Cal Poly Police Going Green with New Electric Patrol Tri-Wheelers

SAN LUIS OBISPO -- University Police officers are now patrolling the campus in a new, environmentally friendly way. The department recently purchased two electric tri-wheeled vehicles, complete with lights and sirens.

Though they look a lot like the two-wheeled Segway e-vehicles, the UPD patrol models have three wheels and are battery powered. Charged up every night, the tri-wheelers can easily zip into areas cars can't, and can move at speeds up to 18 miles per hour.
