Regeneration changes set

President's Messages

I welcome Cal Poly students back to campus for what we look forward to as a year in progress of 1968-69.

A few additional faculty members are on hand to greet you this fall, bringing our instructional staff to a total of 417. We expect to see our enrollment pass the 12,000 mark for the first time in the college's history. The new Van Nuys residence halls are ready for use. The new Biological Sciences Building will be ready for the winter quarter and the new Computer Science Building will be completed next May.

You are welcomed back to a college in which the students who are returning are, I am sure, returning with enhanced self-confidence, but in our great college spirit, we will work together on many things that we did last year and we did build the college more closely in the image we all want it to be. Cal Poly spirit will live as we work together and the true answer to the challenge is that we can build anything we greatly desire.

Robert E. Kennedy President

Yearbook sales on at TCU

In the California State Polytechnic College's Mustang Daily, this week's edition divides the fiscal responsibilities of the student government to get a total of 687. We expect to set our enrollment limits for 1968-69. The student government is making that decision.

Ag instructor moves to greener pastures

epartment's sheep specialist. His retirement becomes effective August 31.

The son of a Piedmont pharmacist, Collins pursued his interest in agriculture at the University of California at Davis and entered sheep production in the Immortan Valley upon his graduation. After obtaining experience in the sheep industry, he returned to UC, where he obtained a teacher's certificate at Davis where he taught his agricultural teaching courses for years. In 1940, he was appointed to the position of sheep specialist at the college. He has been active in California's sheep improvement work and has served as a sheep judge in county and district fairs.

In his retirement, Collins has been the sheep specialist at the college for 25 years. His retirement is effective August 31.

Two new administrators have been added to the normal student and college administrative personnel. The present arrangements provide for the appointment of the School of Animal Science and Animal Science, Administration Department.

The problem, which the new administrators will face, is to develop plans for the school's future, and they will work with the college's planning and administrative committees to achieve this goal.

Dr. W. J. Darby, Nutrition Department head at Vanderbilt University, states: "While it may be possible to dispense with milk in the diet, it is difficult to do so and maintain the nutritional balance of milk in the diet, as recommended by Council on Foods and Nutrition of American Medical Association."

Harper's new look Mustangs face Hornets

There's a brand new look to the 1964 football team which will continue the success tomorrow. The '64 team looks headed for a successful season on offense, personnel and the defensive system, which resulted in defeat of San Jose State last Saturday.

Coach Harper brought a Slot-T system with him when he packed his bags last spring. The Mustangs announced Ed Harper, 115 lbs., at quarterback, and Bob Lunsford, 180 lbs., at fullback. This concept is a basic part of the system which Harper has brought to Boulder from Colorado University. At the Boulder school they call it "The Switching T." To win the fourth back was utilized as a guard and halfback.

In the position the fourth back is utilized as a holder and fullback. Harper brought a new look to the offense alignment. The Mustangs will employ a spread flex to the backfield to force offensive backs to make adjustments. In a short period of practice, Harper has put the backs in this system. The Mustangs allowed 14 touchdowns and 43 points per game when they were three and last season. Currently the offense completed 21 of 35 passes and had a total of 384 rushing yards. This was double the average yards gained. The backfield was designed to provide more yards than were yielded in last week's game. What they have done in practice has given the backfield a better chance to score.

Starters in last Saturday's game included four new men on offense. This was the result of last week's game. This was the result of last week's game. The four backs were one man who is a product of the 1964 Garnet and Gold training as a halfback and halfback. The four backs were one man who is a product of the 1964 Garnet and Gold training as a halfback and halfback. The four backs were one man who is a product of the 1964 Garnet and Gold training as a halfback and halfback.

Harper highlights defense as Mustang strong point

"There's something very symbolic about a Bank of America checkbook.

It's symbolic of your school, because we've embossed your name on it.

It's also a special checkbook cover that comes in the school colors.

It allows you to cash Cal Poly checks and you can use your year-round

money in a Bank of America checkbook. It gives you more

than just money. It helps you keep a more accurate record of how much

you spend, where and when. And our Tenplan Checking Accounts

help you keep track of your spending, too. And they're

open all summer long at no charge, even if your balance is zero.

Why not stop by the branch and open a Tenplan Account soon.

You'll get one of the most useful books a student can have.
