Senior Is Patenting Automatic Sprinkler

By MIRIAM GROGAN

President, Cal Poly Young Democrats

Although he is primarily a government student, his interest in mechanics has led to the development of his latest invention. In order to make a patent for his Automatic Sprinkler, he has spent a considerable amount of time in research on the subject.

George Breshears is an Electrical Engineering major, but that did not prevent him from improving an old sprinkler system. He claims to have been inspired to invent his Automatic Sprinkler when he watched a sprinkler in operation for the first time.

The idea of his invention is to have a sensor that will detect the presence of a fire. When the sensor is activated, it will automatically turn on the sprinkler system. The sprinkler system can be used in both homes and businesses to protect against fire.

George's patent application has been filed, and he is looking forward to seeing it recognized by the Patent Office. He believes that his Automatic Sprinkler will be a valuable asset to any household or business.

Election Roundups For Primaries

Democrats

By LEW GOLDBERG

Resident, University of California College Republicans

With only two weeks left until the primary elections, the College Republicans are working hard to ensure that their candidates win. They have been especially active in their efforts to mobilize students to vote.

Rob Pease, the Republican candidate for the US Senate, is one of the candidates that the College Republicans are supporting. They are working to ensure that he wins the primary election.

Republicans

After the long campaign in primary, Jerry Brown is looking forward to a new beginning. He has been weighing the possibility of running for Governor of California.

If he decides to run, he will face a tough challenge from the Democratic candidate, Pete Wilson. Despite this, Jerry Brown is determined to win.

After the results of the primary are known, the candidates will face off in the general election.

Inquiring Reporter Finds Student Likes CU Idea

In an article published in the Telegraph-Tribune, an reporter found that a significant number of students at Cal Poly support the creation of a College Union.

The College Union would provide a number of services, including a place to study and eat, a multipurpose room for meetings and events, and a place to relax and socialize.

The reporter noted that the students were enthusiastic about the idea, and they believed that it would be a valuable addition to the campus.

They believe that it would be a valuable addition to the campus, and they are excited about the prospect of having a place to study and eat, as well as a multipurpose room for meetings and events.

The reporter noted that the students were enthusiastic about the idea, and they believed that it would be a valuable addition to the campus.

Letter To McPhee

The editorial article was taken from the Bay Area Times and was written by a student at Cal Poly.

It was an excellent piece, but clearly stated the problems confronting the campus. It is a call to action for all students to come together and support their campus.

Contribution to "Healing" should not exceed 200 words, and must be written in a positive and constructive tone.

Mailbag

February 25, 1984

Dear Professor McPhee,

I have been coming to Cal Poly for four years now, and I have seen a lot of changes. I think that the College Union would be a fantastic addition to our school, and I would like to see it happen.

Sincerely,

Ted McPhee

Summer Session Applications

Now Being Taken at

Marguerite Residence Hall

Cal Poly Summer Session offers a variety of courses for students who want to take classes during the summer. The program is open to all students, including transfer students.

Courses are offered in a variety of fields, including business, engineering, and the arts.

Bio Senior Tells Tale of Snail, Starfish

"The small snail was on the start," said Robert O'Neill, biology major, "and the starfish was on the stop. The snail could not stop until it was above the starfish."

The senior exercise was to design a study to determine the response of a starfish and a snail to contact. The study was conducted in a laboratory setting and included the following steps:

1. The experiment was set up with a glass tank containing water, a snail, and a starfish.
2. The tank was placed on a balance, and the initial weight of the starfish was recorded.
3. The snail was placed in the tank, and its weight was recorded to determine the initial weight.
4. The snail was then removed from the tank, and its weight was recorded again.
5. The starfish was then removed from the tank, and its weight was recorded again.
6. The experiment was repeated several times to ensure consistency.

The results of the experiment showed that the snail did not react to contact with a starfish. However, the starfish did react to contact with a snail. The starfish's weight decreased by 5% after contact with the snail.

O'Neill presented his findings to the class and discussed the implications of his study. He concluded by saying, "This exercise was a great opportunity to learn about the behavior of marine organisms and to use scientific methods to study their responses to contact."
**Weight Aids Alumni In Tomorrow’s Game**

A light diet 11 days and a cut of pastries from the plate will aid the Mustangs, aiming for their third straight victory when they battle the alumni tomorrow.

**Diamonds and Duels**

**Harden—Gridders Ready To Oppose Alumni**

Head football coach Frank Harden, expected to stay in the lineup, will come to bat in the afternoon contest.

Coach Harden has picked Fred Elkele Finn to pilot the Green and Blue offense in the opener. After Long Beach for the National College Athletic Association, the Mustangs are working hard to get the key runner two hours before kickoff. Mr. Elkele Finn returned from vacation two weeks ago, while the rest of the team is expected to return this weekend.

**Cowboys Place Second; Enter June Finals**

At 11:31, the final bell for the barnstormers echoed in the distance. The Mustangs have had some nice runs, while the only real concern is whether the team will last a whole day.

The Mustangs were thrilled to see their boys on the offensive side and ready to go.

**Ex-Pro Basketball Player Recalls Many Hardships**

By BILL RICE

If you saw the name "On, Man, you can't win," Coach Tom Van Lunt talking about a game or a season, you knew that the school was in store for a hard time. 11 days and 25 minutes ago, the coach was the master of ceremonies, and the team went on to win.

Tom Van Lunt is a man who has always been on the edge of success, but never quite made it. He had been a top player in college, but never quite made the grade in professional basketball. He was a top player in college, but never quite made the grade in professional basketball.

The school was in the thick of it, with Van Lunt leading the way, and the team was off to a great start. But Van Lunt never quite made it, and the school was left with a lot of hard times and a lot of heartbreaks.
