You've got to be kidding!

Lost frost to sloppy senior

by John Dravver

During my years of college, I've had to witness many hardships that grew into full-scale events. This spring, however, has been the most memorable. It all started with the harsh winter, followed by a septembre froth that ruined the campus beauty. I'm not sure what happened next, but it seems that the population declined, and the campus became more quiet. It was then that I realized the need for college administration to take action.

From the horse's mouth

Frat for real, not just rumor

by Dave and Lau Rosewell

There is one group of students at our college that is rarely recognized for their role in shaping campus life. This group is the fraternity members. They are the ones who uphold the traditions and maintain the spirit of our college. Without them, our campus would be less vibrant and less exciting.

The Kentucky-Maryland football game was a great event for the students, and it's not just because of the sports. It's because of the camaraderie and the sense of community that it brings. It's important for us to support our teams and continue to make our college a place that we're proud to call home.

Students get greater voice in ASI affairs

After years of planning and delay, campus radio began regularly scheduled broadcasts on its FM broadcast frequency. This marks a significant milestone for the station, which has been working towards this goal for many years.

The station has been working towards this goal for many years, and it's great to see them finally get to air. The college administration has been supportive of the project, and we're happy to see it come to fruition.

The station is now able to reach a wider audience, and we're excited to see what new programs and content they'll bring to the campus.

The KCFP—Maryland Daily situation is a milestone of a trend that is occurring throughout the news industry. It's not just broadcast media that are facing challenges. The internet is changing the way that we consume news and information. The KCFP-Maryland Daily story is just one example of how the news industry is adapting to this new landscape.

Letters to the Editor

Dear Editor:

I recently received a survey from the Cuesta College Bookstore. I was asked to rate the service and the quality of the books I received. I am writing to express my concerns about the survey and its implications.

First, I believe that surveys should be conducted in a manner that is respectful and ethical. The survey I received was sent to my personal email address, which I shared with only a few people. I do not recall giving my consent to participate in this survey, and I do not believe that the survey was sent to a large audience.

Second, I am concerned about the purpose of the survey. I believe that the survey was designed to collect data on customer satisfaction, but I do not believe that it was conducted in a manner that was transparent or accountable. I am not sure what the survey results will be used for, and I do not believe that the college has a good reason for collecting this information.

I would like to see the college be more transparent about its survey practices. I believe that surveys should be conducted in a manner that is respectful and ethical, and I would like to see the college take steps to ensure that its surveys are conducted in a manner that is consistent with these principles.

Sincerely,

[Your Name]

Harriers embark on tough campaign

Coach Richard Anderson is trying to fill the void left when the three stars of Poly's swimming division, Frank Austin, Charlie Desjarlais and Ron Fernseh, graduated. "I think we can go on to win the Pac 8 this year," Anderson said.

---

Not all at Poly in Harper Era

In case you haven't noticed already, everyone is in the 'Harper Era' here. For the last couple of weeks, the Harper touch is getting a good deal of mileage off of it, and certainly, football is on everyone's mind.

But while everyone goes ape over football, Dick Purcell is hardly touched by the excitement. So when track is brought up, especially during football season, he'll be glad to sit down and talk.

"If we can keep the team spirit we had last year, we'll be okay," Purcell continued.

"Most of them are working right now. And that's a good indication that they want to be a winner this year."

Actually, Purcell said there is not much worry of losing many of the scholarship dual men. The energetic coach has six of the seven 1967-68 team back for the spring. The incoming list includes Arizona State, Arizona, Wisconsin, California State, San Diego State, and Fresno State.

Many remember how Fresno State refused to face the Mustangs last year. The I-AA champion has some to go anywhere to meet 'em, but they refused." Purcell said. Added incentives is the pleasing fact that the Mustangs haven't defeated the Bulldogs in track competition yet.

Running Too Hard

One may look at that schedule and wonder if Purcell has been running too hard out in the sun here. However, his team is quite a distant runner. A leader last December, Dutch champion in the 100 and 400 meters, Purcell also realizes the Western State College, Colorado, graduate has some exposure, but nothing to challenge Notre Dame's strength hold on collegiate exposure.

Admittedly, Purcell does a pretty good recruiting job. If he's got twenty minutes, he'll recite his list.

Thus far, the Mustang coach has such men as Joeseph Kubas from Chico, A. W. Butcher from Pacifica, and Monterey High School. They may be working right now. And that's a good indication that they want to be a winner this year."

The Mustangs have seven men who will start this season. The Junior College this Friday in San Jose State.

Coach Dick Purcell doesn't paint bright pictures when asked about the season. "Call Poly (Pomona and Fresno State) have been working out for some time," Purcell contended.

The Mustangs finished the season last year in 21 nation. They have to perfect what we have from last year," heexplained.

"We have to perfect what we have from last year," heexplained.

Coach Dick Purcell, a guard, expressed support.
