The expected discussion on reducing the driving speed has been completed for the first time in many years.

The proposal to reduce the speed limit to 30 miles per hour in the area around the campus was approved by the University Senate, which had previously recommended the same speed limit.

The Senate also approved a proposal to increase the number of parking spaces on campus by 100, and to construct a new parking garage in the area.

The University also announced plans to expand its facilities, including the construction of a new dormitory and a new science building.

In other news, the University received a significant donation from a local businessman, which will be used to fund a new scholarship program for students.

The Board of Regents also approved a budget for the fiscal year, which includes increased funding for academic programs and research.
Military queen finalists chosen

Six military queen contestants were chosen Jan. 18 at the Student and Retired personnel. They are: A. A. Ang, Nancy Bedell, Linda Dula, Nancy McQuirt, Rose Ellis and Patty Hove.

The evening began with a reception from 7:30 to 8 p.m. Each contestant introduced herself to the judge's room. Then, each candidate introduced her beauty, height and said she was "surprised at the grace and poise displayed." Mayor Whedell thought the girls were hard to judge because each displayed a particular charm. Lucksinger added, "All Cal Poly girls are attractive." Whedell and Lucksinger were associate judges in selecting the homecoming queen and princesses. The Mayor said, "It is a real pleasure to judge." Nancy McGuire, a sophomore from Palo Alto, said, "It was not only an honor to be chosen as a finalist, but it was a real experience to meet and to know some of the local business men and feel the support of the whole city by their presence.

A Glennide sophomore Social Science major, Patty Hove, added, "I am really happy, and the judges were so friendly." Linda Dula, a Belmont senior Social Science major from San Jose, said, "I feel just wonderful, and the evening was pleasant and comfortable." A Junior English major from Trace, Deed A. Ang, said, "Everything was nice, exciting and the people made you very comfortable." Rose Ellis, a Sanford Home Economics senior Social Science major from San Jose, said, "The atmosphere made me relax. I feel just wonderful, and the experience was completely new.

Free-lancer speaks on the art of writing

Grants available for teachers to lecture

A large number of Fulbright-Hays scholarships and research awards are still available in various countries of the world for the year 1966-67.

These awards, open to experienced and qualified teachers in American universities or liberal arts colleges, offer unusually attractive opportunities for Americans to lecture in a wide variety of subjects in many of the principal cities of the world.

A revised list of openings in the fields of humanities, social sciences, mathematics, physical sciences, and others, has been released from the Conference Board of Associated Research Councils in Washington, D.C. This list may be consulted in the office of Robert M. Chalfant, Dean of Students.

Although the scholarships are normally offered for a full academic year, some are for one semester only, or even for the summer months.

Most of the positions provide for a substantial salary grant to assist the recipient in meeting expenses in the United States during the period abroad.

There will be an additional allowance in the currency of the host country for travel within that country, books, and activities essential to the assignment. Round-trip transportation will be provided for the grantee, but in rare instances, special permission may be made for the travel of dependents.

Faculty members who wish to receive announcements of Fulbright grants for the year 1967-68, which will be available for distribution next spring, are advised to request them now from the Committee on International Exchange of Persons, Conference Board of Associated Research Councils, 2111 Constitution Avenue, N.W., Washington, D.C. 20415.
The good doctor, through years of research, has found that a small organ near the heart, called the Fundip vacuole, is the root of all evil. According to Kundip's latest study, the Fundip vacuole is directly connected with the pub­lications. Perhaps the most pronounced symptom of the disease is the obvious fact that the students required to take the examinations will be voided, the school said it may require two months to complete the process. A spokesman for the school said there is a possibility that the examinations will be given in the Curriculum Library, Room 202. It is suggested that all interested students are in­vited to attend the meeting.

All interested students are in­vited as well as urged to attend this meeting.

Senior class holds coffee hour
SINCE the beginning of the semester, the students have been struggling with the problem of money. The Liberal student has noted the natural science exam.

Publications Group invites criticism
All members of the student body and faculty are invited to attend the February hearing meet­ing of the student, faculty, admin­istration, and Board of Advisors joint committee on student publications. The meeting will be held at 8 p.m. in the Curriculum Lib­rary, Room 202.

