DRAFT TO SLOW GROWTH OF COLLEGE GRAD SCHOOL

In a press conference held Friday morning, Robert E. Kennedy, assistant on board the ship to the president of the Corporation of the University of the State of New York, announced that the U.S. Navy had been directed to cease the construction of the new ship due to the current shortage of parts needed for its completion.

Kennedy noted that the new ship, scheduled for completion next month, will have a definite effect on the graduate school program of the University of the State of New York. The ship is being built to carry the institution's personnel and students to remote parts of the world for research and educational purposes.

In an interview with reporters, Kennedy stated that the last students were the very ones who had predicted delays due to the shortage of parts. He added that the situation had worsened since the last update on the ship's progress.

The device is portable and self-contained. It weighs 15 pounds, is 12 inches long, and is made up of a closed system. It contains all the essential components for the production of energy from the sun. The device is designed to be used in areas where there is little access to electricity, such as remote villages and disaster-stricken areas.

The developers of the device, who are currently working on its commercialization, expect it to be available for use within two years. They estimate that the device will cost between $1,000 and $3,000, depending on the location and the specific needs of the user.

Transistorized favor brings profit to electronics major

A transistORIZED ELECTRONIC LIGHT DEFOCTOR has been developed by the Electronics Corporation of America (ECA), a division of General Instruments Corporation. The new device is expected to revolutionize the field of electronic controls and is already being manufactured and sold as a component in a variety of electronic and accessory equipment.

The transistorized light deflector is a miniature unit that is inserted in the circuitry of a device to control the flow of light. It is activated by a signal from a sensor, such as a phototransistor, and is capable of turning the light on or off automatically.

The deflector can be used in a variety of applications, including street lighting, traffic signals, and industrial controls. It is expected to have a wide range of uses, from home lighting to public safety systems.

A number of companies are currently working on similar products, and it is expected that the market for such devices will grow significantly in the coming years. The transistorized light deflector is a major breakthrough in the field of electronic controls and is expected to lead to a number of new applications.

Donate one of your parts, save somebody's life

LOUISVILLE (AP) - The legal and ethical implications of organ transplants will be examined at a meeting on Friday, April 1, sponsored by the University of Louisville. The meeting will feature a panel of experts from various fields, including medicine, ethics, and law.

The meeting will be held at the University of Louisville School of Medicine, and is open to the public. The panel will discuss the legal and ethical implications of organ transplants, including the rights of donors and recipients, the role of the medical community, and the impact of the new technology on society.

McBride begins new duties

George McBride, a 1963 graduate of the University of Michigan, has been appointed to a new position at the University of Georgia. McBride will serve as the University's director of research and extension services.

McBride has been a professor at the University of Georgia since 1965, where he has served as the director of the Agricultural Experiment Station. He has been active in research and extension work, and has published numerous articles on agricultural topics.

McBride's new position will involve overseeing the university's research and extension efforts, as well as coordinating the work of the Agricultural Experiment Station, the Agricultural Extension Service, and other related units. He will also be responsible for developing new research programs and initiatives.

Lewis to 'jazz' crowd

The popular singer-songwriter, Lewis, will perform for the first time in three years on Saturday night, March 26, at the University of Louisville. Lewis, known for his soulful singing and infectious rhythm, will perform a variety of his hit songs, as well as some of his newer material.

The concert will be held at the University's Student Center, and is expected to draw a large audience. Tickets are available at the University's Box Office, and are priced at $5 for adults and $3 for students.
Faculty to be evaluated March 4 in experimental ASSIST program

Staff staffs school halls

We have students know Polly every day.

This was P. Gerald Hillyard's reply when asked, "What effects will the draft have on Cal Poly?" nun how the effect will vary from day to day.

In compliance with the Federal Privacy Act, the student draft board knows the names of the students at the time of their call and will maintain accurate records of those students throughout the semester.

The draft deferment is granted in the opinion of the proper authorities on the basis of real need and not for any other reason.

A limited faculty evaluation will be performed each year by the ASSIST (Associated Students for Instructional Services). The evaluation, in order to be fair and thorough, will be conducted by a faculty member chosen at random.

The report of the evaluation will be submitted to the Computer Science Board, which will then take appropriate action. The Computer Science Board will also be responsible for the evaluation of the educational effectiveness of the evaluation.

The evaluation will be conducted by the University Senate, which will be responsible for the evaluation of the educational effectiveness of the evaluation.

For more information, contact the Office of the Dean of Students, 320 Poly Hall, San Luis Obispo, CA 93405.
**Campus Capers**

**Club seeks queen**

Nomination for Miss Mathewson page to be held on Wednesday, Feb. 26. All students and Tau Kappa members eligible in accordance with outgoing queen rules. Engagements to be made by Thursday evening. The meeting will be held at 8:00 p.m. in Peterson Hall.

**Energy project to bolster students**

For the sake of a more accurate, water- and electrical-energy usage, there are new programs on campus that will help to reduce the amount of electrical energy used. The project, which is near the Student Center, will contribute to the reduction of usage.

**Dancing in Snack Bar**

A new hour of nightly service has been introduced in the present season at the snack bar. The hours will be from 7 to 9 p.m., and will be open only to students who have shown a good attendance at the previous service hours.

Cagers win 2 in CCAA

by George Romeo

Wednesday, February 29

The smoke has cleared and the Mustang basketball teams emerge from the CCAA games against Cal State Fullerton and Poly Pomona to take 3rd place. The 49ers downed Fullerton, 78-68 and Poly 90-80, in a real barnburner.

The Gymnastics team. The 49ers started.

The smoke has cleared and the point of the season. They lost possibly won the meet, except that this I didn't have Carl Daughters points per meet so we will have

In today's ivy-covered jungle, if you don't stay with it, the competition will eat you alive.
