Students Display Talents In Spring Sing Tonight

Projects Presented At Conference

By EDNA TQGAWA

SAC Starts Work On Next Year's Budget—Session Continues To 2a.m.

By ZINIA TOGWALA

The model show students gave a series of model building demonstrations for the year and said the event was a success. The demonstration was held in the ASB offices as an incentive to students to participate in Fine Arts activities. The students built a model of the school building and demonstrated the different stages of design and construction.

Objectives for the demonstration were to inform students about the different stages of model building and to encourage them to participate in Fine Arts activities. The demonstration was also an incentive for students to participate in Fine Arts activities.
**It's For The Boids:**

**Ask Those In Dorms**

By ROB SULL

There has been a lot of discussion recently about what to do with the students in dormitories. Many people believe that the dorms should be closed down and replaced with something better. However, I think that we should focus on improving the current situation instead of doing away with it entirely.

**Visiting Lecturer Hopes To Arouse Interest In Physics**

By GEORGE WESLEY

The physics department is planning to bring in a visiting lecturer to speak about the latest developments in the field. This will be an excellent opportunity for students to learn about the cutting-edge research being done in physics.

**Losers Go To Dickens:**

**Finders Not Keepers**

By CATHERINE SCHNEIDER

Last week we saw many kids going around with Dickens' books in their hands. It seems that they are trying to read as many books as possible in order to win a prize. However, this is not a good idea because it forces people to read books they may not be interested in. Instead, I suggest that we focus on enjoying the books we read for their own sake.

**Student Union Vital To College Life**

By CHUCK SMITH

The student union is an important part of college life because it provides a space for students to socialize and participate in various activities. It is also a significant source of revenue for the college.

**Controversial Speakers**

By MITCH HIDER

The California State Colleges and Universities' Student Senate recently voted to support the resolution drafted by James Killgore of the CSCSPA, which states that "the California State College Student Publicity Association (CSCSPA) offers freedom of speech resolution for all students and faculty of any college or university in the California State Colleges and Universities system, and for all students and faculty of any college or university in the United States or of the State of California by force or threat of force willful or unlawful acts."
Biology Instructor Accepts Summer Grants

Eight staff members of the Biological Sciences Division have received grants for summer work and research on various projects.

Dr. Glenn Butler, department head, will be working for six weeks this summer at the National Science Foundation, Washington, D.C., as the subject of "Research on Toxic Substances." His work will concern the effects of certain substances on the growth and development of various organisms.

Dr. Robert Mies, an associate professor in the Biology Department, has secured a grant to conduct research on the biology of the California redwood. His work will be done at the University of California at Berkeley.

Dr. William F. Adkins, a professor in the Biology Department, has received a grant to study the effects of various factors on the growth and development of the California redwood. His work will be done at the University of California at Berkeley.

Dr. Fred T. Allen, a professor in the Biology Department, has received a grant to study the effects of various factors on the growth and development of the California redwood. His work will be done at the University of California at Berkeley.

Dr. John W. Taylor, a professor in the Biology Department, has received a grant to study the effects of various factors on the growth and development of the California redwood. His work will be done at the University of California at Berkeley.

Dr. R. E. Hunt, a professor in the Biology Department, has received a grant to study the effects of various factors on the growth and development of the California redwood. His work will be done at the University of California at Berkeley.

Mustangs, Matadors Vie In 1964 Baseball Finale

The Poly baseball team traveled west last week to oppose their 1964 season with a three-game series against the San Francisco State Polytechnic. The Mustangs, under the guidance of Coach Frank Novak, are the long-time hosts of the series. In the previous 12 games, the Mustangs have taken five, lost five, and drawn two. The Away team, under the leadership of Coach Ted Cull, has played five games, with two wins, two losses, and one tie. The series is set to begin on Friday, May 23, at 1:30 PM with the Mustangs hosting the season opener. The second game will take place on Saturday at 2 PM, and the final game on Sunday at 2 PM. The series will conclude with the Mustangs hosting the last game on Sunday, May 25, at 2 PM. The campus will be bustling with excitement as the Mustangs look to continue their winning streak against the powerful San Francisco State Polytechnic.