C h a r a c t e r i s t i c s

The purpose of the hearing meeting will be to obtain the views of the students and other interested persons not directly connected with the pub­lications.

The meeting will be held at 8 p.m. in the Curriculum Library, Room 202.

The purpose of the hearing meeting was not directly connected with the publications. The committee is interested in hearing answers to the following questions:

1. What is the role of such a publication?
2. How well is it meeting the role now?
3. What part should the Editorial Staff, Advertising Staff, Board of Publications, Advisors, SAC and Administration play in each of the publications?
4. How can these various groups be organized into an effective structure?
5. Does there need for a professional ethics committee to review prob­lem cases in which an advisor and/or editor and a reporter have become involved?
6. How should the various pub­lications relate to the inter­national departments?

All interested students are in­vited as well as urged to attend this meeting.

Cheating scandal hits Miami campus
A cheating scandal hit the Un­iversity of Miami this week, and the school said it may require freshmen returning from mid­summer holidays to retake — natural science exams.

A spokesman for the school said the students sold copies for 50 cents each. About 10 official of the university said there is a possibility that the examinations will be voided, and the students required to take them over. The Miami News said it learned that more than 100 freshmen took the natural science exam.

Recently a French movie star, Jean Poiret, once millionnaire hus­band, has been in the news lately. The Los Angeles Times said there is an affair signed by four witnesses, it was revealed that Dr. Poiret had fathered a ten-month-old girl for a nurse in a French hospital. The nurse has also accused him of being the father of her baby.

Meanwhile, Parisian society is abuzz over the news that Poiret, Dolly, and her husband, have been in the news lately. The Los Angeles Times said there is an affair signed by four witnesses, it was revealed that Dr. Poiret had fathered a ten-month-old girl for a nurse in a French hospital. The nurse has also accused him of being the father of her baby.

Unfortunately, the Liberal does not stop with his own personal beliefs. He has already been accused of un­fairness, of poverty, and of being a cheater. The Liberal said in a press release, "We have been accused of neglecting our Fundip vacuole, the root of all evil."

"We have been accused of neglecting our Fundip vacuole, the root of all evil."

**Young Farmers go to Salinas for convention.**

Members of Cal Poly's oldest club, the Young Farmers, have set for the 20th Annual Convention of the South-Island Farm Bureau. The group, which is comprised of students at Cal Poly, will take part in the convention from Feb. 2 until Feb. 3.

Four of these men will be representing the Coast Region, including Cal Poly's Kappa Chapter, Pierre Arras, Hartzell, Batenfield and Madonna in the Young Farmers State Parliamentary Preston contest. Cal Poly will be having transport along with the first day of the convention.

Cagers win streak tested against Bulldogs
Freeman's States' Bulldogs war into the Poly gym tonight where they will put a test to the Mustangs' six game winning streak. The Poly lost to Santa Barbara in the Mustang home basketball opener, 62-37. There after, Poly has rolled over San Francisco State, Westmont, Long Beach State, and San Diego State and knocked off the Hayward Pirates twice. Freeman holds a 4-0 CCAA record while being 11-3 for the season.

Fred Mustang, Jorgensen pointed out. "The Bulldogs have the best defensive record they have ever had, so we know we're running into a fine ball club." The Mustang coach added.

Fred Mustang went on to say that Poly will shoot a great deal and try to tighten up their defense. "I expect a fine game. It's an uphill battle but a good one and we'll certainly do our best to make it interesting," the Mustang coach declared.

First string guard John Gravett had to go to San Francisco for a medical check-up, and Fred Mustang was put to a test the Mustangs tonight where they will face the Bulldogs.

Fresno has been idle since Jan. 15, when they played Sacramento State. However, the Mustangs have been idle for only two days. The Titans boast a 10-8 season record. They had the guard positions.

First string guard John Gravett (S2) and an unknown Hayward State both teams look on. No. It Is Mustang Bill Bruce.

To the guard positions. Bruce at center, Winnie at guard, and Jim Waldron at the center positions.

Cal State of Fullerton will battle with the Mustangs Saturday night. The Titans boast a 1-7 season record. They too have been idle since Jan. 15, when they

Cagers win streak tested against Bulldogs

**Gymnasts down Hornets---UCLA Bruins are next foe**

Coach Vir Bucal's gymnasts team made them three out of four as they emerged victorious over the Sacramento State Hornets last Saturday night in the Capital City.

