Goods drive planned for needy by Cal Poly's Key chapter

The student service organization at Cal Poly Pomona will sponsor a drive for usable clothing, books and noodles for distribution to needy students in San Luis Obispo County.

Called by Cardinal Key and the Key chapter at Cal Poly, the drive will begin today and end Feb. 19.

Articles received during the drive will be stored and catalogued. The drive will also include a food bank and distribution to specific families who have indicated a desire to receive such items.

Local residents indicated that families who would receive the drive's items would be those who either have a low income or have many dependents. They would also be those with little in need of a

Social service exams slated for Religion In Life Week

The 1981 California Counties Social Work entrance examinations will be held on March 26. Students must register by Feb. 28, the deadline, according to the Social Work entrance examination.

Applications must be postmarked by Feb. 28. The examination will be given April 6 and 7.

The council expects about 200 applicants to take the examination.

The council also expects about 10 to receive scholarships.

Applications are available from the Social Work entrance examiners.

Miss Margaret Chase dies; funeral today

Funeral services will be held today at 7 p.m. in the John Wesley funeral home in San Jose for Miss Margaret H. Chase, teacher and administrator at Cal Poly for 52 years, who died Monday of a heart attack.

Miss Chase was well known for her community service in San Luis Obispo and was a member of several service organizations.

She was one of the founding members of the Santa Maria civic league, the Association of University Women here in 1932 and president from 1944-46. She also served as a charter member of the Central Coast League of Catholic Women.

Refined for 26 years, Chase moved to Santa Clara in 1918, according to the administration.

Administrative vice president, Robert Menagey, named her first acquaintance with Miss Chase.

She was the kind of person who was not interested in the staff but rather in the faculty.

To give you an idea of the kind of person she was, keep your eye open for ... the campus. She was very much interested in student

Engineering senior turns down the moon!

A job at Southern California Edison offers more excitement.

The race to the moon almost seems tame to Edison.

We're racing Southern California. In the next 10 years, we'll serve an estimated 25 million more people.

The race to keep pace, electrically, demands creative engineering of the highest order.

Edison is building a nuclear generating plant at San Onofre, California. In fact, our staff is already making plans 20 years ahead. Under study: thermionics, thermoelectrics, magnetohydrodynamics, and other methods of direct conversion that show promise for tomorrow's power systems.

Sound exciting enough for you?

If you're a candidate for a bachelor's or advanced degree in electrical engineering, mechanical engineering, industrial engineering, or chemistry, you may he our man.

For information, write: Mr. J. W. Clemmson
Southern California Edison Co.
P.G. Box 351, Los Angeles 90053.

If you haven't already, write to South ern California Edison Company and tell them why you're interested in engineering. Even if you're not in college, a free estimate will be yours.

GOVERNOR'S FAVORITE . . . Governor Brown's 1966-67 budget went to the legislature last week. As usual, the largest proposed allocation was for education ($1.65 billion, or 45 per cent of the budget.) The governor is to be commended for his support of education. But why does he continue to discriminate against the state college system in favor of the University of California?

As the governor noted in his budget message, the "state colleges enroll an estimated 172,550 individuals next year." Yet he recommends only $186,5 million be spent on the eleven state colleges. Against this he proposes $252 million be given to the university, with its nine campuses and projected enrollment on only 80,777 students next year.

While we agree that the university is the finest state university in the nation, we ask: What is the purpose of the state's education system? Is it not to give the best educational opportunity to the students throughout the state? Our teachers are not paid as well as those at the university and our inability was obviously financial. Our teachers got a pay raise. As to the physical facilities, we can assure him that there are students throughout our system who might like to stage their own FSM for his favor of the University of California?

The university may be the place to go for an education. It is the place for joining movements like the Free Speech Movement or the Vietnam Day Committee. The university also is the place for students to go who want to become just IBM numbers.

Compared with the university, the state colleges, and especially Cal Poly, must seem placid to the governor. But we can assure him that there are students throughout our state college system who are the most eligible to stage their own FSM for his benefit, if that's what it takes to force him to pay attention to the needs of the state colleges.

The hope staff-college study does that won't have to resort to FSM-type activity to correct administrative injustices, but the governor's obstructive policies give few alternatives.

We hope those legislators who have state colleges within their districts will question the governor's education financing policies and act accordingly.

GUEST BIRTHDAY WISH

A woman who was born in Jerusalem, and now lives in Phoenix, Arizona, became a U.S. citizen. Also, it was her birthday. She said she was happy to have the opportunity to serve the Lord. And, she said she was happy to get the opportunity to serve in the Lord.

Robert Boyd, Editor-in-Chief

COURTSHIP

The courtship was going well. The man and woman were planning their wedding. They were going to take a vacation and then get married. The man was going to propose to the woman, and she was going to say yes.

Robert Boyd, Editor-in-Chief

MAJOR PROGRAMS NOW UNDER WAY:

- PLOWSHARE—industrial and scientific uses of nuclear explosives
- WHITNEY—nuclear weapons for national defense
- SHERWOOD—Power production from controlled thermonuclear reactions
- COMEDICAL—the effects of radioactive decay on man and his environment

Laboratory staff members will be on campus to interview Science and Engineering students for positions.

