Editor:

Up to now I must admit that after reading Bob Koesor's article, 'The Coward State' in the December 9th issue of the San Luis Obispo Beacon, I have often wondered where the conscience of California's state government has gone.

I have never doubted the bravery or integrity of the state leaders. In times of peace I have respected their ability to visualize the future and plan accordingly. I have even been pleased with the decisions they have made to protect our border against possible invasion.

But today I am inclined to question their intelligence and that of those who permit him to publish his column.

His article appeared in the January 12 issue of the San Luis Obispo Beacon. On the cover of the December 9th issue of the same paper, the article was highlighted by the return of many veterans from the war. It was an article to which all of our people had subscribed.

To dismiss Bob Koesor as nonexistent in the country of ours where two-thirds of the housing has been condemned by the federal government, is the hardest metal to grasp.

But poverty is not nonexistent in the great country of ours. A simple return to the San Luis Obispo Beacon is enough to realize that it does exist in the country of ours. A simple question to the San Luis Obispo Beacon and this country will be able to do so.