The score of the match, 120.75-112.75, was much more impressive than it looks. The Mustangs competed without one of their key men, Dave Martin. He injured his knee in practice last week and is expected to be out of competition for at least two weeks.

Bucal's plan was to use Chris Teeter, a newcomer to the team. He scored several points for the Mustangs, taking a third in the floor exercise.

Bucal's squad would have had completely top-ranked victory had it not been for the Hornets star, Larry Topping.

He won four events, the floor exercise, horizontal bar, long horse, and the parallel bars, along with a second place in the side horse and a third on the rings. He scored a total of 40.8 points for Sacramento, and was high quintet man for the meet.

Carl Daughters was the top man for the Mustangs with 29.7 points. He did not take a first in any of the events, but was second in the horizontal bar, third on the long horse, fourth on the parallel bars, and fifth on the side horse.

**Results:**

Trampoline: Garett CP 8.0, Rick O'HNan CP 8.3, Chris Walker CP 8.0, Allen Clark CP 8.0, Carl Daughters CP 8.0.

Horizontal bars: Topping SS 6.7, Daughters CP 7.5, Mike Wilson CP 8.1.

Longhorns: Topping SS 6.8, Steve Mayer CP 8.0, Daughters CP 8.1, Tschudy CP 8.1, Skip Healey CP 8.0, Nelson SS 8.0.

Rings: Phil DeRosa CP 7.9, 10:30 Night SS 8.4, Topping SS 7.7, Steve Mayer CP 7.8, Mike Wilson CP 7.5, Mayoor CP 7.0.

player of week

Two fine games turned in by Cal State Los Angeles guard John Ellsworth last week have earned the Diablo honor the CCAA "Players of the Week." Ellsworth, a guard, was in action in a pair of victories over Cal State Los Angeles and Cal Poly. In the first game, Ellsworth hit 17 points in leading the Titans to a 73-66 victory over the Gauchos. On Friday night, he then scored 22 points to lead the Titans to a 102-86 Saturday night victory. Ellsworth had 49 points against Cal State Fullerton for the season and was an all-conference pick by the basketball writers.

Matmen invade Oregon; skip NTC tournament

Coach Hitchcock Vaughn-Mitchell will have a third yearling grappler through conditioning work-outs in preparing for a crucial sitting of wrestling matches through Oregon's past weekend.

He ruled out the San Diego NTC David Wrench Center and Invitational Tourney in order to ready the boys for the matches against Portland State, University of Oregon, and Oregon State University, which will be held on successive nights.

Hitchcock expressed definite optimism on his team's chances against the powerful Oregon trio.

He gave the team a definite chance to beat Oregon but saw a huge handicap to defeat Portland State. However, he did give the Oregon State Reavers a 60-40 chance to beat the Mustangs, but added that Cal Poly could sweep all three matches.

Hitchcock also pointed out the fact that since the three are all on successive nights, it could have a damaging effect on the team, but realized that once his team had five matches on successive nights and won three of them.

**S.A.M. tops again; 1st in second round**

R.A.M. emerged as the team to beat in Monday night's 8 o'clock intramural basketball league. This week they defeated the Dal Hall F.M.T. to post their second straight overwhelming victory.

Lennie Cowell slams down, but retains strength

Cowell, who plans to coach wrestling at the high school or junior college level, believes that the autumn has been everything that the student body hopes for and more of the same.

Cowell slams down to prepare for Oregon State University, which will be held on successive nights.

Cowell summed up the entire wrestling squad's drive and determination by his enthusiasm toward the upcoming Oregon matches.

"Oregon State University is tough," says Lenny, "and we've never beat them. The team and I last year and both desire to be repaid this year.

"Mustang of Cal Poly with a dud next match of 1-7 are going south to Oregon in a big way, and we'll really put our work down for the team.

"I've been to every Oregon matman, and the architect* 11ft., and the NTC (New Training Center) is classed Palmier Hall in a 7-1 defeat.

At seven, the Poverty Pops with Roy Jarrard and John Miller each putting in 18 points ran up their second straight win, edging Poly Phase Club 41-40. Maxima Waynepac (Hal O'Hawaii) lost to Three plus Three 46-27, and Shasta bounced back from defeat last week to top Tenaya 87-60.

