our schools, but it is important to recognize the value of respectful communication in the classroom.

Dr. Linksn, who served as minister of the College Christian Fellowship, emphasized the importance of respectful communication in the classroom.

For students, it is important to recognize the authority of the teacher, while also being mindful of their own knowledge and perspectives.

Dr. Overmeyer Practices Jewel Cutting As Hobby

A desk full of shiny objects that catch the eye is a familiar scene in the offices of the man who loves to cut jewels. Dr. Overmeyer is currently working on a large tourmaline that he plans to send to a dealer for sale. He has been cutting and polishing stones for over 20 years, and his work is highly regarded in the jewelry world. Dr. Overmeyer has taken up the hobby as a way to relax and unwind after a long day of teaching. He enjoys the challenge of cutting stones to their best advantage, and he is especially fond of working on tourmalines. His work has been featured in several jewelry magazines, and he has won several awards for his craftsmanship. Dr. Overmeyer encourages others to take up the hobby and discover the joy of cutting jewels.
Mustangs Drop Two More; Stand 0-5 In League Play

Jockeying Around

Oh, that darn dollar! A new president held a $1.27 to $1.10 erasing of the season at every turn. In every case, the CCAA offices figured the sale every time it passed through the hands. It soon became evident that the dollar was not an entity which could be changed without a fight. This led to the conclusion that the dollar was not a thing, but a fact which could not be changed. It was therefore decided that the dollar was not a thing which could be changed without a fight. This led to the conclusion that the dollar was not a thing which could be changed without a fight.

The dollar was then introduced to the people of the town of 1,000 people to give to the athlete. At the present time, the state colleges have given to the athlete their purchase of student body cards. This has led to the conclusion that the dollar is a credit to the college upon graduation.

In the past, the state colleges have given to the athlete their purchase of student body cards. This has led to the conclusion that the dollar is a credit to the college upon graduation.

AfricA Downs Latin America

In a battle of speed endurance, the African and Latin American teams battled for the championship of the world. The African team, led by their captain, Talbot, gathered 14 rebounds in the second half. The Latin American team, led by their captain, Huggins, gathered 8 rebounds in the second half.

Talbot’s 38 Points Too Much For Poly

The battle of the titans is over. The Poly Mustangs were able to withstand the attack of the African and Latin American teams. Talbot gatherecl 14 rebounds in the second half. The other titan of the contest was Huggins, who gathered 8 rebounds in the second half.
