Students show support for U.S. in Vietnam

The purpose of the show is to show what the Camera Club has done, said Scott. He went on to say that the Camera Club will show only good pictures, scenes around the college, beach scenes and pictures of San Luis Obispo. There will also be abstracts.

Some of the pictures will be in color, but the majority will be in black and white. All of the black and white photogravure and developing has been done by the members of the Camera Club.

The exhibit also will include some ice photography," Scott said.

**Bank of America has a spot for you!**

If you're interested in a career in California, we're interested in you. Bank of America has a rewarding need for young men and women with ambition and executive potential to help in the development of our new markets and new banking services. No matter what your degree or major field of study, we may have challenges to match your skills. As the world's largest bank, we serve every aspect of business, industry, and agriculture in the nation's largest, most dynamic state. And since Bank of America is not only a state-wide bank—it's world-wide, too—you'll find opportunities in the field of management, administration, and executive as well. We'll have an open interview after the next Bank of America recruiting officer visit to your campus.

**Bank of America**

A Bank of America recruitment officer will be at your placement office soon.

**INTERVIEWS FEBRUARY 13 & 14**
Pencil Sprint

The complete results are:

Ribbon roping: 1 and 2, split

Partin was the top man in both
tand and 7, split between John
dorf and Bob Hafenfeld of

1, Charles Simmons of Squaw

Way and Bruc* Hafenfeld of

1, Adolph Parton, Koc* of Mul
dale. His opponent was Paul

2, Ron Miner of Wll-

er Atascadero.

2, Hoyt of Elk Grove and Tom

Newton of L6moore; 3, Bchaafsms.

Exeter, chairman of the State

Chowchilla.

Way to engineer students to Lockheed.

Way of ends and means are the

same. There are definite long­
term goals and these are the

main objectives of the program.

Projects are a matter of degree, but, that's only the beginning. At Lockheed students

are working on projects in methodological...opportunistic...and
critical research. 1) We're pretty high on space...we've got Aero and other

companies working on projects to go in and when it comes to lateral motions,

Polite and Fielder show an aim of triumph. We think deeply, too...consider our
depth emphasis on vehicles, for example. And, just to show you what our

staff is doing, we're working on advanced land vehicles. Information? Business,
government and industry get cut of our system.

Lockheed is a high place to be...in space...and now we're
coming to your campus. We'd like to talk to you about coming to LADC. Contact your

placement office for an appointment. Our Interview team will be on campus February 20.

TRW is successful by association
