by John Morgan

The administration was students as opposed to the usual "Jungle" dorm. It was, therefore, an academic success. For the administration was prepared, working, and it produced a plethora of semester results.

The "Jungle" is the social (but not literally) hotbed of the entire campus. The dormitory is located near the main entrance of the University, immediately below the administration building. It consists of a large quadrangle surrounded by four residence halls. The main residence hall is known as "Jungle" and is one of the most active dormitories on campus.

The residents of "Jungle" are very active in campus life. They participate in a wide variety of activities, including athletics, student government, and social events. Many of the residents are involved in extracurricular organizations, such as the drama club, music groups, and debate teams.

The dormitory is also a popular place for students to study. There are several study rooms and lounges available for students to use. The residents of "Jungle" are known for their academic success. Many of the residents are involved in academic societies, such as the National Honor Society and the Honors College.

In addition to the academic success of the residents, the dormitory is also known for its social events. There are several parties and events held throughout the year, including a weekly movie night and a bi-weekly dance.

The residents of "Jungle" are known for their community involvement. They participate in a variety of service activities, such as volunteering at local hospitals and providing tutoring for underprivileged students.

Overall, the residents of "Jungle" are a close-knit community that is active in both academic and social activities. They are known for their academic success and community involvement, and they are an integral part of the campus community.

 Settlement sought in 1960 air crash

by Marion Murphy

The plaintiffs who seek settlement for damages sustained in the 1960 air crash which killed 17 members of the football team and five other students of the school. The suit was filed last week in U.S. District Court in Los Angeles.

The crash occurred in a densely populated area near the campus of the University of California at Los Angeles. Five of the seven bodies were identified as members of the University's student government, and five others were identified as members of the University's athletic teams.

According to the suit, the crash was caused by the negligence of the airline, the Federal Express Corporation, which was operating the flight. The suit alleges that the airline was aware of the risks involved in flying over the area and had previously been involved in other accidents in the area.

The settlement sought is for the payment of medical expenses, funeral expenses, and damages to the estates of the deceased.

Senior class largest

8,314 enrollment college record

Records continue to be established by the San Luis Obispo campus of the University of California. The largest class on campus, Senior class largest, was established by the college in 1960.

The number of students enrolled in the college has increased from 2,000 in 1960 to over 9,000 today. This growth has been due to a number of factors, including increased enrollment from the surrounding area and the establishment of new programs.

The growth of the college has been accompanied by an increase in the number of full-time faculty members. The college now has over 300 full-time faculty members, compared to fewer than 100 in 1960.

Pope asks comment on birth control

VATICAN CITY (UPI)—Pope Paul VI will ask Catholic priests at the Synod of Bishops for their written opinions on the controversial birth control question, synod sources here reported.

The request was made in response to a question asked by a representative of the Institute for Propagation of Family Life at a recent synod session.

The question asked was whether the Pope would consider the issue of birth control as a matter of science and not as a moral issue, and whether the synod should be given a chance to express its opinions on the matter.

The Pope has previously expressed his opposition to birth control, stating that it goes against the teachings of the Church and is a matter of moral principle.

However, he has also stated that he respects the views of his priests and that they should be allowed to express their opinions on the matter.

The Synod will convene next month, and the question of birth control is expected to be one of the major topics discussed.

World in Brief

Indians find "The Promised Land"

PORTLAND (UPI)—Commissioner of Indian Affairs,周转 York, said here today that his agency has encouraged Indians to press for legislation to ease the situation which has resulted in their flight from communal living.

"We must push for legislative changes which will allow us to break away from the communal living situations,"周转 York told the meeting of representatives of Indian tribes at the White House.

"There is a feeling that we must be able to live in a modern society and yet maintain our traditional ways,"周转 York said. "We must be able to live in the modern world and yet be able to preserve our ancient ways.

"The problem of a better relationship between the tribes and the government is very real, but the Indian is not a problem that can be solved overnight. It is a long-term problem that requires the attention of all of us."

**Conservatively Speaking?**

A recent magazine advertisement for a second-hand puppy was a problem. The photographer was in the puppy's living room when the poor, little dog started to bark. A second exposure was not possible, so the photographer simply covered the puppy's eyes. Not an honest presentation of the product!

This week's high school newsletter featured an advertisement for a new corporation that is to be formed in Hollister. The ad stated that the new corporation will have an initial capital of $1 million and a feedlot that will be used to raise beef cattle. The ad also mentioned that the corporation will be using the latest technology and that the cattle will be raised in a humane manner. However, the ad did not mention that the corporation will be using a new type of feed that has been shown to be harmful to the cattle's health. This is another example of misleading advertising.

In response to your question about the lack of support for the City Tribune, I would suggest that the newspaper would benefit from a more active role in the community. The Tribune could more effectively cover local events and issues, and also provide a platform for community members to express their opinions. This would help to increase the newspaper's relevance and appeal to potential readers.

**Fox steps into new post**

Four new faculty members will join the College of Agriculture at California State Polytechnic University. They are the latest in a series of new appointments made by the university in the past year to address a growing need for more faculty members.

**College-'Corps will join forces**

The College of Agriculture at California State Polytechnic University has announced a new program that will allow students to participate in the college's 'Corps' program, which provides hands-on experience in agricultural-related fields.

The program will be open to all students who have completed at least one year of college and have a strong interest in agriculture. Students will have the opportunity to work on farms, in research labs, and in other agricultural settings. They will be able to gain valuable experience and develop skills that will help them in their future careers.

The program will be offered in partnership with the College of Agriculture at the University of California, Davis, and is designed to provide students with the opportunity to learn in a variety of settings. The program will be open to all students who have completed at least one year of college and have a strong interest in agriculture. **AE majors are the only ones who pass through these doors!**

Not everybody ELSE counts the same as an agricultural engineering major, according to Mike Mohren, head of the department at California State Polytechnic University.

Mohren said that agricultural engineering majors have their own chapter of the ABEE, the American Society of Agricultural Engineers. The chapter is composed of about 125 members, and it meets monthly to discuss current issues and developments in the field.

**Standing at the top of the class**

A student committee, formed to consider the possibility of a first-class education, will be able to shoulder the burden of the schoolhouse. It's fine to say that the schoolhouse is a problem, but it's much more important to do something about it. The way we will make the schoolhouse better is by teaching the students how to think, not how to memorize facts.