By Arline Todd

A radically different approach in psychiatric treatment from the usual methods the patient receives today in the schools is being adopted today in the home of Dr. William Glasser, professor of psychiatry at the University of California at Los Angeles.

Dr. Glasser believes that psychiatrists are far too often concerned only with treating the symptoms and not the underlying causes of their patients' problems. He feels that by understanding a patient's basic needs and helping them find ways to satisfy these needs, he can help them get back on the road to normalcy.

Dr. Glasser's method, known as Reality Therapy, is based on the belief that every human being has certain basic needs—such as love, belonging, and esteem—which must be satisfied in order to achieve personal and social growth. If these needs are not met, the patient may develop a variety of problems, including psychiatric disorders.

Dr. Glasser believes that by identifying and meeting these basic needs, the patient can learn to be more responsible for their own behavior and develop a positive attitude towards life. He feels that this approach is more effective than traditional psychiatric methods, which are often too focused on treating the symptoms rather than the underlying causes of the patient's problems.

Dr. Glasser has been a leader in the development of Reality Therapy and has written extensively on the topic. His latest book, *Lucky You* (Harper & Row, $3.45), has been praised for its clear and direct approach to understanding and treating psychiatric disorders.

Dr. Glasser's approach has gained widespread acceptance in the field of psychiatry, and his work has been translated into 13 languages. He is currently the director of the Reality Therapy Institute, which provides training and consultation to mental health professionals around the world.

Valentine's Day's "Cupid Shoot" attracted more than 160 shooters ranging from fifth-grade children sponsored by the Cal Poly Shooting Sports Club to world-class shooters sponsored by their own clubs. The event, held at the Santa Cruz Sportsmen's Association's range, attracted participants from all over the Bay Area.

The first prize was awarded to John Wild and Leong Howard for the "Cupid Double" contest, second prize to John and Leigh Hallstrom for the "Cupid Double" contest, and third prize to John and Leigh Hallstrom for the "Cupid Double" contest. The event was a huge success, and plans are already underway for next year's Cupid Shoot.
Dairy award dinner tonight at Elks Club

Why will the retirement of the foundation and project dairy herbs be done early Saturday evening, February 18? Well, the dairymen of Cal Poly will be turning out for their "largest social function of the year," says Dr. Herman Rickard, dairy instructor.

The Surprise Annual Dairy Banquet will be held at the Elks Club Lodge in San Luis Obispo starting at 7 p.m. The cost of this feast will be $3.25.

Orders will be named this year's honorary member.

Anyone interested is invited to attend.

Playboy club holds dance

College Union is holding its annual Playboy dinner tomorrow, beginning at 9 p.m. in the Staff and Student dining halls.

The dance will be held on two different dance floors. Two bands will play different types of music. The "Openers" will provide a "Swing type traditional kind of music" while the "Illusions" will play the "modern" types like the frog, the monkey and the waltz.

Authentic "Playboy" gifts will be given away as door and dance prizes. Tickets are available in the ASU Office and the Snack Bar. The cover charge is $2 per couple.

Devel book subject at review meeting

Author Ralphske of the English and Speech Department will review "Testaments of Time" at Books at High Noon on Tuesday. The book, by Leo Devel, tells about the scholar-adventurer, who followed the archeologists and have restored ancient texts.

To any kid who'd like to go somewhere:

We'll pay half your fare.

The idea's not as crazy as it may seem. Anytime we take a jet up, there are almost always leftover seats. So it occurred to us that we might be able to fill a few of them, if we gave the young people a break on the fare, and a chance to see the country.

The American Youth Plan

We call the idea the American Youth Plan, and what it means is this:

We will pay half the jet coach fare for anybody 12 through 21.

It's that simple.

All you have to do is prove your age (a birth certificate or any other legal document will do) and buy a $3 identification card.

We date and stamp the card, and this entitles you to a half-fare ticket at any American Airlines counter.

The only catch is that you might have to wait before you get aboard; the fare is on a standby basis.

"Standby" simply means that the passengers with reservations and the servicemen get on before you do.

Then the plane's yours.

The American Youth Plan is good year round except for a few days before and after the Easter, Thanksgiving and Christmas rushes.

If you can't think of any places you'd like to go offhand, you might see a travel agent for a few suggestions.

We can't add anything else. Other than it's a marvelous opportunity to just take off.

Complete this coupon—include your $3. (Do not send proof of age—it is not needed until you have your ID validated.)

In addition to your ID card, we'll also send you a free copy of AA's Go Go American with $50 worth of discount coupons.

SAN LOUIS OBISPO

"Kansas State is rugged, well balanced, high motivated in fast-paced competition, and again will be a real dogfight. Said Cal Poly wrestling coach Vaughn Hitchcock in reference to tonight's CCAA dual meet with the Bulldogs in K-State's Gym at 8 p.m.

"The Bulldogs bring in the line-up their most powerful wrestlers tonight to end a regular season slate. Heading the line-up is National Collegiate Athletic Association (NCAA) weight class 121-pound champion, Steve Johansen of 121 lbs. Johansen has given Cal Poly low graders a big scare in this weight class and this weekend may set to a showdown.