Eight 'ock league play saw the Road Runners of B.B.O. Village pick up their second straight win, as many weeks by rolling over Contra Palmier 43-41. Westiva Plus One edged with Henry Baldi, debt burling the data for 28 points, and R.A.M. posted its second straight victory.

All three winners were each pouring in 12 points ran up the 57-1 mark from 7-1 and won three of them.

"I know all about General Electric. They make toasters and irons and things like that."

"Right. Things like the world's most powerful jet engines, the world's largest turbine-generator, the world's first Man-Made diamonds. Things like nuclear power plants, suitcase-size computers and a whole new family of plastics."

"Yeah, yeah. Things like that."

**Student air fares drop**

WASHINGTON (AP) — The Civil Aeronautics Board has approved the proposals of a number of airlines to offer standby youth fares. The youth-class passengers would be accommodated only after space has been provided for military stand-by passengers, who always travel at special reduced rates.

The board approved these proposals:

- **American Airlines** to grant to teenagers between the ages of 12 and 22, who purchase a three dollar identification card, special availability of fares. The jet, which is used by the National Geographic Society for the production of nature films of Infinite accuracy and precision that have changed the way we see the world, has been made available to the public. This grant goes into effect Jan. 1.

All American Airlines to grant to the same age group, in purchase of a $6 identity card, space-available transportation at the lowest first and second-class fares. This proposal goes into effect Jan. 1.

- **United Airlines** to offer to the same group, on purchase of a $6 identity card, space-available transportation at the lowest first-class fares. This proposal goes into effect Jan. 1.

- Six other trunk airlines have agreed to similar terms of Youth-to-Youth travel at special reduced fares. The youth-class passengers have the same privileges as adult youth passengers, who travel at special reduced rates.

- This proposal goes into effect Jan. 1.

**Book Review**

By Arthur Talm

"Scientists Who Work With Cameras" (Athenea, and<br><br>Ad. Morris said."

"The authors have gathered descriptions of some of their favorite ways to improve the process of photography, giving us a glimpse of what could be done with the latest technology."

Writing in a clear, direct style, the author describes Albert Einstein's experiments with laser light focusing an up to 500,000 frames a second, James Flinn's study of natural resources on the moon with the closed circuit television cameras of Project Moon-Blims, and Harold Egan's experiments with strobe light.

"The author gives a clear overview of the four most important contributors to the science of photography through history."

The first chapter cites a brief history of the camera and quickly brings the reader up to the present. Then it is followed by a glimpse into the world of camera-in-the-air, under the sea, in the sky, in the air, and into the human body.

Dennis scientists on these frontiers are solving more and more of the mysteries of the universe. They are discovering more about the medium of the camera. They are discovering more about the medium of the human body."

The author's final call of a "satisfactory" camera can now be seen as only the beginning of more. The book was written and this type of camera is used. This book is written by a medical aid and has a stroke of radiation, the substance injected into the brain, which detects brain function and defects of various lesions, is used by the National Geographic Society for the production of nature films."

"The author's final call of a "satisfactory" camera can now be seen as only the beginning of more. The book was written and this type of camera is used. **Stanford changes**

(Continued From Page 12)

This program of "action research" will also help all higher education "to move faster over the search for formulas and solutions," said Dean Wort.

"In the absence of research, even the best people in higher education will seek formula solutions — the "college within a college," for example, or conditional dating. These become ends in themselves rather than means for solving our basic problems," he added.

"The more rapid research" as needed in the college classroom, Dean Stahl said. "This pace, for example. There's good teachers teaching for the first time and the students for the first time.

"The more rapid research" as needed in the college classroom, Dean Stahl said. "This pace, for example. There's good teachers teaching for the first time and the students for the first time.

"The more rapid research" as needed in the college classroom, Dean Stahl said. "This pace, for example. There's good teachers teaching for the first time and the students for the first time.

Dean Wort emphasized that the "search for solutions" should be "with nothing, not especially with the search for solutions, but with the search for the solutions, the research, the analysis, the development of new ideas.

*The first chapter cites a brief history of the camera and quickly brings the reader up to the present. Then it is followed by a glimpse into the world of camera-in-the-air, under the sea, in the sky, in the air, and into the human body.
