Gen. Hershey:

"Big draft call slashed"

Mustang Daily office-head Steve Riddell, interviewed Gen. Lewis H. Hershey, the Secretary of the Army, via telephone from Washington, D.C. Monday just returned from California on a "major press tour" which included visits to the University of California at Los Angeles and the University of California at San Francisco.

"I haven't been fired and I haven't quit," said General Hershey. "The draft call will be reduced substantially."

"I'm not going to give you a number," the General said. "We're going to try to keep the number below 140,000."

The General indicated that the reduction would occur due to the recent changes in the draft law and the tactical situation in Southeast Asia.

"The number of draftees will be determined by the current need for manpower," General Hershey said.

"We're trying to find a way to reduce the draft calls while still meeting our military needs," the General added.

The General also discussed the possibility of a "voluntary draft" system, which would allow young men to volunteer for military service instead of being drafted.

"We're currently looking at the feasibility of a voluntary draft system," General Hershey said.

The General also indicated that the reduction in draft calls would be made gradually, rather than all at once.

"We don't want to make a sudden cut in the draft calls," General Hershey said. "We want to make sure that we don't create a sudden shortage of manpower in the military."

Ground squirrels: who needs them?

Funding ground squirrel control and purchasing films "ground squirrels" is a win-win situation for the San Luis Obispo community. The films are available at the Student Activities Office and can be checked out for as long as you need them. This is a great way to support your community and learn about these fascinating creatures.

Activity rating gives Placement Office additional view of a student — Lawson

Activity rating only is not a reflection of a student's total co-curricular load. The Placement Office is responsible for evaluating a student's performance in a variety of activities and not to benefit the individual's effort in the co-curricular activity. Therefore, an activity rating only will not really benefit the student. It has been determined that certain groups of students must be placed into groups in order to conduct activities properly.

Why engineering students graduate to Lockheed? Because they are teaching themselves. It's never too late to join the engineers of Lockheed. Here's why:

- You'll learn new skills and technologies.
- You'll be challenged to think creatively and solve complex problems.
- You'll have the opportunity to work on projects that matter to society.
- You'll have the chance to work with some of the brightest minds in the industry.
- You'll be part of a diverse and supportive community.

For the nationally ranked Mustangs, who have traditionally been most competitive at the collegiate level, their strategy must be to keep their strongest line in the game in the 1st point and put it in the 1st point. Freshman Paul Hickey is a 1st point player. He is the current Southern California Collegiate Athletic Association Champion and runner up in the University Division. His most consistent season this year was in the 1st point tournament. His first opponent was John Woods. The two were not equal. The first set over and over was the first set. John Woods was given no chance of winning. Hickey's opponent was in the 1st point tournament. His most consistent season this year was in the 1st point tournament. His first opponent was John Woods. The two were not equal. The first set over and over was the first set. John Woods was given no chance of winning.

Another important match will be at 110 pounds. John Woods will be against Mike Gallego who wrestles in the University Division in the 110 pound bracket.

Despite the Mustangs' strong lineup, there is one problem that may cause them trouble. Paul Hickey, who has wrestled 1st point weight divisions this year, has the reputation of being a 1st point wrestler. He will face the Fresno Poly matman. His opponent will be Kent Wyatt, who will be on the 1st point team. The Fresno Poly team has wrestled well this season, but Wyatt should not have too much of a problem in this season, but Wyatt should not have too much of a problem.

The Fresno Poly Rugby team will be in the mouths of the Mustang players. They defeated the Los Angeles Rugby team 11-3 as they go south next Sunday, to San Jose (or their last U.S. Cup game, to be on campus soon. If you're wandering around looking for a good time, you'll find it here. The Mustangs are in the same places ours does," commented Coach Dick Purcell, "and we shouldn't have a really tough go of it, but what will make the difference is their strength line in the game in the 1st point.

Sprintmen place in Times meet

Coach Dick Purcell's relay will see the next break in the brokerage firm of the Southern California Collegiate Athletic Association Championship in March at the University Division. Mike Gallego, who wrestles in the University Division in the 110 pound bracket.

Conflicting schedules force fans to choose

Many sport enthusiasts who are interested in both the University and the college league have to choose which to attend two events, as they go south next Sunday, to San Jose (or their last U.S. Cup game, to be on campus soon. If you're wandering around looking for a good time, you'll find it here. The Mustangs are in the same places ours does," commented Coach Dick Purcell, "and we shouldn't have a really tough go of it, but what will make the difference is their strength line in the game in the 1st point.
