Some students lack $$

Lack of funds in the major academic plan to move their school's building up does not affect the majority of the student body. Carrying a full academic load and paying the increased cost of tuition is a problem for all students without financial aid, whether they attend full or part time. The majority of students are in favor of continuing to only offer a part-time program, and they hope to cut costs by reducing the number of faculty and staff in the future.

He praised the efforts of the College staff and students who have worked hard to make the C.C.R. program successful. He also expressed appreciation for the support of the College administration.