Dick Burbeck, another outstanding wrestler with a 155-pound heavyweight, is another Bulldog standout. Burbeck, tiping the scales at 253 lbs., and will be pitted against the Mustang's Joe Garbett. "

Two spots in Cal Poly's lineup will not be up to full strength. John Gruenert the league's top-rated 181-pounder, is suffering from the flu and is not expected to be ready at match time. Tom Wiegand, another key player, will not be able to compete in tonight's match with Cal Poly's John Garcia, local's top ranker in the 127-pound weight class. John Garcia's absence will be a major loss to the Mustangs.

In the lineup of winners, Cal Poly's Joe Garbett took advantage of the Mustang's Villas-Whittington 121-pounder and defeated him at 121 lbs. Joe Garbett also defeated the Mustang's Tom Kline at 177 lbs. Complete lineup results are as follows:

Cagers are the only unbeaten team in the CCAA, with 7-0-0 record and running third place in the league's overall standings with 14-1-0. Cal Poly's 7-0-0 record includes a 3-0-0 conference mark for the Mustangs.

The Mustangs will also try to maneuver into second place in the CCAA with their 7-0-0 conference mark this weekend against the 6-1-1 record of the San Francisco State team. The Mustangs are expected to move into second place if they win against the San Francisco State team. The Mustangs are expected to move into second place if they win against the San Francisco State team.

See our representative on campus next week.
Pistol team downs University of Utah  

Cal Poly's varsity pistol team defeated the University of Utah by 112 points in a match held over the weekend.

The Mustang pistolers fired a five-man total of 1849 to top Utah's 1288. All five Poly men scored above 200, with one man hitting a 278. Utah's best score was 265, followed by Chuck Dickinson, 268, and Bob Crane, 268.

Earlier this year, the University of Alaska also went down in defeat before the green and gold "dead eyes." Repeating the conventional and international matches to be fired at Cal Poly on Mar. 5-6 will be the same Poly team that won the State and Southwest Pacific States Regional Championships in the 22 caliber sharpshooter class last year.

Let's compare answers on campus on February 21.  

Mr. John Rogers of the Data Systems Division of Litton Industries in Van Noy, California has the answer to the offensive problem. He also has some answers for graduating engineers interested in a future full of challenging problems...not exactly like the one above...

The Data Systems division, part of the billion-dollar Litton Industries complex, is best known as the designer, developer, and manufacturer of large-scale military systems. The division has also developed a significant range of important military environmental control and sub-systems, applications of these are such advancements as the L-300 mid-course control computer, the MIDOS (Marine Tactical Data System) Display Console, and the unique Voice-Data Communications Set, Digital Data Links.  

Mr. Rogers will be on campus to tell you about current openings in the division's three major areas of "Gigagigabyte" DATA PROCESSING, DISPLAY, AND COMMUNICATIONS SYSTEMS.

You'll find the answer to the Martian coin problem and to your career as well...in the best and most authoritative source for the profession of engineering.

Can you solve the Martian coin problem?

15th running of grueling race nears; 150 riders expected

The Cal Poly Penguins Motorcycle Club's annual Enduro is here, since starting Oh Sunday, nearly 150 riders from all over the state will try their luck in the 200 mile event.

The course is laid out in the Santa Lucia Mountains, surrounding the San Luis Obispo area. Little known areas such as La Purisima, Lompoc, Quantrv Peak, Paso, and Little Puff will be key points along the route.

Public land use is used for most of the Enduro, but some of the course is laid out over private and government lands.

Planning for the event begins in the fall quarters. There are many details that go into setting up the nationally known event. People have to be at check points to give assistance to riders along the route, a communications network has to be set up to help keep track of the riders and their positions, and a clean up crew must be set up to keep the course in good condition after the race is run, and to pick up any strays riders who might get off of the clearly marked course.

Gymnastics open home face Long Beach, S.F.

Cal State at Long Beach and San Francisco State will apply the opposition Saturday night at the Mustang gymnasium open their home season.

The double-dual meet will begin at 7:00 p.m. in the field gym. Admission will be charged, $2.25 for students, and $3.25 for adults.

Cal Poly is sporting a 3-1 dual record. Whether the Mustangs will be able to make a sweep, split or drop two will depend on the health of the squad. For the past several weeks injuries have hampered top performers for coach Vic Huccola. All-round performer Dave Bumster and Carl Dunbar have been on the injured list and probably won't be at full strength. Freshman Mike Harris, who on the all-less for several weeks, should see some limited duty too. Carl Terrill, who joined the Mustangs at the start of the winter quarter needed time to get back to form. So people have. Take the extra at an extra cost. Outside mirror mirrors. Padded dash. Variable-speed wipers and washers. Backup lights. Turn signals. Seat belts, front and rear. They're all standard. And Coupe's price? That's easy to take, too. So, much down to your nearest Dodge Dealer. See what the showing is all about. Hot new Dodge Coronet for 1966. Be SURPRISED
